SCHOOL OF ALLIED HEALTH

The School of Allied Health was officially approved for funding by the 67th Legislature in 1981. This followed a period of development beginning with its initial approval by Coordinating Board, Texas College and University System in 1973.

The first students were admitted as freshmen to baccalaureate programs in physical therapy in the fall of 1982. In the fall of 1983, freshmen were admitted to baccalaureate programs in medical technology and occupational therapy as well. Also in 1983, upper division, professional level, transfer junior students were admitted. Furthermore, students were admitted to coordinated degree programs in occupational therapy and physical therapy offered at the Regional Academic Health Center in El Paso, in conjunction with the University of Texas at El Paso.

Coordinated degree programs in medical technology, occupational therapy, and physical therapy are being considered at the Regional Academic Health Center in Amarillo in conjunction with Amarillo College and West Texas State University.

Programs in medical technology, occupational therapy, and physical therapy are anticipated in Odessa, for the Permian Basin, through affiliated degree programs. Agreements for "2+2" progression of students through two-year colleges and the School of Allied Health are planned for the coming years. Students take pre-professional courses at the community college. This course allows students to be eligible to apply for the two-year professional level sequence at the Texas Tech University Health Sciences Center School of Allied Health.

Today, the School of Allied Health, as an organizational entity within Texas Tech University Health Sciences Center and Texas Tech University, implements institutional purposes and goals within the context of allied health philosophies and objectives. The School of Allied Health provides innovative and flexible programs with cost-effective quality education for a maximum number of people in the area. In addition, the School of Allied Health most importantly provides the society with graduates who will implement current innovative service policies as well as quality health care to the community.

SCHOOL OF MEDICINE

With its headquarters nestled in the heart of the South Plains, Texas Tech Health Sciences Center is a dynamic and flourishing institution with positive and growing impact throughout the state and Southwest. Mandates for the School of Medicine are to provide quality medical education, to address problems of health care delivery in rural areas, and to develop programs throughout West Texas with an emphasis on primary health care.

During the first two years of study, which consists almost entirely of basic sciences, all medical students attend the Lubbock campus. Many of these students remain in Lubbock for their third and fourth years. Clinical experience is provided by affiliation with Lubbock General Hospital (the primary teaching hospital), St. Mary's Hospital, and community clinics.

Lubbock General Hospital in Lubbock

William Beaumont Army Medical Center in El Paso

After the first two years, students may complete their education at the Regional Academic Health Center in El Paso. Third and fourth year medical students participate in clinical clerkships in Family Medicine, Internal Medicine, Obstetrics and Gynecology, Orthopaedic Surgery, Pediatrics, Psychiatry, and Surgery. These clinical experiences are provided through affiliation with R.E. Thomason General Hospital (the primary teaching hospital), and are augmented through affiliation with William Beaumont U.S. Army Medical Center and other community hospitals and facilities.

Approximately one-third of the third and fourth year students elect to attend the Texas Tech Regional Academic Health Center in Amarillo. Clinical experiences are provided through affiliations with Northwest Texas Hospital (the primary teaching hospital), the Psychiatric Pavilion, High Plains Baptist Hospital, St. Anthony's Hospital, Veteran's Administration Medical Center, Killgore Children's Psychiatric Center and Hospital, and Don and Sybil Harrington Cancer Center, and the Bi-County Health Department.

The center is also a base for coordination of rural and urban preceptorships in clinics and private practices throughout the Panhandle region.

Texas Tech Regional Academic Health Center in Amarillo

SCHOOL OF NURSING

The School of Nursing was officially approved for funding by the 67th Legislature and Governor William P. Clements in 1981. This followed a period of development beginning with its initial approval by the Coordinating Board, Texas College and University System, in 1975 and approval for program development by the Board of Nurse Examiners for the State of Texas that same year. The Continuing Nursing Education Program of the Health Sciences Center, initiated in 1979, became an element of the School of Nursing in the fall of 1981. The first students were admitted to the baccalaureate degree program of the School of Nursing in the fall of 1981. This marked the initiation of curriculum designed to admit students with no previous nursing course work, Licensed Vocational Nurses and Registered Nurses into a program culminating in the Bachelor of Science in Nursing degree.

