

# Staff Satisfaction Survey

---

TTUHSC Institutional Report  
2007-2008

## **General Information**

The Higher Education Excellence Survey (HEES) was administered to staff members at Texas Tech University Health Sciences Center (TTUHSC) in Spring 2008. Based on the well-established Survey of Organizational Excellence, the HEES has been tailored specifically to meet the needs of the higher education community. Survey administration is coordinated through the Organizational Excellence Group (OEG) at the University of Texas at Austin.

The Higher Education Excellence Survey (HEES) measures five broad dimensions of the work environment. They include (1) *Work Group*, (2) *Accommodations*, (3) *Organizational Features*, (4) *Information*, and (5) *Personal*. Each dimension is composed of three to five specific constructs. Scores for each dimension and construct range from 100 to 500. Scores above 300 suggest that employees perceive an issue more positively than negatively, and scores of 400 or higher indicate areas of substantial strength. Conversely, below 300 suggest that employees perceive an issue more negatively than positively, and scores below 200 should be a significant source of concern for the institution.

## **Data Collection**

More than four thousand (N=4,032) TTUHSC employees were invited to take the Higher Education Excellence Survey (HEES). Targeted employees included administrators and staff members whose primary responsibility was not as a faculty member.

Data collection began May 26, 2008, and ended June 13, 2008. During that three-week period, 932 TTUHSC employees completed the survey online, and an additional 32 employees completed a paper survey. In total, 964 (n=964) employees completed the HEES, resulting in a response rate of 24%. This is lower than the average response rate of 52% for institutions that participated in the HEES in 2007-08.

## **Results**

Survey results are presented in a series of reports prepared by the Organizational Excellence Group (OEG). The resulting reports are now available. The institution's overall results are described in an executive summary and comprehensive data report. In addition, survey respondents were asked to select a primary affiliation using one of the descriptors listed below. Therefore, individual summary reports are also available for the following sub-groups. (Approximate sample sizes are provided for each sub-group.)

- School of Allied Health Sciences (SOAHS) (*n*=57)
- Correctional Managed Health Care (CMHC) (*n*=69)
- Resident Physicians (*n*=63)
- School of Medicine, excluding CMHC and Resident Physician (SOM) (*n*=63)
- School of Nursing (SON) (*n*=238)
- School of Pharmacy (SOP) (*n*=34)
- Graduate School of Biomedical Sciences (GSBS) (*n*=9)
- Academic Services (*n*=17)
- Finance and Administration – Business Affairs (*n*=37)
- Finance and Administration – Human Resources (*n*=15)
- Finance and Administration – Physical Plant (*n*=18)
- Finance and Administration – Other (*n*=32)
- Information Technology (IT) (*n*=39)
- Institutes (e.g. Garrison, Rural Health) (*n*=13)
- Institutional Advancement/Communications and Marketing (Adv/ Comm & Mkt) (*n*=9)
- Libraries (*n*=14)
- Research (*n*=39)
- Other (*n*=185)

Respondents were also asked to indicate their location using one of the descriptors listed below. Thus, individual summary reports are available for these sub-groups as well:

- Abilene (*n*=10)
- Amarillo (*n*=173)
- Dallas (*n*=0)
- El Paso (*n*=156)
- Lubbock (*n*=499)
- Permian Basin (*n*=61)
- Hill Country (*n*=0)
- Correctional Facilities (*n*=19)

The reports distributed by the OEG provide an excellent overview of survey results, highlighting key strengths and potential areas of concern by identifying the highest and lowest construct scores. However, it may be necessary to note some additional observations not addressed in those reports. This supplemental report provides construct and dimension scores in relation to various benchmarks. Benchmark scores are available for all organizations who administered the Survey of Organizational Excellence, organizations of a similar size, organizations with an educational mission, and institutions of higher education See Tables 1-5 throughout the text. Individual units and departments are encouraged to run their own analyses of the data as well. Contact the Office of Institutional Planning and Effectiveness (OIPE) for a particular data set.

### **Limitations**

A word of caution is necessary before proceeding to the following sections. As with any survey administration, there are certain limitations of which to be aware. A key consideration for this survey is that respondents self-selected the sub-groups for primary affiliation and location. Therefore, it is possible that respondents either mistakenly or intentionally marked sub-groups to which they did not belong. This may be attributed to confusion in selecting the most appropriate sub-group and/or fear of one's identity being determined based on his/her responses. (There were approximately 185 respondents who marked *Other* as their primary affiliation.) In addition, some respondents did not select any sub-groups. Another consideration relates to the significance of the results. The information presented below is descriptive only. No efforts have been made to calculate whether differences are statistically significant. Third, small sample sizes impact survey results, and resulting samples may not be representative of the population. With

these considerations in mind, the potential strengths and areas of concern presented below should be considered carefully. Individual unit and/or department leaders are encouraged to explore issues in more depth as necessary in order to determine the most appropriate courses of action.

