

Quick Start Guide

Knowledge Unbound.

WELCOME TO EBRARY®!
BELOW ARE A FEW STEPS TO
HELP YOU GET STARTED.

1. **Conduct a search** using simple or advanced, by keyword, full-text, publisher, author, and more. View results ranked by book or chapter.
2. **Open a book** by clicking on the title name or jacket. No downloads or installations are required.
3. **Explore the document** by navigating to search terms, searching for key words, jumping to relevant chapters, and flipping through pages.

The screenshot shows the Ebrary search interface. At the top, there are tabs for 'Info', 'Search', 'QuickView', and 'Bookshelf'. The 'Search' tab is active. A search bar contains the text 'global warming'. To the right of the search bar is a 'Search ebrary' button. Below the search bar, there are two rows of search criteria: 'Search in' with a dropdown menu set to 'Title' and a text box containing 'global warming', and '... and in' with a dropdown menu set to 'Subject' and a text box containing 'Climatic Changes'. Below these are two rows of checkboxes for 'Focus your search using:'. The first row has a radio button selected for 'Any of the selected subjects (e.g. Math OR Science)'. The second row has a radio button for 'All of the selected subjects (e.g. ...'. Below these are three columns of checkboxes for various subjects: Environmental Aspects, Popular Works, Greenhouse Gas Mitigation, Research, Paleoclimatology, Environmental Protection, Economic Aspects, Social Aspects, Southeast Asia, Government Policy, Holocene, and Effect Of Human Beings On. Below these is another 'Search ebrary' button. At the bottom, it says 'Showing 1 - 4 of 4 documents' and 'Sort results by: Relevance | Title | Contr'. A red box highlights the search results area, which includes a book cover for 'Global Warming : The Complete Briefing' by Houghton, John, published by Cambridge University Press in 2009. The subjects listed are CLIMATIC CHANGES and GLOBAL WARMING. Below the book cover is a table of contents with a 'Rank' column and a 'Chapter' column. The chapters are: Contents, Preface, 1 Global warming and climate change, 2 The greenhouse effect, 3 The greenhouse gases, 4 Climates of the past, 5 Modelling the climate, 6 Climate change in the twenty-first century and beyond, and Emission scenarios. A red box highlights the table of contents area. A red circle with the number 1 points to the search bar. A red circle with the number 2 points to the book cover. A red circle with the number 3 points to the table of contents. A red circle with the number 4 points to the 'Search ebrary' button.

4. **Highlight, take notes, and transform text into hyperlinks** to other online resources. Highlight with or without notes attached in multiple colors. Create a personal bookshelf (if needed) to save and organize your research.

5. **Use InfoTools** to link to other online resources. Simply select words of interest in a document.

6. **Copy and paste text, and print pages and chapters**, with automatic citations that include URLs back to the source.

7. **Manage and share your research** by dragging books, highlights and notes into bookshelf folders, which can be emailed to peers.

8. If your institution offers ebrary's Plug-in or Unity Reader, which offer added functionality, launch it by **clicking on the ebrary Reader button**.

