

YOUR *life* • OUR PURPOSE
TEXAS TECH UNIVERSITY  HEALTH SCIENCES CENTER.

JASON DAVIS

School of Nursing

BECAUSE YOU GAVE...

I chose the mental health academic and career path because I have had a passion for mental health for many years. My father was an alcoholic and committed suicide when I was in my mid 20s. Back then I knew that he had substance abuse issues, but it was not until I started expanding my knowledge through academics at TTUHSC that I recognized there were clear signs prior to him taking his life. I plan on using my career to focus on educating both patients and families that suicide risks can be identified and prevented.

WITH YOUR SUPPORT, I CAN...

This scholarship allows me to work less and study more, which is most appreciated. I will have extra time to increase my knowledge and skills to better address mental health needs after graduation. I will use this time to complete additional clinical hours as well because my preceptors are excellent teachers and I learn best with hands-in experience.

WHY I CHOSE TTUHSC...

TTUHSC has provided an incredible experience because the faculty have extensive knowledge and experience. They share this valuable information with me and provide constructive criticism that motivates me and does not insult me or harm my self-confidence. I know this program is one of the best primarily by sharing my experiences with students of different programs. My conversations with them assure me that I will be much more prepared to enter practice and be successful upon graduation.
