This is
Lubbock, Texas

200,000 residents, lives amid mild seasonal conditions with an average of 267 days of sunshine per year.

In the heart of West Texas' rich agricultural region of the South Plains, Lubbock is a growing educational, commercial, medical and cultural center. The metropolitan population, in excess of

Past Choices . . .

The establishment of Lubbock as the medical center of the South Plains was closely tied to Lubbock's growth as the leading city of the region. Major traffic routes ran through the city, bringing people from miles around, trading, banking, and selling crops. By building modern hospitals and broadening access to them, Lubbock guaranteed its becoming a major medical community.

In the beginning of the twentieth century, the medical profession had neither the appeal nor the financial rewards that we see today. A young physician had to be extra careful choosing a place for his practice, and often he had to hold down a second job just to make ends meet. But because West Texas was growing rapidly, there was a chronic shortage of competent physicians; therefore, there was the opportunity to earn a comfortable living.

The first physician in Lubbock, Dr. M. C. Overton, arrived in 1901. Being the only qualified physician in the entire area, he developed a large practice among the people of the South Plains. The first fully trained surgeon to practice in Lubbock was Dr. C. J. Wagner. Being active in civic projects, he became involved in establishing a land site for Texas Technological College. He was the first to attempt to establish a medical institution in 1908. Donating four lots on the 2300 block of Main Street, the Lubbock Sanitarium and Hospital opened in 1909 in a two-story wooden building. The majority of medical work was done in homes, both in town and out of town, with some cases more than a hundred miles beyond the city. To be prepared the doctors traveled with three medical bags. One bag contained obstetrical equipment to deliver babies, another surgical equipment for appendectomies and tonsillectomies on kitchen tables, and another bag of general medical supplies such as drugs that the doctor mixed according to the patient's needs. Because people saw no reasons to go to a hospital when doctors visited the home, Lubbock Sanitarium and Hospital closed in 1913.

Dr. Overton still felt the need for a hospital, so in 1913 he purchased the Lidel Hotel and opened the

Overton Sanitarium. Then in 1916 the hospital was moved into a new building and renamed the West Texas Sanitarium. Erected at a cost of \$125,000, the Lubbock Sanitarium, re-established in 1918 by a group of doctors from Post encouraged more well-trained physicians to locate in the city. As the hospital grew, the facility was incorporated and the name changed to Lubbock General Hospital, then to Lubbock Memorial Hospital to honor those Lubbock men and women who lost their lives in World War II. Finally in 1954, after moving to Nineteenth Street, the Northwest Texas Conference of the Methodist Church took control and changed the name finally to Methodist Hospital.

The presence of two good hospitals made Lubbock an attractive environment for young doctors. Associating themselves with one of the hospitals, a young doctor could receive a salary of \$200 to \$300 a month until they could establish a clientele of their own and work on a service-fee basis.

. . . a young doctor could receive a salary of \$200 to \$300 a month until they could establish a clientele of their own and work on a service-fee basis.

The Thirties witnessed the first arrival of black physicians. Dr. J. A. Chatman, who arrived in 1939, had to endure such racial prejudices as not being allowed to affiliate with the Lubbock hospitals or obtain membership in the Lubbock-Crosby County Medical Society. However, he was invited to attend the society's meetings, and several members aided him in obtaining financial backing for his hospital. The Chatman Hospital served as an institution where doctors could treat their black patients and it also gave black patients a better atmosphere in which to recover.

... a colonic machine, steam cabinet for baths, ultraviolet ray and infrared machine to treat rheumatism, infantile paralysis, and post fractures.

At the end of the Depression, three doctors wanted to improve themselves financially, so they built their own hospital, naming it Plains Clinic. Plains Clinic was unique in that it had a Department of Massage and Physiotherapy headed by Mrs. Jessie Walker, the only registered physiotherapist in West Texas. This department featured a colonic machine, steam cabinet for baths, ultraviolet ray and infrared machine to treat rheumatism, infantile paralysis, and post fractures. When the Sisters of Saint Joseph purchased the hospital in 1939, the name was changed from the Plains Clinic to Saint Mary of the Plains Hospital.

And so they started a medical school ...

Created in 1969 by the 61st Legislature, the Texas Tech University School of Medicine formally opened in 1972. Over the next decade, the School of Medicine was joined by the School of Nursing and the School of Allied Health to form the Texas Tech University Health Sciences Center. The University Medical Center, a 297-bed hospital, served as the primary teaching hospital for the institution. Biomedical graduate programs became a part of the School of Medicine in the 1970s.

The mission of the Health Sciences Center extends over a 108 county region of West Texas through the Regional Academic Health Centers located in Amarillo, Lubbock, El Paso and Odessa. Through teaching, patient care, and research, TTUHSC educates health care professionals for practice in Texas, especially the rural communities of West Texas; nurtures and supports community-based health care programs; provides an intricate and thorough structure of specialty and subspecialty services with access to West Texas physicians, health care professionals, hospitals and patients.

