

KAMERYN SLAYTON

School of Health Professions

BECAUSE YOU GAVE...

During my senior year of high school, I was tasked with researching a "helping profession" and creating a presentation. I somewhat randomly (which I now realize was definitely for a reason) chose speech-language pathology and fell in love with the profession. I changed my plans of attending Texas A&M University to attend Texas Tech University where I could pursue a degree in speech, language, and hearing sciences. Since being accepted into the graduate program for speech-language pathology at the TTUHSC, I have realized more and more of God's faithfulness and how His plan has perfectly unfolded in my life.

WITH YOUR SUPPORT, I CAN...

This scholarship is one of the biggest blessings and answered prayers I could have ever received! I can now finish my last year in my master's degree program and reach my goal of graduating completely debt-free. Because of your incredible generosity, I can focus more of my time on my coursework, completing my master's thesis, and clinical externship experiences without the burden of finding ways to pay for my tuition. I am extremely grateful for your kindness and generosity and thank God for using you as a small part of my story in becoming a speech-language pathologist.

WHY I CHOSE TTUHSC...

There is absolutely no doubt in my mind that TTUHSC was the school for me. In my opinion, no other school offers the same incredible staff and faculty, hands-on learning opportunities, and variety of opportunities for involvement in research, student organizations, and leadership positions than the TTUHSC. I have had the opportunity to work as a research assistant, learn about and serve a variety of individuals throughout West Texas, and serve in numerous student organizations. These experiences have played a vital role in my personal and professional development and I could not be more thankful for my time at TTUHSC.
