**Mc
Graw
Hill**

There's never been an online surgical education resource as comprehensive, as content rich, and as tightly integrated with your curriculum as AccessSurgery™ from McGraw-Hill.

AccessSurgery introduces a whole new dimension to surgical education by enabling you to incorporate the field's finest references, including the essential *Schwartz's Principles of Surgery*, procedural videos and animations, and text updates into your own curriculum.

Customize your curriculum with content from our leading textbooks and clinical references, as well as cutting-edge videos and animations, to create interactive online rotations and activities that address your institution's unique educational needs. This flexible curriculum-based approach combined with unmatched resources and robust multimedia make **AccessSurgery** an integral part of any resident education program.

Tailored to Your Program — Custom Curriculum

Custom Curriculum is a powerful online tool that allows program directors to effectively manage their resident training — from one convenient site.

With Custom Curriculum, faculty can:

- Incorporate **AccessSurgery** and other medical content into assignments and activities
- Monitor and report mastery of required topics by resident or rotation
- Create, manage, and save rotations and resident education more efficiently

With Custom Curriculum, residents can:

- Study procedures in detail using faculty-selected resources
- Test themselves and track their performance and areas for improvement

AccessSurgery DELIVERS:

An online collection of the most current cornerstone surgery resources, such as the *Schwartz's Principles of Surgery*— which features exclusive online-only material such as regular chapter updates and related journal reviews. Other titles include:
