

YOUR *life* • OUR PURPOSE
TEXAS TECH UNIVERSITY  HEALTH SCIENCES CENTER.

KELLY DIXON

School of Health Professions

BECAUSE YOU GAVE...

Good strong relationships have always been important to me and as a physical therapist I will have the opportunity to work closely and build deep connections with patients everyday. I am drawn to working hands on with my patients to help restore their movement and function. I am excited for a career where I can bring back joy to my patients through the little things in their life.

WITH YOUR SUPPORT, I CAN...

This scholarship is providing me with the opportunity to go to school and not have to worry as much about the financial aspect of my education. I know that I am in a very rigorous program that is going to help me become an amazing clinician. This scholarship is allowing me to work towards becoming the best clinician I can be by focusing on my course work more than the stress of not knowing how I am going to pay for my education.

WHY I CHOSE TTUHSC...

Being a part of the TTUHSC DPT program has allowed me to grow into the person I am today. One of the most important things I have learned about is interprofessional work. I am constantly learning from everyone around me in school. Everyone has a different set of skills, knowledge, and viewpoint and I want to continue to listen and learn from those around me throughout school and in my future career because I know this will help me to best serve my patients.
