Welcome to the TTUHSC libraries @ Amarillo | Lubbock | Odessa

What can I find here?

- **Physical items** such as books in print, anatomical models, DVD/CD's, paper journals not available online, and most eBooks
- **NOTE** - additional uncataloged eBooks are in ProQuest ebook Central and in EBSCOhost
- Are you looking for an entire online journal? Search in GoldRush by journal title.
- Are you looking for a single journal article only?

TTUHSC School of Nursing Writing Task Force

The Texas Tech University Health Sciences Center School of Nursing uses standards developed by the American Psychological Association (APA) for the organization, language, and editorial style of research papers, as well as for the citation and identification of reference sources. Click here to read the "Vision Statement on Professional Writing in Nursing" issued by the TTUHSC School of Nursing Writing Task Force.

Resources just for you!
Frequently Used Databases
- All SON databases
- AgliemD
- Anatomy TV
- CINAHL Complete
- DynaMed Plus
- ERIC
- Gold Rush
- Joanna Briggs Institute
- Mental Measurements Yearbook
- MICROMEDEX
- Natter Reference
- Nursing Reference Center Plus
- PEPID
- PubMed
- StatRef

Frequently Used eBooks
- Bates Visual Guide to Physical Examination
- Diseases: nursing process approach to excellent care
- Lippincott manual of nursing practice
- Lippincott's nursing drug guide
- Nurses' guide to clinical procedures
- Nurse's manual of laboratory and diagnostic tests [1 concurrent user]
- Nurse's pocket guide: diagnoses, prioritized interventions, and rationales [2 concurrent users]
- Nursing diagnosis and collaborative problems
- Nursing diagnoses in psychiatric nursing: care plans and psychotropic medications
- Nursing diagnostic: application to clinical practice
- Sparks & Taylor's nursing diagnosis reference manual

Frequently Used Journals
- Clinical Scholars Review
- Journal of the American Academy of Nurse Practitioners
- Journal of Midwifery and Women's Health
- Journal of Nursing Administration
- Journal for Nurse Practitioners
- Journal of Professional Nursing
- Nurse Practitioner
- Nursing Economics
- Nursing Management
- Online Journal of Issues in Nursing

Finding articles assigned for courses
Typically, you would use GoldRush to find library access to the full text of a particular journal title.
GoldRush will find access to a particular journal, for example, Cancer Nursing, by providing a link to the journal provider, for example, Ovid.
But if you don't know the volume and issue, GoldRush is not the place to start.
If you have a doi number and no other information, try pasting the doi into the PubMed search box.
A doi looks like this:
doi: 10.1097/NNU.0000000000000215
Alternatively, you can also search for a doi in Google Scholar or Google.
No doi available? PubMed Citation Matcher is a good tool to use when you don't have a complete citation. It will allow you to search by key words in the title of the article.
Link to PubMed Citation Matcher

- Doi Tutorial
- Locating Materials
Database Searching 101

Get the Results You Want!
Terms from a Question

• Entering a whole question into a database doesn’t work
• Use 2-3 words rather than a whole or partial sentence

How do I prevent medication errors in the hospital?

medication errors    hospital
Subject Headings

• Subject Headings act as a thesaurus for the database—it’s how the articles are indexed.

• Helps clear up any issue with synonyms, making sure you find articles related to a concept, not just a term.

• Search the database using terms it is programmed to understand.
Keywords

- Keyword search will look for your word everywhere
- Only the entered term is searched; synonyms are excluded
Subheadings

- Subheadings act as a facet of subject headings
- Narrow a broad subject heading to get more specific results
Boolean Operators

• **NOT** excludes a term from the search

• **AND** searches both terms *together*

• **OR** searches both terms *separately*
AND vs. OR

- **hospitals**
- **medication errors**
General Searching Tips

• Start with a broad search, then narrow it as needed
  • This ensures that you don’t miss potentially relevant results

• Search each term separately, then combine them later
  • This allows you to alter your strategy if your initial search doesn’t work
More General Tips

• Don’t be afraid to hunt for the subject heading you need
  • Try looking for it under a different name/synonym

• Have fun!
  • The more you search, the easier it will be!
Useful Databases

Finding the information you need!

What We Know

Introduction

The Joint Commission (TJC) is a national, non-profit organization that accredits and certifies nearly 21,000 health care organizations (e.g., hospitals, ambulatory care centers) and programs in the United States. TJC seeks to continuously improve health care, patient safety, and patient outcomes through performance standards. In 1987, TJC inaugurated performance measures for improved patient outcomes with the Agenda for Change, eventually titled the ORYX® initiative. Through ORYX, hospitals could choose from thousands of performance measures to meet hospital accreditation. This approach led to an inability to compare health care organization data across systems. TJC utilized advisory panels in 1999 to reframe the next phase of ORYX for identification and use of evidence-based and standardized performance measures. Core measures were developed and pilot tested for reliability, validity, and feasibility in 83 hospitals in nine states (California, Connecticut, Georgia, Michigan, Missouri, Rhode Island, Texas, South Carolina, and Virginia). For a discussion of core measures and those specific criteria, as well as changes for 2016, please see the Evidence-Based Care Sheet: Core Measures: an Overview.
Acute myocardial infarction. Retrieved April 8, 2016, from medicalpubs.disease-management/cardiology/acute-myocardial-infarction (GI)

Explore Evidence-based Information about Diseases and Conditions

Consult thousands of disease and condition topics that map to the nursing workflow and include the latest evidence known today. Topics focus on disease overviews, risk factors, prevention, diagnosis, comorbidities, prevalence in various populations, complications, treatment strategies, outcomes, and much more. All Disease Topics

Most Common Diseases

**Chronic Obstructive Pulmonary Disease**
COPD is the 4th leading cause of death worldwide and nurses should be aware of effective management of the disease to decrease health care costs. View Topics

**Care Plans**
Use these problem-based care plans, including impaired gas exchange and more, to effectively address patient problems and support patients in reaching the desired goals. View Topics

**Heart Diseases**
The body of evidence related to heart diseases supports many approaches, including the provision of aspirin on arrival for AMI, as discussed in the core measure. View Topics

Why are there sometimes multiple sources for a single title?
Interlibrary Loan (ILL)

Read all about it here!
Basic ILL Information

- Online ordering form makes submitting requests quick and easy

- Response time for requests is anywhere from 2 – 5 business days, depending on location of the item

- Books from any TTUHSC branch library are free, all others are $4.00

- Journal articles are charged per page, but fees will not exceed $4.00

- There is a rush option available, but at a higher fee rate

- Credit Card payment option is available!
Thank You!