The School of Nursing, formerly located in Thompson Hall on the main campus of Texas Tech University, moved during the 1985-86 Academic year to its present location in the Texas Tech University Health Sciences Center Building. The Permian Basin campus of the School of Nursing began accepting students in the fall of 1985 with plans to expand in the future.

Although changes in methods and techniques may occur, the unique component of the practice of nursing remains the provision of care. Provision of care, nursing, is the process of assisting individuals, families or other groups to meet basic human needs in order to maintain a desired state of health. This emphasis on care is in contrast to the emphasis on cure, which is the focus of other health disciplines. The School of Nursing at TTUHSC is committed to providing high quality nursing educational programs that contribute to the availability and quality of health care services in West Texas.

*Dear Dalley, Dear Dalley,
My nerves are all shot,
I did my dissection,
Fascia's all that I got.
The Phrenic is broken,
The Vagus is cut.
The Gluteus maximus
Is a pain in the butt!*

Signed Students

*Dear Seliger, Dear Seliger,
You told us the score.
We dare not come in
After you closed the door.
When lecture has started
And we're in the hall,
We bi-pass the door,
And don't come in at all.*

Signed Students

John A. Yee, Ph.D.
Associate Professor

*Dear Students, Dear Students,
You have no complaint.
A hacker you are
And a surgeon you ain't.
So listen up students
And listen up good,
Quit cutting up bodies
Like your cutting up wood!*

Signed Dalley

*Dear Students, QUIET
STUDENTS!
You're blowing my mind.
All of your questions
Have got us behind.
One thing I have taught you
You may have forgot
It's man that classifies,
Nature does not.*

Signed Tough Nuggies

*Dear Teachers, Dear Teachers,
Now don't get us wrong.
It's really an honor
To be in our song.
In just three short years
All M.D.'s we will be.
But don't think for a minute,
That we'll treat you for free!!*

Signed Students

BIOCHEMISTRY

S. Sridhara, Ph.D.
Associate Professor

*Dear Barker, Dear Garner,
You both are so smart.
Your drawings and pictures
Could be called works of art.
We tried hard to follow
Each theme of each class.
But in spite of our efforts,
Your tests still kicked our ____!
Signed Students*

*Dear Students, Dear Students,
Now listen up good.
Let's get the facts straight,
Pay attention, "if you would."
You say that you study
With style and with flair
But we know the difference,
Even say "Oh contraire!"
Signed the Biochem Boys*

Associate Professor

Alan Rafferty, M.D.
Associate Professor

One day a couple of surgeons were demonstrating a cholecystectomy down in the anatomy lab. It was as easy demonstration and the gall bladder was readily removed. The gall bladder itself was very green, malformed and demonstrated other characteristics that undoubtedly resulted from post-mortem treatment. The surgeons becoming bored with the procedure used the gall bladder as a spring-board for levity. As the jokes were flying, one surgeon suggested that they should send it to pathology for a report. In their jovial state this seemed a wonderful idea, so they bottled the specimen and sent it off. In just a short while the results came back: "This individual is beyond repose and undoubtedly cannot be saved by the surgeons, and furthermore, the cause of death cannot be determined from this specimen. In any case this individual is fortunate that he or she must not bear witness to such ill humor."

Dale F. Rector, M.D.
Associate Professor

Ruc Manh Tran, M.D.
Assistant Professor

PHYSIOLOGY

Michael T. Kopetzsky, M.D.
Professor and Chairman

Maurice F. Crass, Ph.D.