Throughout their educational experience, students reap the benefits of our interdisciplinary approach to teaching, research, and patient care. Faculty from all three Schools of the Health Sciences Center consistently join hands and minds to teach and treat as thoroughly and broadly as possible, bringing a wealth of resources to bear on every course and every case.

The HSC School of Nursing awarded five bachelor of science degrees to its first five graduates June 5, 1983 in the University Center Theatre.

During the first two decades of the twentieth century, the widespread interest in women's rights and the need for more women to work encouraged many young women to pursue a vocation before marriage. Nursing also provided practical training for a woman, such as child rearing and caring for a family. Because nursing education had a low cost, the supply of student nurses quickly surpassed the demand and as a result, student nurses became an inexpensive source of labor while graduate nurses seldom found jobs. The duties performed by the student nurses during their training period demanded a great deal

from them. They worked from seven in the morning until seven in the evening and then attended classes from seven until nine at night. The beginning students were usually responsible for changing linens, bathing patients, and serving meals while more advanced students assisted in delivering babies or in the operating room. An unusual duty was accompanying doctors on house calls. After the doctor did what he could for the patient, he would leave the student nurse to stay on with the patient's family, from a week to ten days, while the patient recovered. Since the nurses were still trainees, they received no pay for their house-call work. The family of the patient would pay the student's way back to Lubbock and often give her a box of candy or a pair of silk stockings as a token of their appreciation.

Ten Years of Memories

It was ten years ago that a first-year medical student came up with the idea of a yearbook. She was eager and energetic, as were her friends, and they probably didn't realize that a tradition was in the making. Aurora Pajeau served as the first editor of *Plexus*, a name whose meaning reflected what was happening on this campus: "an interwoven combination of parts or elements in a structure or system." By 1983, the School of Medicine had become part of a larger entity—the Texas Tech University Health Sciences Center—and had been joined by a School of Nursing and a School of Allied Health.

The first *Plexus* boasted a red and gold cover and contained 144 pages of black and white photos of faculty, staff and students. Browsing through this first edition today, one can see that much may have changed, but much remains the same: students are still playing foosball . . . and eating . . . and dressing up on Halloween . . . and eating . . . and taking ski trips . . . and eating . . . and, yes, even studying. The faculty and staff have experienced change as well, but a surprising number of familiar faces are sprinkled across the pages of the first yearbook. Dr. Dalley, Dr. Tenner, Dr. Hentges, Dr. Lefkowitz, Dr. Way, Dr. Stocco, Dr. Garner, Dr. Kopetsky, Dr. Lutherer, Dr. Barker, just to name a few of the medical faculty.

Dr. Langford and Dr. Yoder Wise are still on the nursing faculty and Drs. McManigal and Merrifield, new kids on the block in 1983, are still building the allied health program. Among the staff, you'll still see Marilyn Tackett, Jane Carter, Olga Ortega, Carolyn Henry and Jim Bob Jones walking the hallways.

However, many changes have taken place here over the past ten years. In 1983, Dr. Lauro Cavazos was President of Tech; today Dr. Robert Lawless leads the way. Ten years ago the student body numbered 626 and we had 461 graduates, 5 of whom were nursing students. Today we have a student body of 1063 and we have 2356 graduates from the Schools of Medicine, Nursing and Allied Health. Lubbock General Hospital is now known as the University Medical Center. What was only half-occupied space in the Health Sciences Center is now completely filled with expanded clinics, classrooms and laboratories. HSC Student Services is centralized and includes student services, registrar and financial aid. Tuition has gone from \$400 a year to \$6550 for medical students while undergraduates are now paying \$26 per credit hour instead of the \$4 of yesteryear. The financial aid picture has changed as well, of course. The average indebtedness of our graduating medical students is \$55,900 and undergraduates are borrowing more in greater numbers. Yes, indeed, things are changing.

I have been here for seven of these ten years and have tried to offer sympathy and support to each new editor of the *Plexus*. All the blood, sweat and tears that go into a project like this is a labor of love performed by people who appreciate the historical value of leaving a record and who want, for themselves and for their classmates, to have a memento of a special time in their lives. To remember the sleepless nights, the stressful days, the silly antics, the serious moments . . . to have it all captured between the covers of a book called *Plexus*.

News from Around the World!

In 1991 Boris N. Yeltsin was elected president of the Russian Federation. One of his top priorities was economic reform. But the gloomy economic condition reflected the grave difficulties he and his government faced in trying to build a market economy on the ruins of the failed Soviet Communist system. While attempting to establish economic and political ties abroad, Yeltsin's reforms at home increased prices by as much as 1,500 percent during the first part of 1992. And many Russians felt that the reforms had damaged their living standards significantly.

Civil war spread across Yugoslavia, a nation of six republics and two provinces that had been plagued for centuries by historic, ethnic, religious and economic differences. Nationalist, anti-Communist parties won elections in 1991 in all republics except Serbia, the largest, and Montenegro, the smallest. Then Croatia and its neighbor Slovenia declared their independence. Traditional rivalries were strongest between the 9 million Serbs, who belong to the Orthodox church, and the 5 million Croats, who are Roman Catholic. Tens of thousands of people became refugees and the killing continued.

