# SHATTER THE STIGMA

*An Interprofessional Simulation with Standardized Patients*

**July 23, 2021 | 9:00AM—12:30PM (Virtual)**

Because healthcare professionals are typically the first points of contact for a person with a *substance use disorder* (SUD), we should all take the necessary steps to reduce the potential for stigma and negative bias. Take the first step in shattering the stigma of SUDs by learning and practicing the use of destigmatizing patient interviewing techniques with standardized patients.

## FEATURING

- *Lucas Hill, PharmaD, BCPS, BCACP* – Keynote presentation on SUDs and harm reduction strategies
- *Zach Sneed, PhD, LCDC, CRC* – Destigmatizing the patient interview in SUDs
- Small group interprofessional simulation with standardized patients
- Large group debrief
- *Stacy Hobbs, APRN, PMHNP, BC* – a personal story of recovery and hope