Professor

As a freshman I really didn't know what to write about the internal medicine faculty. I tried asking sophomores, juniors, seniors, and even residents ... nobody could come up with any anecdotes, stories or lyrics. As a matter of fact, the only words that came to peoples' minds were "pain, misery and misfortune." My class then moved to the topic of renal physiology, found out about pain, misery and misfortune as only Dr. Kurtzman can do. He is the only lecturer we had that could get a "sympathetic reaction" from us. Some even went into shock. Once one gets use to Kurtzmans' style, it is only the material that is intimidating. As for the other faculty members that I have come to know, they

Bruce M. Wimer, M.D.
Associate Professor

have put me into a negative salt balance. Through these people I can see that there is an ominous amount of material that one must learn to be in internal medicine. A student has to ask himself, "how did they get so smart?"

"Boy, do I need a break!"

"Are we MS III's yet?"

"I really don't think you are hearing what I'm saying ..."

The first TTUHSC School of Medicine Sophomore Transition Convocation was held on May 23, 1986 as a celebration marking the successful completion of two years of basic science studies. The ceremony provided an opportunity for students and faculty to meet together one last time before the Class of '88 was divided and moved on to their respective campuses.

The speaker for the evening was J. Thomas Hutton, M.D., Ph.D, who addressed the future of medicine and what we have to look forward to as physicians. He also attempted to calm some of our fears as we enter a new, exciting phase of our medical training. Awards were then presented to outstanding students and faculty for the past two years. And finally, the "new MS III's" were accepted to their regional academic centers by representative faculty.

The convocation marked the end of a long two years of frustration and hard work with what often seemed like minimal reward. However, we have succeeded thus far and will continue to do so with dedication and perseverance. Above all the struggle, though, let us not forget the friendships that have been developed and strengthened through the difficult times. For, even though we will soon forget the less than desirable test grades and the often insurmountable pile of notes we did not think possible to learn, the memories of good friends and good times will stand the test of time.

So, until we gather again as "real doctors" in 1988, good luck and ... On to the clinics!

Go, fight, win and then smash it down their throats.

My freshman year. What a frightening experience. The only time I can remember nearly soiling my pants, other than my fourth birthday party, was the day "THE LETTER" came in the mail. Little did I know what I was about to get myself into in my up and coming educational experience.

It amazes me to think back at how many stupid questions I could think of to ask anyone even remotely associated with medical school. It also amazes me how many conflicting answers I got. I have since realized that medical school is sort of like giving birth, or paper cuts; just something you have to experience to understand. How could anyone prepare me to increase my vocabulary 3,000 fold and include in it words like "holy homunculus" or "schleibdidagle beezee?" No one could have said anything to spoil my anticipation of gross anatomy lab, although Dr. Dalley did come close when he told us about the levator labii superioris alequi nasi muscle in his introductory lecture.

When school began, my need to ask so many questions faded, and in its stead came blissful and ever-so-easily made adjustments to med school life. I quickly discovered that they had given us a new breed of instructors, whom upon learning that I was ill, asked me if I had been visited by one of the Rhea sisters. (You know- Dia, Gona, Seba, Steat, and Mena. And these guys are doctors?) What's more, even the students were different: Rambo with a pipe, a guy from GQ Magazine, a poor soul with five kids, a professional beach bum, and one guy with nothing but gray hair! What happened to the all American medical student? My image of school was shot, and I had no where to turn except to myself. So, with the rest of the class, I ran for class office. (I really wouldn't have felt so bad about losing if the secretary hadn't laughed so hard when I asked her how many votes I got.) Finally, with the

formalities tucked away, the academics began, and my four years of undergraduate endeavors had paid off. I was then privileged to begin four years of sadistic slavery.

The first test I ever failed in medical school was the personality profile at the beginning of the year, but I didn't have a chance to study for that one. Studies, what a pain. I wish I had a dollar for every time I got up from my books only to find that half of my blood had pooled to my legs and my buns had fallen asleep. That part of school, tests and studies and such, never did make it real big on my "fun things to do" list. They say we had a Christmas break, but I'm still skeptical.

