[What is the AAMC Login?](#)

To log in, open an internet browser and go to <http://services.aamc.org/jsp/currmit/>

If you do not have your log in information, please contact Victor Gonzales or Matthew Andersen at 3-5668. Users may also directly contact the CurrMIT helpdesk at helpcurrmit@aamc.org.

Welcome to CurrMIT

CurrMIT contains curriculum information from medical schools throughout the U.S. and Canada. CurrMIT allows each medical school to better understand and administer its own curriculum, as well as learn from curricula at other institutions.

Curriculum Management

Enter, update, or delete your school's curriculum information.

Curriculum Information

Extract information about your school's and other schools' curricula by setting up and generating reports.

To obtain more information about CurrMIT or get help using the application, [get Help](#).

Notices

WELCOME to the new, improved CurrMIT! We recommend that you review updates to the Release Notes periodically. The Release Notes are in CurrMIT's Help Center. To get there, click on "Help" from the upper right side of any page in CurrMIT.

Curriculum Information

CurrMIT houses a number of standard reports set up by AAMC that provide basic information about your curriculum and the curricula of other schools. CurrMIT also provides you the opportunity to create customized reports to fit the specific needs of your institution.

Existing Reports

AAMC-provided reports provide commonly requested information about Courses, Sessions, Sections, Users, Institutions, and Elements. Additionally, you or others at your institution may have created or customized and saved other reports that are ready to be generated. You can generate these reports as they are, or modify them to meet your needs.

Schematic Reports

A schematic report provides an overview of a school's curriculum for a given graduating class or academic year. It is a graphical representation of the relationships between Courses, based on their start and end dates. You can see Course details by clicking on a Course name in the schematic report.

Custom Reports

Custom reports are reports that you create to meet specific institutional needs. You decide which information to display and what records to include.

Calendar

A calendar report shows schedule details for a given academic period. In a graphical calendar format, the report displays what Sessions are covered and when and where specific Sections occur.

Existing SQL Reports

Existing SQL Reports

Open SQL Reports

Enter your own SQL queries.

Online Curriculum Directory

Provides a comprehensive description of medical student education programs based on data entered in CurrMIT. Reports information on curriculum characteristics, current trends and innovations of interest to applicants, faculty and deans.

Quick Search

Search through CurrMIT easily and quickly to identify where topics are being covered at individual institutions.

Click on [Quick Search](#).

Quick Search

The search is case sensitive. You may search using Boolean connectors, but please limit the number of search strings to three. Example: inherited disorders OR gene AND NOT genera
