| Personnel     | Tommie Farrell, MD & Betsy Jones, EdD, Family Medicine, TTUHSC Lubbock  
                Stephen Fath, PhD, Director of Interactive Video Services, University of Texas HSC Houston  
                2007 SGEA Conference Demonstration, Louisville, KY |
| Learning Objectives | 1. Identify at least 3 clinical purposes of the MMSE  
                      2. List the benefits and limitations of using the MMSE to assess an elderly patient  
                      3. Be able to administer and score the MMSE  
                      4. Describe implications of the MMSE for treatment decisions |
| Content Outline (by minute) | ▪ Overview of the MMSE: Farrell  
                               ▪ Example of an MMSE exam: Farrell as physician; Fath as patient  
                               ▪ Follow-up discussion: Farrell moderates |
| Application of the episode content to practice | Published as part of the Reynolds Geriatrics Series for medical students, residents & practicing physicians |
| Evaluation Questions | ▪ List the purposes of the MMSE  
                         ▪ Identify limitations of the MMSE’s use  
                         ▪ Example of results with scoring options  
                         ▪ Patient vignette question with treatment decision tree |
| Podcast Pearl Topic | Adjusting the MMSE to accommodate patients’ educational background or computational skills (Dr. Farrell) |
| Comments        | Episode recorded at the SGEA Meeting, Demonstration session, April 19, 2007, Louisville, KY |
