

KSENIJA KORAC

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES

BECAUSE YOU GAVE...

I am so incredibly grateful for this wonderful opportunity. Thank you for believing in me and investing into my education. After earning my doctorate degree, I plan on continuing to do research in the area of pancreatic cancer as a post-doc. My dream is to lead my own research group in the future. I want to be a part of the fight against this devastating disease and contribute by researching novel treatment options. In the future, I hope to be able to help other students achieve their academic goals just like you are now helping me achieve mine. Thank you.

WITH YOUR SUPPORT, I CAN...

I will use these funds to cover textbooks cost and cover registrations fees for the scientific conferences. Scientific conferences are an excellent opportunity for networking, learning more about novel discoveries in the field and presenting your research in front of different scientists from all over the world. I am incredibly grateful for every opportunity to better myself as a scientist and learn from others.

WHY I CHOSE TTUHSC...

I first learned about Texas Tech when I was an exchange student in high school. I quickly became a fan of Texas Tech football team. Later on, after researching scientific programs at Texas Tech I knew it was where I wanted to be. I came back from my home country to earn my Bachelor Degree of Science in Biochemistry and decided to stay for my doctorate degree as well. Aside from providing outstanding education, Texas Tech also celebrates diversity and different cultures. Receiving education from Texas Tech is most certainly preparing me for success in my future career.