The U.S. Marines arrived in Somalia on December 9, 1992. The starving African country was ravaged by famine and widespread looting of food from international relief agencies. The Marines offered a security force to insure safe food distribution.

When Rodney King was stopped by police on a Los Angeles freeway, police say he resisted them and was beaten. Someone videotaped the melee and released the tape to local television stations. It received national attention, and four white officers were charged in the beating of King, who was black. But when a jury found them innocent of any wrong-doing, three days of rioting hit Los Angeles. When it ended, 52 people were dead, 2,383 were injured, 18,807 were arrested, and the amount of property damage was estimated at \$785 million.

U.S. and allied aircraft attacked strategic targets in Iraq in early January. The first attack hit a nuclear complex near the capital city of Baghdad, followed by other strategic hits on Iraqi missile sites. Many of the U.S. aircraft that flew raids over Iraq were based on the USS Kitty Hawk.

Hurricane Andrew carved its way through the Bahamas and hit south Florida with a powerhouse intensity before moving into Louisiana. The Hurricane's 54-hour rampage, the most expensive natural disaster ever to hit this country, left an estimated 180,000 homeless in Florida alone. It was a harrowing time, as tens of thousands of people tried to evacuate the Miami area and thousands more rode out the storm in shelters and boarded-up homes. At least 51 deaths were directly attributed to the storm—41 in Florida and 10 in Louisiana. The amount of damage was estimated at \$20 billion in Florida and nearly \$2 billion in Louisiana.

On November 3, Bill Clinton was elected the nation's 42nd president in a Democratic landslide that ended 12 years of divided government in Washington. The Clinton/Gore ticket got 349 electoral votes (42%), Bush/Quayle received 129 (38%), and Perot/Stockdale did not receive any electoral votes but got 18% of the national votes and 22% of the Texas vote.

After Desert Storm in the Mideast ended in February, 1991, President Bush was touted as the most popular president in all of history as well as having the highest approval rating from the American public. Not one year and nine months later George Bush lost the '92 presidential race to Bill Clinton, a governor of a small southern state.

After quitting the race because of "dirty tricks", Ross Perot reentered the race with about five weeks to go before Election Day; while Clinton told supporter, "for nine days, you'll see a battle for the spirit of America."

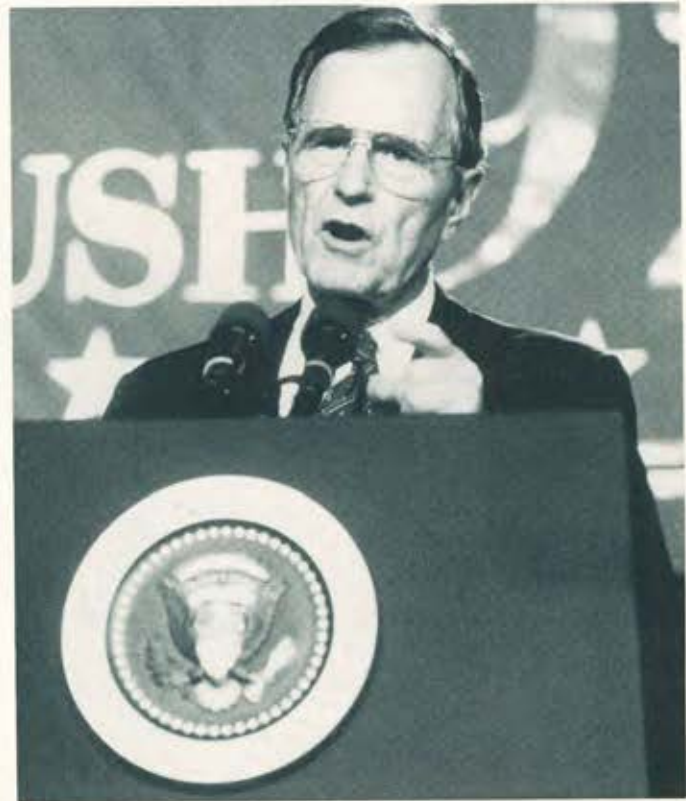

Bill Clinton stepped into the national spotlight and won the nomination at the Democratic convention in a hot July week in New York City. Clinton, a former Rhodes Scholar at Oxford University and a graduate of Yale Law School, was governor of Arkansas when he decided to enter the national race. As his running mate, he chose Al Gore, who was elected to the House of Representatives at the age of 28 in his first campaign for public office. He was elected to the Senate in 1984.

After eight years as vice president under Ronald Reagan, Bush became the 41st president in 1988. However, Bush and his vice president, Dan Quayle, arrived at the GOP convention in Houston as underdogs to the Clinton/Gore ticket.

And then there was Ross Perot, the on-again, off-again independent candidate from Texas. As

his running mate, he chose James Stockdale, 68, a highly decorated former Navy fighter pilot and POW. Spending millions of dollars of his own money and relying on an army of "volunteers," the Perot campaign was off and running. Ross Perot made his first billion when the computer company he founded began selling stock. Some called this businessman a spoiler; some called him a savior.

