ORIGINAL ARTICLE

Zika Virus and the Blood Supply

P. Saá and Others

With the emergence and rapid dissemination of Zika virus, efforts to protect the U.S. blood supply were developed on both the diagnostic-test and implementation fronts. Over a 15-month period in 2016 and 2017, the results of testing more than 4 million donations were assessed.

PERSPECTIVE

The End of Nuclear Weapons or the End of Us?

L. Forrow, T. Ruff, and S. Thurlow

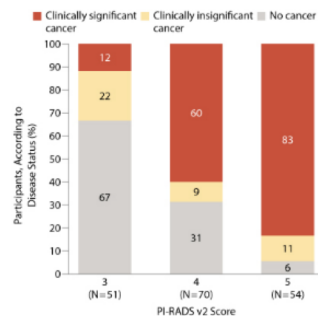

Despite decades of advocacy by physicians and others, a nuclear strike remains only a computer malfunction, other human or technical error, or military escalation away.

SOUNDING BOARD

Zika Virus and Blood-Product Safety

E.M. Bloch and Others

The rapid emergence and dissemination of Zika virus across the Americas over the past 2 years has aroused serious concern regarding the safety of blood transfusion. The authors discuss the challenges associated with securing blood-product safety.

CASE CHALLENGE

An 83-Year-Old Woman with Nausea, Vomiting, and Confusion

An 83-year-old woman presented with confusion, weakness, and vomiting, which began after an upper respiratory infection.

What is the most likely diagnosis? Vote and comment. Find the answers in the full text of the case, to be published on May 17. On Twitter use #NEJMCases.

ORIGINAL ARTICLE

Pembrolizumab (Anti-PD-1) Adjuvant Therapy for Melanoma

A.M.M. Eggermont and Others

A blinded trial involving patients with resected stage III melanoma showed that adjuvant pembrolizumab every 3 weeks for a year was associated with a 1-year recurrence-free survival rate of 75%, as compared with 61% for placebo.
