BRAYDEN KEY

Jerry H. Hodge School of Pharmacy

BECAUSE YOU GAVE...

I chose this degree path after my grandmother was diagnosed with cancer. During her treatment we found out that there was a medication error with one of her prescriptions and she was receiving three times the intended dose that lead to complications in the future that were later solved. Pharmacists are one of the last resorts in preventing mistakes like these from happening and is where my interest in pharmacy really took off.

WITH YOUR SUPPORT, I CAN...

Receiving this scholarship has helped provide me peace of mind during the school year and for my future. These funds will allow me to put more time into studying for my classes and completing my coursework rather than having to work part-time to keep up with bills. By being able to focus more on my studies I will hopefully be a better pharmacist in the future after graduation by retaining our materials.

WHY I CHOSE TTUHSC...

My experiences inside of the classroom at TTUHSC has given me a lot of knowledge regarding pharmacy. The curriculum is very heavily based on gaining clinical knowledge and they do a great job at providing us resources and exercises to get myself and others thinking in that mindset. Outside of the classroom our faculty, staff, and classmates provide a great atmosphere to get to know one another that I don't think many other professional schools can do as well as TTUHSC. Getting to participate in different community clinics and give back to others has been very rewarding.
