

YOUR *life* • OUR PURPOSE

JENNIFER ALVAREZ
School of Health Professions

BECAUSE YOU GAVE...

Pursuing an advanced degree after starting a family has been extremely hard, yet very rewarding. My plans are to combine my nutritional knowledge with my new learned skills and information from the Healthcare Administration program at TTUHSC, to combat the obesity crisis that our nation is facing. I cannot thank the donors enough for the opportunity to chase my dreams and I look forward to the day that I can be the aid that someone else in my situation needs.

WITH YOUR SUPPORT, I CAN...

It is an honor to be a recipient of Fall 2020 scholarship funds for several reasons. Currently, I am a mother of three, wife, and full-time student and therefore, I have chosen not work full-time. For this reason, funds in our household are tight and we have been paying for my education with the help of student loans. These funds will help pay for a majority of my tuition for the upcoming semester and will help keep my student loan debt down.

WHY I CHOSE TTUHSC...

I was born and raised in Lubbock, so I have always had it in my heart that I would be a Red Raider. After receiving my bachelors in Nutritional Sciences through Texas Tech, I had the desire to further my career in the healthcare field but was unsure if it was the best decision for my family. The program directors at TTUHSC helped guide me through the process and reassured me (mostly through their own experiences) that balancing a family life and taking classes at TTUHSC was possible.
