## BECAUSE YOU GAVE...

I believe the human body is a fascinating work of art and I am honored that I get to receive a higher education that is dedicated towards learning about how we move, heal, and adapt to trauma. I will be the first in my family to both receive a doctoral degree and work in the medical field. Going through uncharted territory has been a challenging decision but I will continue to pursue PT with excitement and compassion.

## WITH YOUR SUPPORT, I CAN...

This scholarship has allowed me to solely focus on expanding my knowledge in physical therapy without feeling burdened by the necessary expenses. This has created more space for me to dedicate my time and energy towards learning and practicing clinical skills without managing a part-time occupation. I feel as if I am able to grow more as a future clinician when my main responsibility is my education.

## WHY I CHOSE TTUHSC...

My first year in the DPT program at TTUHSC was rigorous and challenging in more ways than one, but I have made it this far because of the continual support and encouragement from my faculty and classmates. Our professors are so intentional with each student and it is clear that their main desire is for us to be clinicians who are more than ready to treat each patient.
