

the **FUTURE** *of* **HEALTH**

TEXAS TECH UNIVERSITY  HEALTH SCIENCES CENTER™

NKEONYEASUA ANAM

School of Nursing

BECAUSE YOU *gave...*

I had been encouraged to enter nursing early in life but chose a different career path. I eventually found myself acting as a caregiver to family members and realized as I learned to give insulin and Lovenox shots that I could actually do. I went back to school and took the long path, completing an Associate degree in Science before obtaining my associate in Nursing degree and then my BSN. My husband experienced an emergency situation while we were out of state in California with DVT, and I did not become just his caregiver but an advocate for him.

WITH **YOUR SUPPORT, I CAN...**

I am so grateful for the honor of this scholarship, as it would allow me to complete my program without the added stress of taking out loans. It allows me to continue to work through my nursing residency while increasing my knowledge and experience without going into debt. I can consider volunteer positions to continue my advancements in the healthcare field. I chose TTUHSC because of the testimonials I heard from past students and the fact that I could proceed to the MSN program after my RN- BSN program, and it has been a great earning experience.

WHY I CHOSE *ttuhsc...*

TTUHSC has been a great learning curve for me as it challenges me to think outside the box and use my critical thinking skills. Coming into the program, I was still debating the critical thinking path of my nursing career, but the research work I have had to do in my little time at the school has made me better appreciate that nursing has a lot to offer in the research path as we continue to explore avenues to improve patient, family and community health. There is no end to the ways that nurses impact their communities.
