

VICTORIA YOUNG

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES

BECAUSE YOU GAVE...

Thank you for this scholarship! It greatly helps with my education to become a better scientist. The universe has an infinite number of fascinating and important questions to solve. And I believe that the more humanity knows and understands, the better world we can create. Everyday I strive to become a better researcher, to ask different questions, and find ways to solve the questions I have. I hope my discoveries will one day help others.

WITH YOUR SUPPORT, I CAN...

This scholarship helps me toward my goal of becoming a PhD worthy scientist. I am working on my PhD in Biomedical Sciences; specifically, in the concentration of Biophysics. With this scholarship funds I can afford to purchase a computer and a large external hard drive to use to analyze the large amounts of data I am generating through my PhD work.

WHY I CHOSE TTUHSC...

Before I started my PhD, I spend a year working as a lab technician in a lab at TTUHSC. While the experience had it's challenging points, I found my greatest feeling of reward was when I was taking ownership of a project and working through the problems that arose. This helped push me to apply to schools to do my PhD. One of the reasons I stayed at TTUHSC was the sense of community I felt around me, and the comfortably I shared among everyone.