**Dimension I: Work Group**

The *Work Group* dimension relates to employees’ activities within their immediate work environment. They include factors that concern how employees interact with peers, supervisors, and those involved in everyday work activities. This dimension is composed four constructs. Brief descriptions of those constructs are provided below. Additional descriptions are available in the OEG reports.

- (1) *Supervisor Effectiveness*: Provides insight into the nature of supervisory relationships in the organization;
- (2) *Fairness*: Measures the extent to which employees believe that equal and fair opportunity exists for all members of the organization;
- (3) *Team Effectiveness*: Captures employees’ perceptions of the effectiveness of their work group and the extent to which the organizational environment supports teamwork among employees; and
- (4) *Diversity*: Addresses the extent to which employees feel that individual differences may result in alienation and/or missed opportunities for learning or advancement.

On the *Work Group* dimension, no specific strengths emerged for TTUHSC when compared to the benchmarks (see Table 1-A). One construct for which TTUHSC scored lower than all the other benchmarks was *Fairness*.

**Table 1-A. Work Group Dimension Comparisons for the Institution**

Dimension	Construct Name	BENCHMARKS				TTUHSC
		Total	Size	Mission	Higher Ed.	n=964
Work Group	Supervisor Effectiveness	344	318	336	354	333
	Fairness	363	339	353	352	330
	Team Effectiveness	344	317	337	336	320
	Diversity	359	337	355	361	344
<b>WORK GROUP SCORE</b>		<b>352</b>	<b>327</b>	<b>345</b>	<b>350</b>	<b>331</b>

Additional insights related to the *Work Group* dimension are evident in the dimension and construct scores for the sub-groups organized by primary affiliation and location. These scores were compared against all available benchmark scores, which include scores for all organizations who have administered the Survey of Organizational Excellence, organizations of a similar size, organizations with an educational mission, institutions of higher education, and the TTUHSC. Tables 1-B and 1-C list the specific areas that had scores above (+) all the benchmark scores, as well as those areas whose scores were below (-) all the benchmark comparisons. The latter may indicate the need for further exploration and/or improvement. Affiliations and locations not

listed fell within the range of the comparative scores. A spreadsheet comparing the actual scores across affiliation and location is available through the Office of Institutional Planning and Effectiveness (OIPE) upon request.

\* Scored below 300

**Dimension II: Accommodations**

The *Accommodations* dimension considers the physical work setting and the factors associated with compensation, work technology, and tools. In the words of the OEG, this dimension relates to the “total benefit package” provided to employees by the organization. This dimension is composed four constructs. Brief descriptions of those constructs are provided below. Additional descriptions are available in the OEG reports.

- (1) *Fair Pay*: Feedback from the viewpoint of employees about the competitiveness of the total compensation package compared to similar jobs in their own communities;
- (2) *Physical Environment*: Captures employee perceptions of the work setting and the degree to which employees believe that it is a safe and pleasant working environment;
- (3) *Benefits*: Provides an indication of the role that the employment benefit package plays in attracting and retaining employees; and
- (4) *Employment Development*: Captures perceptions of the priority given to career and personal development by the organization.

On the *Accommodations* dimension, data indicate that TTUHSC construct scores are in line with those of the comparative groups (see Table 2-A). Note that construct score for *Fair Pay* falls below 300, which typically indicates a source of concern for participating organizations. However, it is important to note that all comparative scores fall below the desired level on this particular construct.

**Table 2-A. Accommodations Dimension Comparisons for the Institution**

Dimension	Construct Name	BENCHMARKS				TTUHSC
		Total	Size	Mission	Higher Ed.	n=964
Accommodations	Fair Pay	260	229	267	272	244
	Physical Environment	380	356	380	385	382

<b>ACCOMMODATIONS DIMENSION</b>	<b>None</b>	<b>None</b>

\* Scored below 300 AND outside the range of comparative scores

### **Dimension III: Organizational Features**

The *Organizational Features* dimension addresses the organization’s interface with external influences. It is an internal evaluation of the organization’s ability to assess changes in the environment and make needed adjustments. This dimension is composed of five constructs. Brief descriptions of those constructs are provided below. Additional descriptions are available in the OEG reports.

- (1) *Change-Oriented*: Gathers employees perceptions of the organization’s capability and readiness to change based on new information and ideas;
- (2) *Goal-Oriented*: Addresses the organization’s ability to include all its members in focusing resources towards goal accomplishment;
- (3) *Holographic*: Refers to the degree to which all actions of the organization are cohesive and understood by all, including the consistency of decision-making and activities within the organization;
- (4) *Strategic*: Captures employees’ thinking about how the organization responds to external influences, including those which play a role in defining the mission, services, and products provided by the organization; and
- (5) *Quality*: Focuses on the degree to which quality principles, such as customer service and continuous improvement, are integral to the organizational culture.

