School of Health Professions

BECAUSE YOU GAVE...

I chose my career path because I wanted the opportunity to influence people and their lives positively. I knew occupational therapy would give me this opportunity every day and present me with opportunities for my character and professional development. I believe that people can have a better overall quality of life when their health and well-being are taken care of in all aspects of life. I chose occupational therapy because of the holistic approach the profession takes to treat someone.

WITH YOUR SUPPORT, I CAN...

This scholarship will decrease my financial burdens as I am working through my clinical experiences in my TTUHSC Doctorate of Occupational Therapy Program. This scholarship will allow me to devote more time to my clinical experiences and general academic career. With the scholarship, I won't need to devote as much time to financial burdens and can spend that time at my clinical site. It will give me more time to invest in researching diagnoses and evidence-based interventions to provide my patients with the best possible care.

WHY I CHOSE TTUHSC...

Some of the best things I have learned both inside and outside of the classroom is that I have the opportunity every day to connect with people. I have learned that providing people the opportunity to increase their health and well-being is one of the most rewarding feelings. I have learned that I have an incredible support group including both professors and my classmates. TTUHSC has given me and taught me all the valuable lessons that have and will help shape me in my future career. It is important to me because it is helping me grow as a person.