I guess it was the latter part of the second semester when I realized how fortunate I really was, despite the hemorrhoids. I've made more real friends in the previous few months than I had ever imagined possible. These people genuinely care for me as a person, and are there to share the good times and the bad. It's amazing, suddenly there are no more sociologic misfits, just worthy people. People that I respect and love.

I will hang on to the moments of insanity forever and smile in recollection. When I think of my freshman year, I'll first remember the folks, those who made that year one of the most special years of my life.

Oh, shore George, that's what an inguinal hernia looks like.

"My friends call me Mel."

CHRISTIAN MEDICAL SOCIETY

Within an interdenominational framework and without strong religious organizational affiliations, the Christian Medical Society seeks to provide support and encouragement to persons in all areas of the medical profession. Our membership includes students, residents and practicing physicians all dedicated to serving God in their practice of medicine. A spin-off of the organization geared toward meeting the needs of spouses was started this year in an effort to provide extra support to the families of our members.

The 1985-86 school year was a very exciting and growing year for the CMS. Our meetings were moved from the Health Sciences Center Building to physicians' homes providing students with the opportunity to become acquainted with practicing M.D.'s. With this move our group grew to as many as 45 members. We also had various speakers

throughout the year addressing such topics as abortion and medical missions, as well as leading in bible studies and personal testimonies.

We were also able to send five first year medical students to the annual Student Leadership Conference in Dallas where they met with students from other Texas medical schools. By building on the success of the past year and with new ideas of leadership for next year, the CMS promises to offer exciting opportunities for students looking for growth and support in medical and spiritual lives.

Christian Medical Society 1985-86 Officers:

*President: Jim Higgins
Vice President: Mike Edwards*

FAMILY PRACTICE STUDENT ASSOCIATION

The Family Practice Student Association strives to expose students to the specialty of family medicine and to increase their awareness of the activities of the family physician.

In addition to monthly meetings, the FPSA sponsored a CPR course for medical students, established family practice "mini-libraries" in Amarillo, El Paso, and Lubbock, and sponsored a party during orientation week.

Many students took advantage of the preclinical preceptorship program, spending a month with private family physicians around Texas.

The annual Family Practice Residency Day was one of the most popular yet with 17 residencies from across the state coming to recruit students.

The FPSA sent four representatives to the National Conference of Student Members in Kansas City where they gathered information to share with the rest of the organization. Two members attended the Texas Academy of Family Physicians Interim Session where Tech was elected to represent all the Texas medical schools at the next National Conference.

PEDIATRIC CLUB

Pediatric Club was organized last year to provide an opportunity for students to become more familiar with the specialty of pediatrics and opportunities in the field.

Guest speakers present current pediatric issues and topics at semimonthly luncheons hosted for the students by the Department of Pediatrics. Students can gain first-hand professional experience by interacting with physicians in various areas and work situations, such as work rounds and on-call duties. Students have the opportunity to serve as counselors for a summer diabetic camp. Pediatric Club provides information and recommendations for

preceptorships in pediatrics, and also helps prepare students for pediatric residencies.

This year the Pediatric Club completed a special Valentine's Day project for the children on Lubbock General Hospital's pediatric ward. Club members entertained these children with Valentines and gifts of red Texas Tech Basketballs

PSYCHIATRY CLUB

The goals of the Psychiatry Club, the youngest pre-professional organization at TTUHSC School of Medicine, are as follows:

- 1. To provide a forum for the discussion of issues pertaining to the humanistic/psychological aspects of medicine and medical education.*
- 2. To provide an extracurricular venue for the introduction of medical students to the specialty of psychiatry.*
- 3. To organize lectures, programs, and seminars on topics of interest in the area of clinical psychiatry.*
- 4. To organize lectures, programs, and presentations centering on issues which are relevant to the social, emotional,*

and psychological well-being of physicians and the persons with whom they interact.

