

BRANDI MURPHY

SCHOOL OF HEALTH PROFESSIONS

BECAUSE YOU GAVE...

I have been enrolled in graduate schools since 2010. I completed my doctorate in Audiology in 2015 and continued to complete my Ph.D. in Communication Sciences and Disorders. Graduate school alone has many challenges; however, other financial obligations, such as children can make tuition difficult to pay each semester. It is opportunities like this that can assist in covering my last few semesters of tuition while also sharing my research interests with other future colleagues.

WITH YOUR SUPPORT, I CAN...

This scholarship will assist in covering summer tuition, one of my last semesters of graduate school. Thank you for your support and believing in students like me. You are truly making an impact on my life.

WHY I CHOSE TTUHSC...

I grew up in Lubbock and as a child I had always heard how the TTUHSC community and students were outstanding in academia, clinical experience, research, and has a friendly/caring environment. Over the years I have seen this community grow as well as personally becoming a part of TTUHSC. As I have continued throughout graduate school, I have been amazed at how the university stands face to face with new challenges and new fields to investigate. At TTUHSC professionals learn to collaborate and make best of current and future research while also giving patients and students excellent care and education.
