General Information

The LibGuide, *Resources for Residents* provides information about valuable medical information resources that will help in your daily decision making. Tabs are organized first by general tools needed by all physicians regardless of specialty. These are followed by databases, tools, apps, and full-text textbooks designed for a specialty. Next are links to test review databases. Last but not least, is information on *EndNote* (for writing and publishing) and *Tips for Conducting a Systematic Review*. Click on the labeled tabs above.

I) Journal literature databases:

PubMed (from the National Library of Medicine) articles from over 5,600 international biomedical journals

Embase (of 8,500 indexed journals, 2,900 are unique to Embase)

(premier database for pharmacology; also has European, Asian, and African biomedical literature)

II) Evidence-Based Medicine:

Brief overview and a tutorial

Links to: *PubMed's Clinical Queries* and *PubMed's Comparative Effectiveness Research*

easy search engines to quickly locate EBM literature in PubMed

EBM Point of Care Tools: Clinical Key, Dynamed, and Essential Evidence Plus

can be used at the patient's bedside or "point of care"; available as mobile apps

Cochrane Collaboration and the *Cochrane Databases* expert databases containing EBM information

free Practice Guidelines from Guideline.gov

III) Drug Information:

Overview

Ask-A-Librarian

There's so much information! Where do I start???

Do you need background information such as:

an overview on management of disease and treatment?

If so, use any of the following:

an ebook from one of the Access Products or Clinical Key

a point-of-care tool such as:

Dynamed, First Consult (in Clinical Key), or
Essential Evidence Plus

Do you need information for a *specific problem*? Such as a patient with a unique problem?

If so, use any of the following:

- do a search in PubMed and/or Embase
- use any of the special tools listed in the *LibGuide: Resources for Residents*

Resources- Top 5

CURRENT ISSUE 1523 June 19, 2017
Abaloparatide (Tymlos) for Postmenopausal Osteoporosis

The FDA has approved abaloparatide (*Tymlos* – Radius Health), a synthetic analog of human parathyroid hormone related peptide, for treatment of postmenopausal women with osteoporosis who are at high risk for fracture. Abaloparatide is the second parathyroid hormone receptor agonist to be approved for this indication; teriparatide (*Forteo* – Lilly), a recombinant parathyroid hormone analog, was the first. They are the only drugs approved for treatment of osteoporosis that stimulate bone formation. Other drugs used for this indication inhibit bone resorption.

ACTIVITY – Given continuously, human parathyroid hormone has a catabolic effect on bone, but when it is given once daily in low doses, bone formation predominates. Abaloparatide, like teriparatide, increases bone mineral density (BMD) and bone formation markers.

CLINICAL STUDIES – FDA approval... [Continue reading](#)

FROM ISSUE 1522 **Ocrelizumab (Ocrevus) for MS**

The FDA has approved ocrelizumab (*Ocrevus* – Genentech), a humanized anti-CD20 monoclonal antibody, for treatment of adults with primary progressive or relapsing multiple sclerosis (MS). It is the first anti-CD20 monoclonal antibody to be approved for treatment of MS and the first disease-modifying drug to be approved in the US for primary progressive MS.

STANDARD TREATMENT – Most patients with MS present with the relapsing-remitting form of the disease. About 10-15% have the primary progressive form, which is characterized by worsening ...

The screenshot shows the LactMed website, a database for drugs and lactation. The header includes the NIH logo, "U.S. National Library of Medicine", and "TOXNET TOXICOLOGY DATA NETWORK". Navigation links for Mobile, Help, FAQs, TOXNET Fact Sheet, and Training Manual & Schedule are present. The main content area features a search bar with the example text "e.g. sertraline, SSRIs" and a "Search" button. Below the search bar are dropdown menus for "Search Term" (singular/plural), "Records with" (all of the word), and a checkbox for "Include Synonyms and CAS Numbers in Search". To the right of the search bar are links for "BROWSE LACTMED" and "ADVANCED SEARCH". A "Support" sidebar on the right lists resources like LactMed App, LactMed Record Format, Database Creation & Peer Review Process, Help, Fact Sheet, Sample Record, TOXNET FAQ, Glossary, About Dietary Supplements, Breastfeeding Links, and Get LactMed Widget. It also provides contact information: Email: tehip@tehi.nlm.nih.gov, Telephone: (301) 496-1131, and Fax: (301) 480-3537. The main content area has two columns: "About LactMed" and "Did you know". The "About LactMed" section explains that the database contains information on drugs and chemicals to which breastfeeding mothers may be exposed, including levels in breast milk and infant blood, and possible adverse effects. It also mentions that data are derived from scientific literature and fully referenced, and that a peer review panel reviews the data to ensure scientific validity and currency. The "Updates" section states that LactMed is updated monthly. The "Did you know" section includes a question mark icon and asks "How do I lease/license the TOXNET databases?". It lists the following TOXNET databases available for lease: ChemIDplus, DIRLINE, CCRIS, GENE-TOX, HSDB, and TOXLINE. It also provides a link for further information: "Leasing Data from the National Library of Medicine". A "More FAQs" link is also present. The footer includes links for About, Contact Us, SIS Home, Copyright, Privacy, Accessibility, Viewers and Players, and the address: U.S. National Library of Medicine 8600 Rockville Pike, Bethesda, MD 20894, National Institutes of Health, Health & Human Services.

