HSC OP: 50.12, Check Collections and Returned Checks

PURPOSE: The purpose of this Health Sciences Center Operating Policy and Procedure (HSC OP) is to establish rules and guidelines for the receipt and processing of returned checks.

REVIEW: This HSC OP will be reviewed on April 1 of each year (EY) by the Directors of Accounting Services and Student Business Services, with recommendations for revisions forwarded to the Vice President and Chief Financial Officer by April 15.

POLICY/PROCEDURE:

1. Responsibilities. Accounting Services will be responsible for the establishment of guidelines for acceptance of checks by departments and for the processing and collection of returned checks.

2. General Guidelines for the Acceptance of Checks by Departments.
   a. To facilitate rapid and accurate check collection, all checks accepted by departments must be made payable to Texas Tech University Health Sciences Center (TTUHSC), to the department by name followed by TTUHSC, or to the Texas Tech Foundation Inc. (TTFI). Any check drawn on a foreign country bank must be transmitted to the Student Business Services Office. Checks drawn on foreign country banks cannot be considered as payment until the funds are collected.
   b. Before a check is accepted, the department is responsible for verifying that the following information is included on the check:
      (1) Signature of the payer
      (2) Current date (postdated checks must not be accepted)
      (3) Numeric amount that agrees with the amount due and the written amount (checks written for more than the amount due must not be accepted)
      (4) Notation indicating the service or goods for which the payment is made
      (5) Complete driver’s license information of the payer
      (6) Imprint of magnetic ink characters for account identification
      (7) Payer’s preprinted name and address of the payer
   c. State law requires that all receipts be deposited within three business days. Receipts totaling more than $100 must be deposited not later than the following business day.
   d. All checks collected by departments must be restrictively endorsed immediately upon receipt using an official TTUHSC endorsement stamp. The stamp imprint must be clear and readable. Consult HSC OP 50.10 for procedures relating to obtaining and using endorsement stamps.

3. Redeposit of Insufficient Funds Checks.

TTUHSC has established a policy with our primary bank to redeposit all checks returned for insufficient funds. Therefore, the department should not attempt to redeposit insufficient funds checks for collection. Insufficient funds checks should be forwarded for collection as described in Section 4 of this HSC OP. Departments should refer all communications regarding returned checks to Accounting Services. Departments should not accept repayment of a returned check amount without express approval by Accounting Services.
4. Processing of Returned Checks

a. As often as daily, returned checks will be forwarded from the respective banks to Accounting Services. For the depository accounts utilized by the MPIP & SOP Business Offices, copies of the returned checks will be made so that each Business Office can have either copies or the originals of the returned checks and Accounting Services can have the other.

b. When the MPIP Business Offices receive the returned check log and the original or copied returned checks, they must segregate between MPIP payments and other payments. For those returned checks that represent dishonored MPIP patient payments, a transaction must be entered into GE Patient System (paycode 96) to reinstate the outstanding patient receivable balance. For those that do not represent patient payments, the MPIP Business Offices will need to work directly with Accounting Services to determine which department originally deposited the returned check and what deposit coding was originally used.

c. When Accounting Services receives the returned checks, a journal entry will be prepared to reduce trust fund or other applicable revenue coding for the corresponding FOAP. Accounting Services will assume initially that all returned checks for the MPIP deposit FOAPs relate to MPIP patient collections and will reduce trust fund revenue for the entire amount. Once the MPIP Business Offices advise Accounting Services of the amount of the returned checks that do not relate to MPIP patient collections, the related trust fund revenue will be reinstated. For returned checks that do not relate to MPIP collections, Accounting Services will contact the appropriate endorsement stamp contact as determined by the endorsement number printed on the returned check.

d. Immediate reduction of trust fund revenue for MPIP patient returned checks helps to ensure that the MPIP Business Offices are able to reconcile between trust fund activity and GE Patient System activity.

e. Subsequent collections of funds by the approved contractor or by express authorization of Accounting Services will result in a deposit to trust fund or other applicable revenue.

f. MPIP & SOP Business Offices at the regional campuses will be responsible for collection efforts for returned checks that relate to their respective patient revenues. Collection efforts will often involve direct contact with the patient and/or referral to a third-party collection agent or the appropriate legal authorities.

g. Accounting Services will initiate the collection efforts for all checks returned by Lubbock banks using a local third-party agent. Departments will be responsible for additional collection efforts for any items returned as “stop payments”. Items determined by the third party agent to be uncollectible will be forwarded to the office of the District Attorney for prosecution and collection.

h. Most agreements with third-party collection agents provide for recovery of a collection fee, a portion of which will usually be provided to TTUHSC. The maker of the returned check will be required to pay directly to the collection agent (or other collecting organization) the amount owed resulting from the returned check and any applicable service charge, in the form of cash, money order, or cashier’s check. Any waiver of a returned check service charge associated with collection agent efforts is governed by the contract in effect with the collection agent unless collection is obtained prior to the check being submitted to the collection agent, in which case collection of an additional fee will be at the discretion and use of the collecting department. All collections by departments require the prior express approval by Accounting Services.

i. In all aspects of returned check processing, it will be extremely important that strong communications exist between departments and that information be provided in a timely manner.
5. **Record Holds and Termination of Check Cashing Privileges.**

a. Checks given by students which are returned to a department as uncollectible may result in a hold being placed on the student's records. The department is responsible for placing a hold on the student's records and the deletion of the hold when necessary.

b. Collection agents often maintain a list of payers from which checks should not be accepted. This list may be provided to us and may initiate refusal by departments to accept check payments from listed individuals or organizations. If inclusion on such lists is believed to be inappropriate, the listed individual or organization must contact the collection agent directly.

c. Departments may, at their own discretion, establish policy regarding action to be taken against faculty or staff employees within their departments who write checks which are returned or deemed to be uncollectible. Where allowable by law, previously uncollected checks from faculty and staff may be applied against any other balance due to the employee.

d. A department may refuse checks as payment when they deem such action to be in the best interest of the institution.

6. **Returned Checks for Student Tuition and Fees.** Collection of returned checks for tuition and fees for students attending TTUHSC will be the responsibility of the TTUHSC Student Business Services Office. A transaction will be entered into the Banner Student system to reinstate the student accounts receivable balance and collection efforts will resume immediately. Any question regarding collections of these checks should be addressed to the TTUHSC Student Business Services Office.
