## BECAUSE YOU GAVE...

I discovered audiology by taking American Sign Language as my foreign language in high school. We had a substitute teacher one day and we had to write an essay over a video that we watched in class. This video explained the ways in which one can have hearing loss and how it can be adjusted to make one hear better. I always wanted to go into healthcare of some sort, but after watching that video I knew exactly what I wanted to do. I wanted to become an audiologist.

## WITH YOUR SUPPORT, I CAN...

This scholarship truly means a lot to me. This scholarship will help me purchase the required books for my classes so I can succeed. With having my books paid for, I can save my money that I earn to save for graduate school so that I can eventually become an Audiologist.

## WHY I CHOSE TTUHSC...

Through my friend, I have learned how much audiologists impacts Deaf/Hard of Hearing individuals. My friend was diagnosed with moderate hearing loss and uses hearing aids to improve her hearing. I have seen how her use of hearing aids allowed her to finally hear the little things in life we all take advantage of, like hearing a bird chirp or rain pouring on your roof. I want to be able to help people experience the things we all take advantage of.
