

Information Technology Strategic Initiative

Proposed Governance Model

Role of the Chief Information Officer

- Provides the leadership and serves as the focal point for achieving a shared vision throughout TTUHSC concerning how we will leverage information technology to achieve our mission and goals.
- In collaboration with students, faculty and staff, develops a strategic plan for the use of information technology.
- In collaboration with the IT Advisory Councils and the IT Board of Directors, develops information, technology policies and standards necessary to achieve an integrated technology and information environment.
- Develops entrepreneurial strategic relationships with internal and external partners to achieve information technology goals.
- In collaboration with the IT Board of Directors, creates a resource acquisition and management strategy to provide needed capital and operational investments in information technology infrastructure and services.
- Manages centralized/institutional information technology services and operations in an efficient and customer focused manner.
- In collaboration with the IT Advisory Councils and the IT Board of Directors, ensures that both centralized and decentralized services support an integrated information environment.
- Oversees technology infrastructure issues on TTUHSC facility construction projects.

Operational Responsibilities/Authority

- Reviews and approves the scope of services and resource allocation for all centrally funded IT budgets.
- Reviews and approves the use of all IT titles in the TTUHSC pay plan.
- Reviews and approves IT procurements in excess of \$50,000.
- Develops strategic relationships/contracts with the private sector which will be used to leverage the overall procurement authority of TTUHSC.