The impression the Bush strategists sought to convey was that the President was the true agent of change and that Clinton was slick and unreliable. For the Democrats, the economy—and Bush's per-

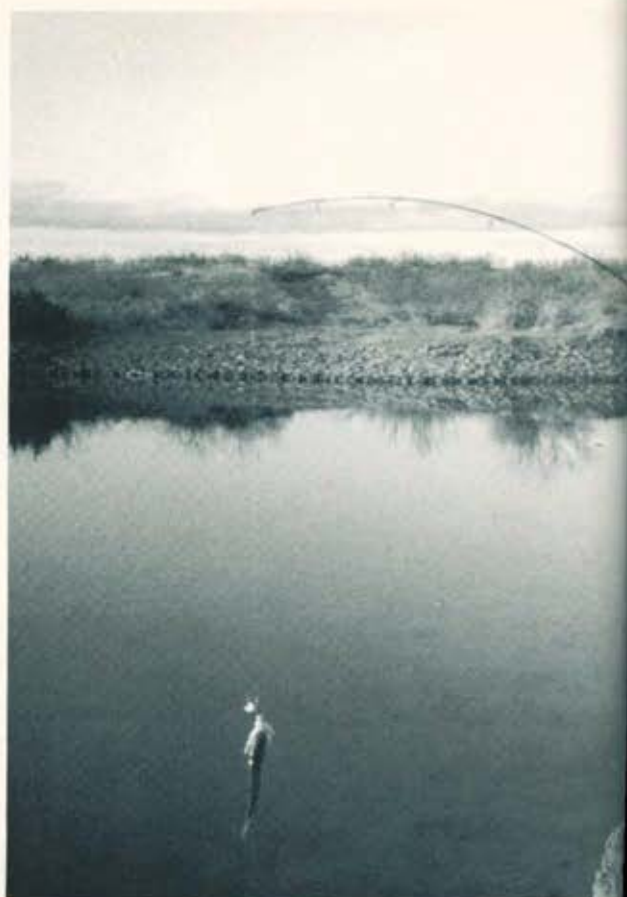

ceived mishandling of it—remained the main message that they hammered again and again. After the Democratic convention in New York, the Clinton/Gore ticket was already far ahead in the polls. However, Bush attacked Clinton's overconfidence, urged supporters to remain upbeat. "Bill Clinton must listen to the polls. He's got the drapes measured for the White House." He also accused the media of painting an unrealistic picture of the outcome of the election, and also assailed the media for misrepresenting the state of the economy. He expressed optimism that the worst of the recession was over and that the economy was recovering.

Student

Life

Greg Newman, MSII is seen with his new wife and the start of a family.

The Cajun restaurant, Jazz, is one of the favorite ways to relax for many students.

Although some may have to move around quite a bit, no one ever gets used to it, nor do they like it.

The end of the year parties are always joyous occasions.

Christophe Salcedo, Allen Roberts, and Darren Flamik are "Married with Children".

CMDS Chili Cookoff

Joe Martin prepares his masterpiece.

One of the things that medical school students are good at is finding a free meal. For the final official function of 1992, CMDS sponsored a chili cookoff.

Although there was a lot of good chili, there could be only one winner. The hands-down winner was Joe Martin, MSII.

Paul Bunn samples the abundant chili.

Mal-Practice Bowl

Once again, it is the time for the challenge, of good versus the dark side of the force. Well maybe not. However, it is the annual Mal-Practice Bowl featuring the Medical School, the Widowmakers, against the Law School.

As always, it is an exciting game with hordes of fans cheering for both teams despite the bitter cold. The Medical School fought gallantly, but the law students triumphed.

After the game, the medical students treated the law school to a few beers to show their good feeling.

The Widowmaker goes for a "blitz."

Fans, Thuy and Kim, cheer on the Widowmakers.

During a half-time break, the medical students discuss strategy on a chilly night.

David Starch, MSII, awards the trophy, made from a bed pan, to the law students

Arts and Entertainment

Even though there is little time for leisure time, many students still manage to steal a few minutes here and there to read a book other than a text. However, a quick fix for many TV junkies is a good sitcom.

When money and time is short, many students turned to their VCRs for instant gratification of their TV fix. The top 10 video rentals in September, 1992 were:

1. Wayne's World: Mike Myers, Dana Carvey
2. Fried Green Tomatoes: Kathy Bates, Jessica Tandy
3. White Men Can't Jump: Woody Harrelson, Wesley Snipes
4. The Prince of Tides: Barbra Strisand, Nick Nolte
5. The Hand That Rocks the Cradle: Annabella Sciorra, Rebecca Demornay
6. Medicine Man: Sean Connery, Lorraine Bracco
7. Hook: Dustin Hoffman, Robin Williams
8. Rush: Jason Patric, Jennifer Jason Leigh
9. Memoirs Of An Invisible Man: Chevy Chase, Daryl Hannah
10. The Lawnmower Man: Pierce Brosnan, Jeff Fahey

Police Invade Living Room

Every Sunday night, the Lubbock Police Department entered living rooms through KJTV's television series, "On Patrol."