The Psychiatry Club met biweekly under the moderation of Drs. McMahon and McGovern, and with the assistance of Drs. Pollard and Arrendondo, co-sponsored the year's Impaired Physician Seminar. Held at St. Mary of the Plains Hospital, the seminar welcomed Dr. David Smith as its guest speaker and focused on substance abuse in the medical community. The Psychiatry Club looks forward to continued sponsorship of programs such as this and continued growth as a part of Tech's educational tradition.

TEXAS MEDICAL STUDENTS AUXILIARY

TMSA stands for Texas Medical Students Auxiliary. We are an informal social organization for the spouses of Texas Tech medical students. Our purpose is to acquaint TMSA members with the profession of medicine — its aims, purposes and ideas; to promote intellectual growth; to stimulate participation in civic and medical fields; and to encourage fellowship among the members.

Various activities were conducted during the 1985-1986 Academic year. In May, members held a bake sale with proceeds being donated to the

Ronald McDonald project. A garage sale was held in October and the money raised was donated to the Make-A-Wish Foundation and the TTUHSC Student Emergency Loan Fund. A cookbook was compiled by the group with the proceeds going to the Children's Home of Lubbock. A student bulletin board donated by the Texas Medical Students Auxiliary is to be used in the fifth floor for the posting of medical students activities beginning in the fall of next year.

STUDENT GOVERNMENT

The 1985-1986 Academic Year was the second year of the Student Government at the Texas Tech Medical School. This year marked the first monthly publication of the Student Government Newsletter, "Murmurs", in an effort to improve communication between students, faculty, and administration. It was sent to all students, faculty, administration, incoming freshman, parents of MS I's, and to former students of Texas Tech.

Initial steps were taken to establish an Alumni Association. The first mailing resulted in a 30% response. A subsequent mailing included an invitation of Alumni to a reception at the TMA convention in Dallas in May.

Steps were also taken to form a Parent's Association. A letter was sent to all MS I parents, requesting their support, along with a copy of the student newsletter. The association will formally be established next year.

The speaker series was continued with a presentation by Dr. David Smith, entitled "The Impaired Physician." The series will be expanded

next year to include one speaker during each of the two semesters. Also, Dean Hartman addressed the students on the state of the school and responded to questions medical students had concerning TTUHSC.

This year the Student Government became responsible for assessing the annual budgetary request of student organizations and for dispersing funds to the individual organizations.

Student participation in Student Government increased this year, which allowed the undertaking of the above mentioned projects as well as many other goals not listed. Other projects the Student Government is concerned with, and will continue to pursue, include expansion of community service, a no-smoking policy, and an official TTUHSC bookstore.

The Student Government would like to express their sincere appreciation to Dr. Chappell, Dean Hartman, Dr. Spires, Marilyn Tackett, James Johnston, and Nancy Tarwater for their support.

SURGERY CLUB

Since its inception in 1984, the surgery club has continued to thrive through cooperation and continual funding by the TTUHSC Department of Surgery. The goal of the organization is to expose students to the various aspects involved in a career in surgery. A major function of the club is to provide an informative and realistic view of the process of specializing in surgery. Luncheons with guest speakers from a variety of surgical specialties were the highlights of the year. Speakers included: Dr. Ted Hartman, Dr. Gerald Laros, Dr. Jane Goldthorn, Dr. Mario Feola, Dr. James Colt, as well as many surgery residents. A suturing lesson and an anatomical approach to specific surgeries gave

students a "hands on" experience. Dr. George Raushbaum, Dr. James Colt and the surgery residents were helpful in making this possible.

Learning proper scrubbing techniques, observing various operations, and following a resident for a day were other opportunities found in the surgery club.

Officers for 1986:

President:	Keith Bjork
Vice Presidents:	Mark Reedy, Jeannie Sitzes

NURSING AMBASSADOR CLUB

The Ambassador Club of the School of Nursing was founded in December 1985 with 18 charter members. Its purposes include supporting the philosophy of the

Health Sciences Center; service, public relations, and recruitment for the School of Nursing; promotion of professionalism and leadership; and community service.

