Fleas, Flies, and Fascists: Lessons from the International Medical Relief Corps

Wednesday, April 16, 2014

ACB 120, 12:00 noon CT

The International Medical Relief Corps was a medical mission to the Chinese Red Cross from 1938 – 1945. The efforts of these European and North American physicians constitute one of the great stories of the great generation. Their humanism and internationalism is well known in China but relatively unknown in the West. During this presentation, the contemporary relevance and historic lessons learned from this war-time medical mission will be discussed.

Free lunch provided to the first 40 attendees!

Persons needing assistance are
requested to call 806-743-2900.