The first airing was Sept. 19, and the 30-minute program gave people a chance to see the life of Lubbock police with at least four crime incidents in each program. Traveling with officers at night, camera operators were able to collect the most footage.

"On Patrol", follows the trend of "Reality TV", made popular by network show like "Cops", "America's Most Wanted" and "Unsolved Mysteries." For many viewers, reality TV provided a glimpse into other lives.

Sandy Winston, MSII, said, "I just like getting mad when the cops violate someones civil rights." During any one week, a viewer could see eight or more of such programs.

Talk Shows gained equal popularity. A running joke said that nearly everyone has their own talk show. Talk shows came and went with a blinding speed that few people could keep up with. Frequently, many self-proclaimed critics labeled the programs, "Trash TV."

Despite the criticism, there were a few shows to develop a following. "Geraldo", considered the epitome of "Trash TV", "Oprah Winfrey Show" and "Donahue" pushed through to the top of the trash heap.

Even for those that gave all other form of entertainment, music still provided a release from thinking about things too deeply. The top selling albums were:

1. Some Gave All — Billy Ray Cyrus
2. Beyond The Season — Garth Brooks
3. Unplugged — Eric Clapton
4. Ten — Pearl Jam
5. Bobby — Bobby Brown
6. Boomerang — Soundtrack
7. Totally Krossed Out — Kris Kross
8. Temple Of The Dog — Temple Of The Dog
9. What's the 411? — Mary J. Blige
10. Funky Divas — En Vogue
11. Adrenalize — Def Leppard
12. The One — Elton John
13. 3 Years 5 Months & 2 Days in the Life Of — Arrested Development
14. House Of Pain — House Of Pain
15. Countdown To Extinction — Megadeth
16. Blood Sugar Sex Magik — Red Hot Chili Peppers
17. MTV Unplugged EP — Mariah Carey
18. Singles — Soundtrack
19. Ropin' The Wind — Garth Brooks
20. No Fences — Garth Brooks

The next Elvis? That's what some people are calling Billy Ray Cyrus. The 30-year-old singer, who dresses in blue jeans with an American flag on the right rear pocket, hit it big with his rollicking single "Achy Breaky Heart." He combs his long, brown hair back into a dropping ponytail, which he ceremoniously unties during his performances. His album, "Some Gave All," is a blend of country, blues and rock 'n' roll. He wrote six of the songs, including the title song, which is a poignant ballad that salutes Vietnam veterans.

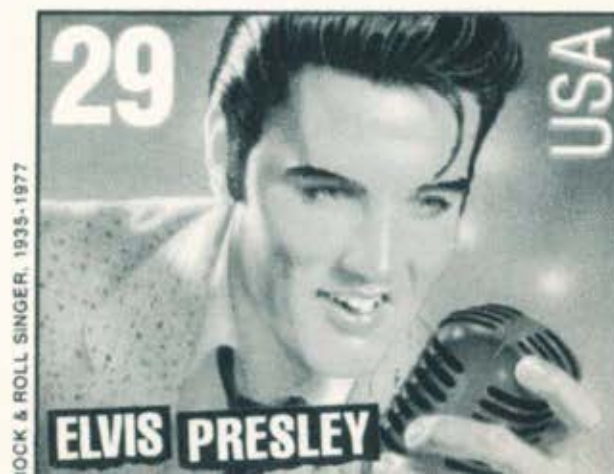

Garth Brooks, whose introspective songs and rousing concerts lifted country music to new heights, was voted top entertainer by his peers for the second year in a row in 1992. The 30-year-old superstar managed to top both the country and the pop charts with his 9-million-selling album "Ropin' the Wind." The soft spoken singer from Oklahoma says he spent more time in his youth listening to Elton John and James Taylor than emulating Hank Williams and Merle Haggard.

Thirty-four years after his death in a plane crash, Buddy Holly, the Lubbock-born singer is honored with a commemorative postal stamp.

The stamp is part of The Rock 'N' Roll/Rhythm 'N' Blues: Legends of American Music collection which also honors others including Elvis Presley and Ritchie Valens.

"This just points out how special he was not only to the area, but to the music," U.S. Rep. Larry Combest, who campaigned for the stamp, said. "You cannot talk about rock 'n' roll without talking about him."

Talent Show '93

presented by the
TTUHSC Student
Senate.

After a year's absence, the TTUHSC Talent Show once again graces the Allen Theater with a wide variety of talent ranging from a singing dog to Broadway music to traditional Vietnamese dancing.

It is an extremely tough decision for the judges, but after much deliberation the first prize goes to Mark Livingston and his dog "Zeke" for his rendition of *Theme from American Gladiators* with Mark accompanying on the kazoo. Second prize goes to Wenda McCutchan and Max H Schubert for their comedy performance of "Jalousie" and their duet "Memory" from the Broadway musical "Cats."