The officers (left to right): Bruce Slack, president; Sheelah Pagendam, historian; Angela Striebeck, vice-president; Kelly Finley, secretary; (not pictured) Inola Pool, treasurer.

Community service, public relations, and recruitment go hand in hand.

An Executive Committee meeting in session planning activities.

MOTT/TAMAMS

The Minority Organization at Texas Tech (MOTT) is a local chapter of the state level Texas Association of Mexican-American Medical Students (TAMAMS). The principle goals of TAMAMS are to address the health care needs of the medically underserved peoples in the state of Texas with particular emphasis on the Mexican-American population, and to effectively increase the number of minority students in allopathic and osteopathic medical schools. As a subunit of TAMAMS, MOTT was established as an effort to cope with minority health care issues on a more local level.

MOTT Officers 1985-86:

President:	Jacqueline Bickham
Vice President:	Gloria Rodarte
Sec/Treas:	Sergio Ibarra
Board Member:	Luis Linan
Liaison Officer:	Frank de la Torre

TAMAMS (state):

President:	Juan Fitz
Vice President:	Manuel Garcia
Secretary:	Kelly Flood

TEXAS MEDICAL ASSOCIATION

TTUHSC lead the state medical schools with 100% TMA membership for 1985-1986. The TMA promotes interest and awareness of organized medicine as it interacts with legislation, community service, and health care delivery. TMA 1985-1986 programs included: 1st Annual TMA/TTUHSC 5K/10K Fun Run; Legislative Symposium; seminars on professional liability financial planning, and prepaid health care; golf shirt sale; and community service. Students served as delegates and committee representatives at state wide TMA meetings. TMA members also participated in Lubbock-Crosby-Garza County Medical Society Meetings.

TTUHSC NURSING STUDENTS' ASSOCIATION

The purpose of the Texas Tech University Health Sciences Center Nursing Students' Association is to serve in the development of the individual student nurse to meet the challenge and responsibilities, as a future health care professional, in providing care for all people. TTUHSCNSA is an individual chapter in the Texas Nursing Students' Association. TTUHSCNSA is a professional, political organization. It functions in a wide variety of arenas. TTUHSCNSA is regularly involved in health promotional activities. Some of the activities include blood pressure screenings, co-organizing the Senior Citizen Day at the South Plains

Fair, and teaching in the community. Annually, TTUHSCNSA is involved in orientation activities for incoming students in the School of Nursing. In addition to these activities, TTUHSCNSA sends delegates to the state and national association conventions for nursing students. These delegates participate in formulating and enacting legislation within the student and licenses nurses associations. TTUHSCNSA is a multi-faceted; multifunctional organization whose main goal is to promote unity and professionalism within nursing as a whole.

CONTRIBUTIONS

The following alumni have graciously given donations in support of the Plexus. Due to the financial crunch which TTUHSC and the Plexus have been subjected to this year, their generosity is greatly appreciated.

William H. Gorman, M.D.

Jewell Davis, M.D.

Brad B. Hall, M.D.

Edythe Harvey, M.D.

Christopher H. Heinrichs, M.D.

Leete Jackson, III, D.D.S., M.D.

Charles Mathis, M.D.

Cynthia A. Norman, M.D.

Elizabeth W. Rutledge, M.D.

M.G. Wilkinson, M.D.

Gary Womach, M.D.

LETTER FROM THE EDITOR:

I can't say that working on this yearbook was at all times exciting and/or great fun, yet I'm glad I gave my time in order to accomplish a project which I hope others will enjoy. Being editor of the Plexus has given me an opportunity to befriend some really great people I might otherwise never have come to know. To all the people who made my job a little easier along the way, a heartfelt thanks.

*Valerie Engelbrecht, MS I
Editor, 1986 Plexus*
