

the **FUTURE** *of* **HEALTH**

TEXAS TECH UNIVERSITY  HEALTH SCIENCES CENTER™

KADE ANCELL

School of Medicine

BECAUSE YOU *gave...*

Going into undergrad, I had always been interested in biology, so I chose to pursue a degree in biochemistry. While I had some interest in medicine as I enjoyed the application of science the field provided, it was not until I took up a job as a medical scribe that my love for medicine was realized. Being able to see the application of medicine working hand-in-hand with the human side of the field made me realize that this was my passion. Since, medicine has been my goal so that one day I can practice what I have seen.

WITH **YOUR SUPPORT, I CAN...**

Going into my fourth year of medical school, I have been learning of the multitude of new expenses that are about to come my way. These include paying for away rotation applications, traveling and housing for away rotations, interview traveling expenses, etc. This upcoming year causes a lot of financial anxiety, but having this scholarship has provided some peace of mind that I will carry into the fourth year of medical school.

WHY I CHOSE *ttuhsc...*

I have had multiple opportunities to utilize the amazing medical education I have been provided outside of the classroom, specifically in the form of volunteering in the community. TTUHSC has allowed me to take up roles in the community in serving the underserved through volunteering at the free clinic. Additionally, TTUHSC has allowed me to take up the role of an educator in the community by teaching Stop the Bleed to the community. I have come to learn that these opportunities have developed skills as a future physician that I will use for the rest of my life and career.