Third prize goes to Timothy Moore for his moving classical piano piece. Fourth goes to Kurt Brewster for his comedy act. And Fifth Prize goes to Lan Ho for her Vietnamese Dancing.

Kurt Brewster, MSI, makes fun of the television show, "Cops" during his comedy routine.

Lan Ho dances with fans.

Timothy Moore, MSI, performs classical piano.

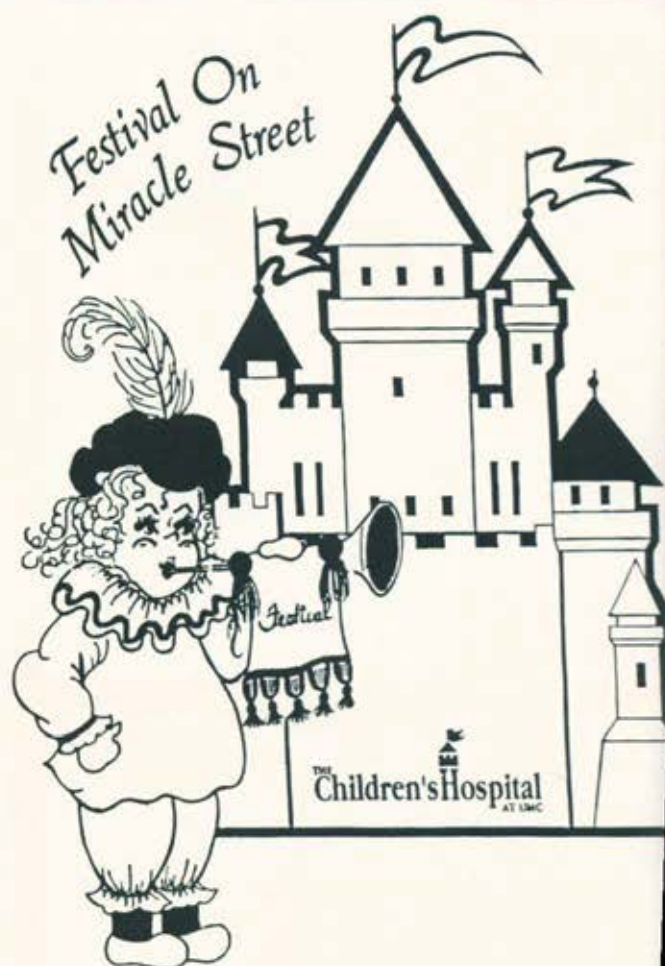

Sandra Johnson, NII, performs one of her own works for guitar.

Children's Miracle Network Arts and Crafts Festival

The University Medical Center sponsored a Arts and Crafts festival benefiting the Children's Hospital as part of the Children's Miracle Network Telethon. The event was held at the McInturff Conference Center.

The biggest hit among both the old and the young were the penguins.

Phi Beta Pi Mud Football

Rob Smyer, MSII, shows off his grace in the mud.

Steve is still covered with mud even after washing off with a water hose.

Even Karen Farst, MSII, is not spared from the mud.

Phi Beta Pi, the Medical School fraternity, sponsors a Health Sciences Center-wide mud football game. People from the schools of Allied Health, Nursing, and Medicine participate.

Weeks before, the field just west of the HSC building is plowed and watered-down in preparation for the annual event. Then after the game, the field is replanted with grass until the next time.

Fun is had by all. Even those choosing not to play in the game still enjoy watching the slips and falls and tackles.

Senate Phonathon

TUHSC Student Senate held its fourth annual phonathon to raise money for student scholarships. The endowment was established in 1989 and over \$185,000 has been raised.

Students and spouses spent three evenings on the telephone calling alumni all over the United States asking for donations. The total rang up at \$36,972. All schools of the HSC showed great participation in the phonathon with the Class of Occupational Therapy of the School of Allied Health having the greatest turnout of volunteers and the School of Nursing also with a strong turnout.

Kristin Healy, Vice President of the Student Senate, reports a new pledge.

Doyle Worthington, MSII, decides who to call next.

Jim Bob Jones tallies up the latest pledges.

*Mark Chaney, CLS, calls
an alumnus from the
School of Allied Health.*

The Spring 1989 issue of TTUHSC Pulse, an alumni magazine, had a section called "Have You Seen . . . ?" It said, "We can't find the following people. If you know their whereabouts, please let us know. Under graduate studies it listed: Herbert F. Janssen '80 Ph.D.

Christmas Party

The Student Services hosted a student Christmas Party benefiting the South Plains Food Bank.

Even with semester finals looming over head, students still took time to enjoy the holiday spirit. Students were asked to bring a can of food to be given to the South Plains Food Bank to help feed the needy during the holiday season. The Student Service served snacks, cookies and punch while Christmas music played in the background.

Research Day

Cindy Cregier, along with Chip Shaw, Austin Vaz, Juluis Militante, and Marvin Quant make up the Program and Planning Committee for Research Day.