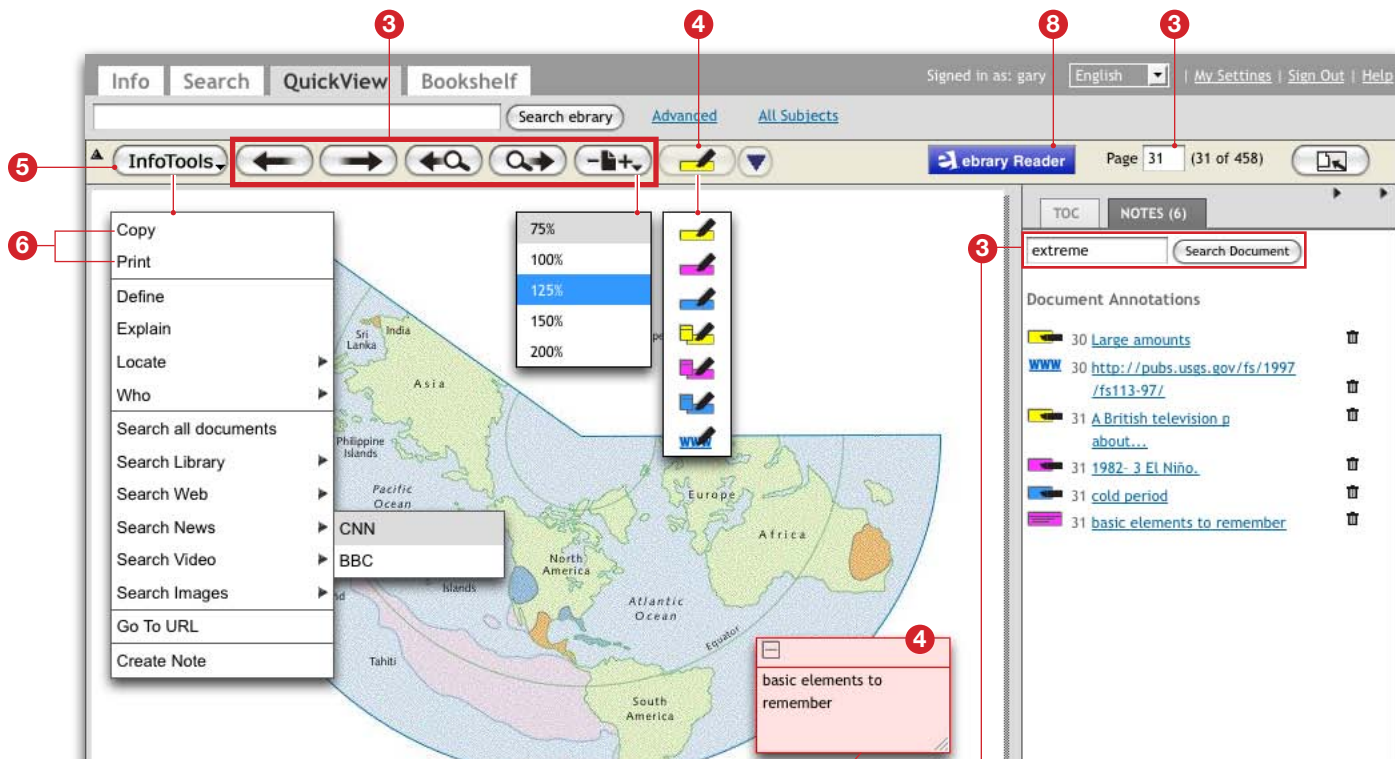

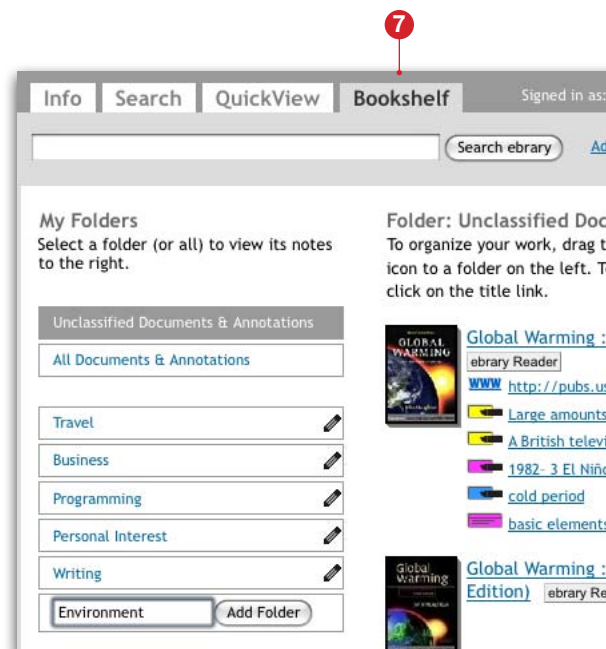

Figure 1.4 Regions where droughts and floods occurred associated with the 1982-3 El Niño.

But the question must be asked: how remarkable are these **extreme** events that I have been listing? Do they point to a changing climate due to human activities? Here a note of caution must be sounded. The range of normal natural climate variation is large. **Climate extremes** are nothing new. Climate records are continually being broken. In fact, a month without a broken record somewhere would itself be something of a record!

Many of us may remember the generally **cold period** over large areas of the world during the 1960s and early 1970s that caused speculation that the world was heading for an ice age. **A British television programme about climate change called 'The ice age cometh'** was prepared in the early 1970s and widely screened - but the cold trend soon came to an end. We must not be misled by our relatively short memories.

One of the largest volcanic eruptions in the twentieth century was Mount Pinatubo in the Philippines on 12 June 1991 which sent tonnes of sulphur dioxide into the stratosphere together with a large amount of dust. This stratospheric dust caused spectacular sunsets around the world for
