Applicants must be board-eligible or board-certified in Internal Medicine, Obstetrics and Gynecology or Family Medicine.

This one year fellowship emphasizes the prevention and treatment of diseases unique to or more prevalent in women. Required rotations include continuity clinics in the Women's Health Primary Care Clinic and Gynecology Clinic. Other opportunities for clinical rotations include: Urogynecology, Psychiatry, Endocrinology, Breast Clinic, Cardiovascular Diseases, Obesity and Bariatric Surgery, Metabolic Bone Disease, Geriatrics and Adolescent Medicine.

The fellowship offers opportunity for procedural competency in endometrial biopsy, colposcopy, cystometrics and other office gynecology procedures (bartholin cysts, vulvar biopsy, etc).

Each Women's Health Fellow is responsible for designing and implementing a clinical research project and for presenting and publishing the results of this project. This is accomplished with the aid of a selected research mentor.

Funding is available to cover research costs. Research and didactic time are built in the fellow's schedule.

The fellow attends one national Women's Health meeting such as NAMS and has the opportunity to become a certified NAMS menopause practitioner. Funding is provided for the fellow to complete the International Society of Clinical Densitometry (ISCD) certification course. The fellowship has a consultant available who will work with the fellow on public speaking techniques and presentation skills.
