

Partial List of Mutagens (Current to October 1999)

Introduction: The following is an alphabetical compilation of chemical substances as listed in the "Dangerous Properties of Industrial Materials", 10th Ed., by N. Irving Sax and Richard J. Lewis. It is important to remember that this list is not comprehensive. It does not include all mutagens and does not list reproductive hazards, select carcinogens or acute toxins. Additional lists are presented for other chemical hazard classifications to assist chemical hazard identification. This information was acquired through TTU Chemical Hygiene Plan.
