School of Health Professions

BECAUSE YOU GAVE...

During the summer, I was able to sit in on a speech pathology appointment for a child that I nannied for. Sitting in on a few of these visits peaked my interests in this field and led me to think about what I really want to do with my career. Based on seeing his progress from those speech appointments, I was challenged with the question, "Is my current major challenging me the way I want to be challenged?".

WITH YOUR SUPPORT, I CAN...

If I had not received this scholarship my family would be in more financial stress. With my family making less income every year, this scholarship helps to relieve some of the stress that comes with working to afford monthly loan payments. This scholarship has allowed for me to apply and seek a degree in a field that I am very interested in.

WHY I CHOSE TTUHSC...

When becoming interested in the Speech Pathology Program at the TTUHSC building, numerous faculty reached and were extremely willing to answer any of my questions or point me in the right direction of who to get into contact with. Their assistance helped me to feel comfortable when applying for this program and seeking out this career path. From my first impression of the faculty, I have always felt welcomed.