Winners in the graduate division were K. Michael Rice and Jacob K. Song, both graduate students in the department of biochemistry and molecular biology. Rice's paper was on "The Insulin Degradation Mechanism in Regulating IRS-1." The poster by Song covered "The Identification of *Clostridium difficile* Tosin B promoter that is Functional in *Escherichia coli*."

In the medical student division, the winners were second-year student William Daniel Bradley for "Capillary Trapping of Blood Borne Osteogenic Cells by Various Tissues" and second-year medical student Scott Greene for "A GABA-Activated Inward Bicarbonate Conductance in Neonatal Rat Purkinje Neurons."

In the allied health division, Amy M. McGrath of physical therapy presented the winning poster, "The Effects of Hamstring Stretching on Land Versus in Water."

Scott Greene, MSII, explains his data.

Research Day gives Texas Tech University students an opportunity to display their ongoing research. Presenters are available at their posters, fostering the idea of communication in science. This year there were over 100 posters presented. Posters are judged and prizes are given to encourage participation in National Conferences.

Dr. Masoro, a professor in the Department of Physiology at the University of Texas-HSC at San Antonio, and the Director of the Aging Research and Education Center, spoke on the "Biology of Aging: State of Knowledge and the Challenge to the Experimental Biologist."

Amy McGrath defends her methods of her winning poster.

Dr. Elmus Beale shifts through the door prizes wondering which one he wants to win.

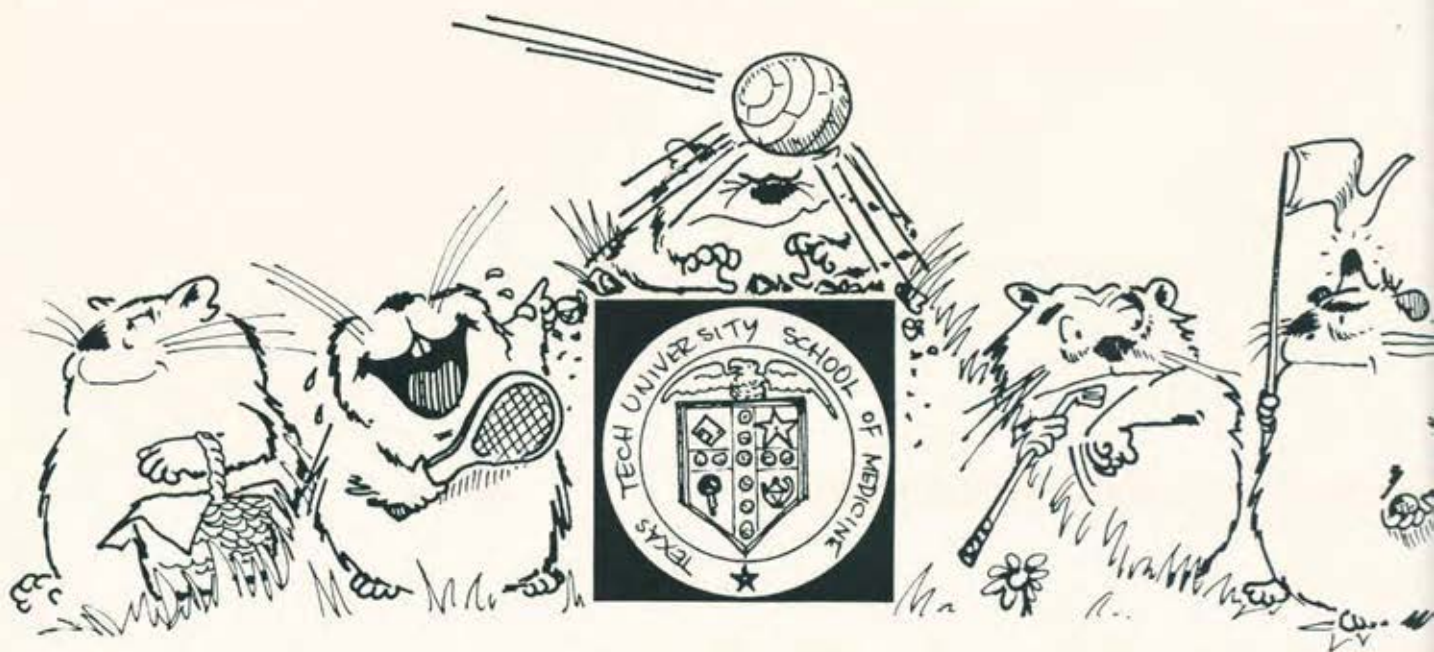

Many merchants display their scientific equipment. Everyone enjoys all the free "goodies" that they hand out.

Karen Roland handing out literature on Research Day.

Spring Training

The Dean's Reception

The Dean's Reception was held at At Your Service Catering. All had a good time with lots of food and drink.

Sandy seems to be having a little to much fun.

Kim loses all interest in the baby when the camera comes around.

