

Workforce Education and Development Presents 212° Continuum

At 211° water is hot. At 212° water begins to boil.
Boiling water creates steam
and
steam can power a train.

One extra degree can make all the difference!

212° Continuum is a bimonthly class for non-supervisory employees that provides tools and encouragement equipping you to reach the extra degree in all that you do.

Let's turn up the heat!
