# ClinicalKey®

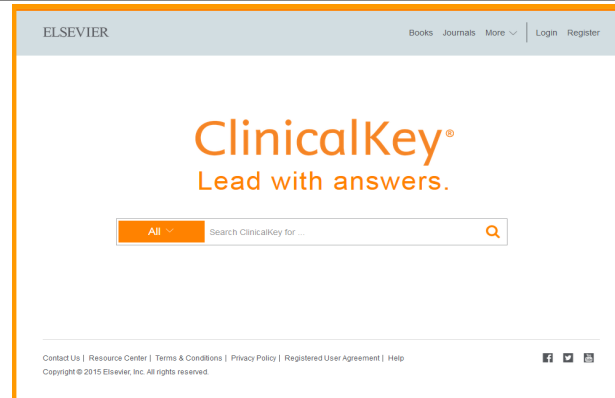

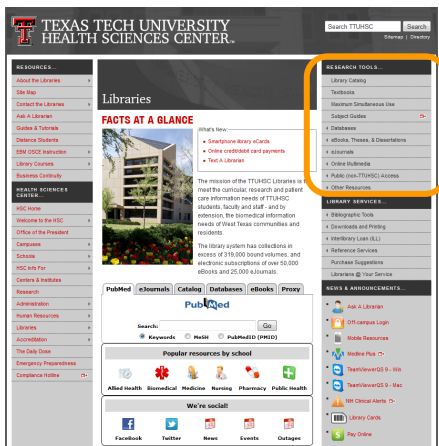

## An Introduction to the Database

# Navigating ClinicalKey

## How to Get There

To access ClinicalKey from the library website, locate the tab on the right side of the page called “Databases” (under “Research Tools”). Mouse over the tab. ClinicalKey will be one of the options in the list that appears.

## Searching with ClinicalKey

Searching ClinicalKey is easy! Simply type in the subject of your search, then select the resource you want from the orange box to the left of the search box. Available options are results from First Consult, journal articles, book excerpts, drug monographs, and more!

ClinicalKey also gives you the opportunity to register with the database for free additional resources such as saving searches, creating reading lists or presentations, and more!

## Search Results and First Consult

When you search for a topic in ClinicalKey, you have the option of viewing results from a tool called “First Consult”. To do this, select it from the orange box to the left of the search box, then search for your topic.

First Consult is ClinicalKey’s evidence-based point-of-care resource, replacing MD Consult. The information found here is gathered from sources such as the Cochrane Collaboration, the U.S. National Guideline Clearinghouse, and other reputable institutions.