On the *Organizational Features* dimension, no specific strengths emerged for TTUHSC when compared to the benchmarks (see Table III-A). One construct for which TTUHSC scored lower than all the other benchmarks was *Quality*.

**Table 3-A. Organizational Features Dimension Comparisons for the Institution**

Dimension	Construct Name	BENCHMARKS				TTUHSC
		Total	Size	Mission	Higher Ed.	n=964
Organizational Features	Change Oriented	346	322	339	349	331
	Goal Oriented	362	337	353	357	344
	Holographic	355	329	351	356	339

<b>ORGANIZATIONAL FEATURES DIMENSION</b>	<b>Correctional Facilities*</b>	<b>None</b>

\* Scored below 300

#### **Dimension IV: Information**

The *Information* dimension refers to the consistency and structure of communication flow within the organization and to external groups. It examines the degree to which communication is directed towards work-related concerns, how focused and effective it is, and how accessible it is to employees. This dimension is composed of three constructs. Brief descriptions of those constructs are provided below. Additional descriptions are available in the OEG reports.

- (1) *Internal*: Captures the nature of communication exchanges within the organization and addresses the extent to which employees view information exchanges as open and productive;
- (2) *Availability*: Provides insight into whether employees know where to get needed information and whether they have the ability to access it in a timely manner;
- (3) *External*: Looks at how information flows in and out of the organization and focuses on the ability of the organization to synthesize and apply external information to work performed by the organization.

On the *Information* dimension, data indicate that TTUHSC construct scores are in line with those of the comparative groups (see Table 4-A). No specific strengths or areas of concern emerged for the institution as a whole.

**Table 4-A. Information Dimension Comparisons for the Institution**

Dimension	Construct Name	BENCHMARKS				TTUHSC
		Total	Size	Mission	Higher Ed.	n=964
Information	Internal	335	307	326	324	317
	Availability	373	347	363	359	355
	External	378	353	374	369	360
<b>INFORMATION SCORE</b>		<b>362</b>	<b>335</b>	<b>354</b>	<b>350</b>	<b>344</b>

Additional insights related to the *Information* dimension are evident in the dimension and construct scores for the sub-groups organized by primary affiliation and location. Tables 4-B and 4-C list the specific areas that had scores above (+) all the benchmark scores, as well as those areas whose scores were below (-) all the benchmark comparisons. The latter may indicate the need for further exploration and/or improvement. Affiliations and locations not listed fell within the range of the comparative scores. A spreadsheet comparing the actual scores across affiliation and location is available through the Office of Institutional Planning and Effectiveness (OIPE) upon request.

\* Scored below 300

### **Dimension V: Personal**

The *Personal* dimension measures the internalization of stress and the extent to which debilitating social and psychological conditions appear to factors in the lives of an organization's employees. This dimension addresses the important interface between work and home lives, including how that relationship may impact job performance and organizational efficiency. This dimension is composed of four constructs. Brief descriptions of those constructs are provided below. Additional descriptions are available in the OEG reports.

- (1) *Job Satisfaction*: Addresses employees' satisfaction with their overall work situation, including issues concerning employees' evaluation of the availability of time and resources needed to perform jobs effectively;
- (2) *Time and Stress*: Looks at how realistic job demands are given time and resource constraints and captures employees' feelings about their ability to balance home and work demands (*Note: The higher the score, the lower the level of stress.*);
- (3) *Burnout*: Reflects feelings of extreme mental exhaustion than can negatively impact employees' physical health and job performance, leading to lost resources and opportunities in the organization (*Note: The higher the score, the lower the level of burnout.*); and
- (4) *Empowerment*: Measures the degree to which employees feel that they have some control over their jobs and the outcomes of their efforts.

Again, no specific strengths or areas of concern emerged from the data for the *Personal* dimension (see Table 5.A). The TTUHSC construct scores are in line with those of the comparative groups.

**Table 5.A. *Personal* Dimension Comparisons for the Institution**

Dimension	Construct Name	BENCHMARKS				TTUHSC
		<i>Total</i>	<i>Size</i>	<i>Mission</i>	<i>Higher Ed.</i>	n=964
Personal	Job Satisfaction	369	338	365	373	363
	Time and Stress	366	338	360	366	362
	Burnout	371	347	369	374	357
	Empowerment	363	339	361	359	347
<b>PERSONAL SCORE</b>		<b>367</b>	<b>340</b>	<b>363</b>	<b>368</b>	<b>357</b>

Additional insights related to the *Personal* dimension are evident in the dimension and construct scores for the sub-groups organized by primary affiliation and location. Tables 5-B and 5-C list the specific areas that had scores above (+) all the benchmark scores, as well as those areas whose scores were below (-) all the benchmark comparisons. The latter may indicate the need for further exploration and/or improvement. Affiliations and locations not listed fell within the range of the comparative scores. A spreadsheet comparing the actual scores across affiliation and location is available through the Office of Institutional Planning and Effectiveness (OIPE) upon request.