About LactMed

What is LactMed?
The LactMed® database contains information on drugs and other chemicals to which breastfeeding mothers may be exposed. It includes information on the levels of such substances in breast milk and infant blood, and the possible adverse effects in the nursing infant. Suggested therapeutic alternatives to those drugs are provided, where appropriate. All data are derived from the scientific literature and fully referenced. A peer review panel reviews the data to assure scientific validity and currency.

Updates: LactMed is updated monthly.

Did you know

How do I lease/license the TOXNET databases?

The following TOXNET databases are available for lease: ChemIDplus, DIRLINE, CCRIS, GENE-TOX, HSDB, and TOXLINE.

Childhood Epilepsy Does Not Translate to Increased Psychiatric Burden in Adults

Reconciling Personal Beliefs With Professional Duty

CME

The American Psychiatric Association (APA) provides educational programs to assist APA member and non-member psychiatrists at all levels of their profession. These services are designed to advance clinical and practice management skills and promote quality patient care.

Congratulations to the American Journal of Psychiatry!

AJP Garners Largest Share of Top 2015 Clinical Research Studies

The New England Journal of Medicine's Journal Watch Psychiatry has announced its list of the 10 most clinically important psychiatry research articles of 2015. Four of the 10 were published in *AJP*. No other journal published more than one of the selected studies. The four *AJP* articles are:

- Comprehensive Versus Usual Community Care for First-Episode Psychosis: 2-Year Outcomes From the NIMH RAISE Early Treatment Program, John M. Kane, M.D., et al.
- Citalopram, Methylphenidate, or Their Combination in Geriatric Depression: A Randomized, Double-Blind, Placebo-Controlled Trial, Helen Lavretsky, M.D., et al.
- Is Adult ADHD a Childhood-Onset Neurodevelopmental Disorder? Evidence From a Four-Decade Longitudinal Cohort Study, Terrie E. Moffitt, Ph.D., et al.
- Risk of Postpartum Relapse in Bipolar Disorder and Postpartum Psychosis: A Systematic Review and Meta-Analysis, Richard Wesseloo, M.D., et al.

Sport Discus

Sports Medicine Orthopedic Surgery

The screenshot displays the EBSCOhost SPORTDiscus search interface. At the top, there are navigation links: Sign In, Folder, Preferences, and Languages. Below this is a blue header bar with tabs for New Search, Publications, Thesaurus, Cited References, and More. The main search area features the EBSCOhost logo and a search bar containing 'acl reconstruction'. To the right of the search bar are buttons for 'Search' and 'Clear', along with a 'Choose Databases' link. Below the search bar are three rows for advanced searching, each with an 'AND' dropdown, a text input field, and a 'Select a Field (option...)' dropdown. Below these are links for Basic Search, Advanced Search, and Search History. On the left side, there is a 'Refine Results' section with a 'Current Search' dropdown showing 'acl reconstruction' under 'Boolean/Phrase'. Below this are 'Limiters' for 'Full Text' (checked) and 'English Abstract Available'. Further down is a 'Limit To' section with checkboxes for 'Full Text', 'References Available', and 'English Abstract Available'. At the bottom of this section are date range inputs for '1981' and '2017'. On the right side, the search results are displayed. The top line shows 'Search Results: 1 - 50 of 1,332'. Below this is a list of results, with the first result titled '1. THE ASSOCIATIONS BETWEEN HIP STRENGTH AND HIP KINEMATICS DURING A SINGLE LEG HOP IN RECREATIONAL ATHLETES POST ACL RECONSTRUCTION COMPARED TO HEALTHY CONTROLS.' The result includes a thumbnail of a document, the author 'Tate, Jeremiah; Suckut, Tell; Wages, Jensen; Lyles, Heather; Perrin, Benjamin', the journal 'International Journal of Sports Physical Therapy Jun2017, Vol. 12 Issue 3, p341 (English Abstract Available)', and a list of subjects: 'KNEE physiology; HIP joint physiology; ANTERIOR cruciate ligament surgery; EXERCISE tests; KINEMATICS; ADDUCTION; MUSCLE contraction; MUSCLE strength; ABDUCTION (Kinesiology); MOTION capture (Medicine); CORRELATION (Statistics); PROBABILITY theory; T-test (Statistics); CROSS-sectional method; DESCRIPTIVE statistics'. At the bottom of the result are links for 'PDF Full Text' and 'Save PDF to Cloud (1.1MB)'.

Videos of Surgical Procedures

This page provides links to prerecorded webcasts of surgical procedures. These are actual operations performed at medical centers in the United States. Please note that you cannot send in questions by email, though the webcast may say that you can, because you are not seeing these videos live.

The videos are in Flash format. You will need Flash Player to view the programs. You can download Flash Player for free at www.adobe.com/products/flashplayer.

The videos open in a second window. If you have a pop-up blocker, you will need to disable it to view the programs.
