

YOUR *life* • OUR PURPOSE

JENNA GRANTHAM
School of Health Professions

BECAUSE YOU GAVE...

I would like to thank you for extending these scholarships to my fellow peers and myself. Your contribution to our education and future careers is immensely appreciated. Upon graduation the spring of 2021, I plan to continue my education and study Speech-Language Pathology at the graduate level. I hope to do this at Texas Tech University's Health Sciences Center. Ultimately, I plan to attend doctoral school and use my skills to work in a pediatric cranio-facial center. I was born with a cleft palate, and I want to use my personal experience to help and inspire other children like me.

WITH YOUR SUPPORT, I CAN...

In addition to using these funds for my tuition, I plan to use any left over funds for other education related expenses. All extra scholarship and grant funds are automatically deposited into my savings account, and they remain there until I need to use them for books or additional class resources. In addition, the scholarship awards themselves grant me in-state tuition, therefore relieving me the financial burden I would be facing without the awards.

WHY I CHOSE TTUHSC...

I come from a family of Texas Tech Graduates. Both my father and sister are Texas Tech Alumni, and I have always had a deep love for my Red Raiders. As the first person in my family to attend Texas Tech University Health Sciences Center, I am taking the opportunity to share some of the core policies and focuses the school teaches their students. I often talk about the school's focus on inter collaborative practices. I think it's important that we are being taught how to competently work with large groups of different healthcare professionals.
