

YOUR *life* • OUR PURPOSE

CALLIE FORT
School of Medicine

BECAUSE YOU GAVE...

I would like to thank you for this opportunity. The future of medicine is exciting, and as future physicians, we are in a wonderful position to be a part of progress in healthcare. I am passionate about creating innovative solutions to healthcare problems. This past year a colleague and I founded Sling Health, a student-led organization that provides students (i.e. medical, engineering, business) guidance and resources to formulate and launch their medical innovations. Fostering innovative thinking provides students with the correct framework that leads to careers full of innovative potential.

WITH YOUR SUPPORT, I CAN...

The scholarships that I received last year gave me the flexibility to pursue my academic research interests. For instance, I was invited to AHNS conference in Boston this Fall to present 3 of my projects. This scholarship freed up some of my finances to where I could attend and present my work.

WHY I CHOSE TTUHSC...

My parents and brother are all proud Red Raiders. They have spoken highly of the Lubbock community and Texas Tech. While my family was an influence, TTUHSC SOM is one of the more affordable schools in the country and maintains high academic standards. Most importantly, I feel at home here. From my initial interview day to now, I have felt continual support from faculty and fellow students. I have been extremely happy with my decision!
