

## Martin Ortega

When can we expect this clinic to open?

0:06

This clinic is going to be launching in the month of August, and we will be starting with the primary care telehealth visits first and then later we're privileged to be able to partner with Texas A&M health for a behavioral health clinic, also through telehealth in the same facility.

How can people make an appointment?

0:25

So what's great about this is there is a direct line that patients can call to be to facilitate an appointment that is a phone number that's been dedicated for rural telehealth sites, we're privileged to partner with other communities to do the same. So we've dedicated a part of our team to be able to provide that sort of access and that sort of communication line.

How will payment at the clinic work?

0:53

We are going to be launching this telehealth clinic site with a flat fee for patients to be able to access both primary care and behavioral health.

Anything else to add?

1:05

Yeah, we're just really excited about this opportunity to work with this community, to be able to partner and accompany those in this county and in Fort Davis, and then also to do it in a really innovative and collaborative way with our colleagues from Texas A&M.