The Spring Training Picnic

The Spring Training Golf Tourney

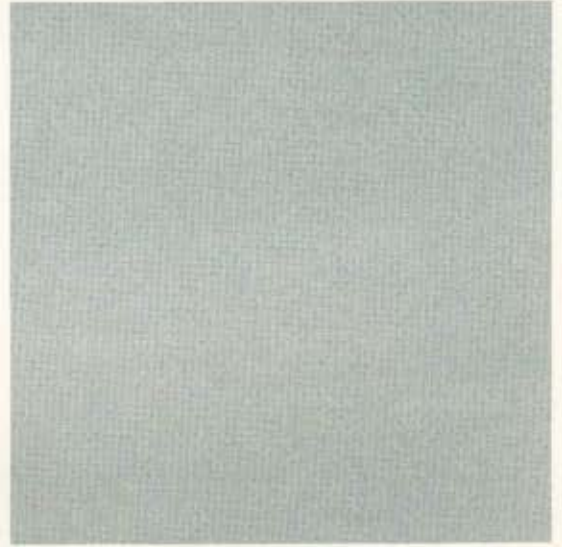

Texas Medical Association 2nd Annual Spring Training Fun Run

The TMA held its Second Annual Fun Run. Participants ranged from the young to the mature with two races. One was the 5 kilometer race, and the 1 mile fun run/walk for the more sensible. Trophies were given to the top runners and everyone received a T-shirt.

The Spring Training Dinner and Dance

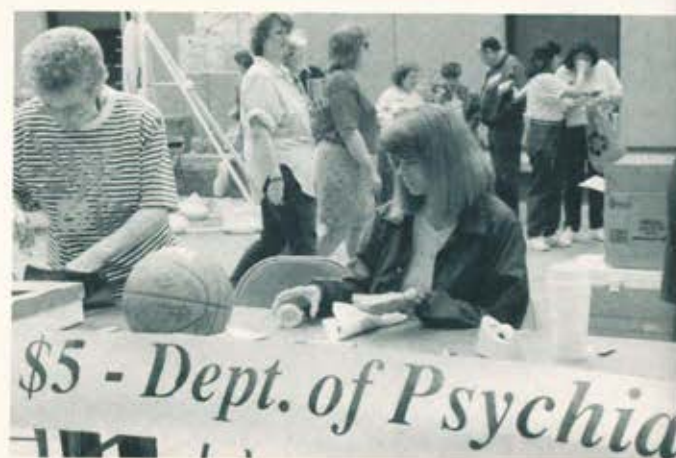

Boy, they sure do clean-up well.

May Day!

The faculty, staff and students help raise money for the Children's Pavilion at University Medical Center through May Day Fair, complete with basketball throws, food, dunking booths and other activities out on the patio off the cafeteria.

February Fling!

The HSC Student Services and the HSC Student Senate sponsored a dance and barbecue at the Kerschner 4 Bar K Ranch. Students from all three schools enjoyed Country & Western music and good food.

Greg Garrison, MSII, takes an A&M undergraduate, who is in town for an interview, for a ride.

Three baby faces

I get to see the cute, little babies!!!

... to get to the other side. Huh-huh Huh-h

I can't believe Gross Anatomy is over!

I wonder if I can get a 976 number from this phone?

Where are all the bars in this place?

Have you seen my wrist-watch? It should be in the operating room somewhere. I had it before the surgery.

All In Fun

Trust Me. Nobody will see them. Just relax.

"Little Shop of Horrors!"

Like lambs to the slaughter

All I

Is this a poker-face or what?

*Now this explains why you will never
see your husband again.*

... But first they must fatten them up.

Hey, it can really work this way!

Fun

*I did it! I found the cure for all the disease t
second-year medical students think they ha*

Zzzzzzzzzzzzz

*Man! Look at all the cool
stuff!*

**All In
Fun**

Med students to compile yearbook for first time in TTUHSCS history

By BECKY HOLMES
University Daily Reporter

Medical students at the Texas Tech University Health Sciences Center (TTUHSC) will be able to look back at their med school days in the pages of TTUHSC's first yearbook that now is being compiled, said yearbook editor Aurora Pajeau.

Pajeau, a first-year medical student from the University of Texas at Austin, said when she came to TTUHSC last fall she learned in its 10-year history, the med school never had a yearbook. She thought the school needed a yearbook.

"I never had anything to do with yearbooks when I was in school," Pajeau said. "I thought (the yearbook) would be a real good project for each first-year class."

The name Plexus has been chosen for the yearbook, Pajeau said. A plexus is a braid or network of the nervous system. The yearbook will be available beginning in September.

"There's a need in med school for something besides non-stop studying," Pajeau said. "Med school is hard, but in the first year there's time for a project like this."

Last September Pajeau took

her yearbook idea to TTUHSC's Student Affairs Office where the idea met with the approval of the associate dean for Student Affairs. TTUHSC faculty members also have been very supportive of the yearbook idea, Pajeau said.

The yearbook will be representative of about 550 students, Pajeau said. The TTUHSC campuses at Amarillo, El Paso and Lubbock will be represented in the yearbook, as well as graduate students at TTUHSC, the School of Allied Health and the School of Nursing.

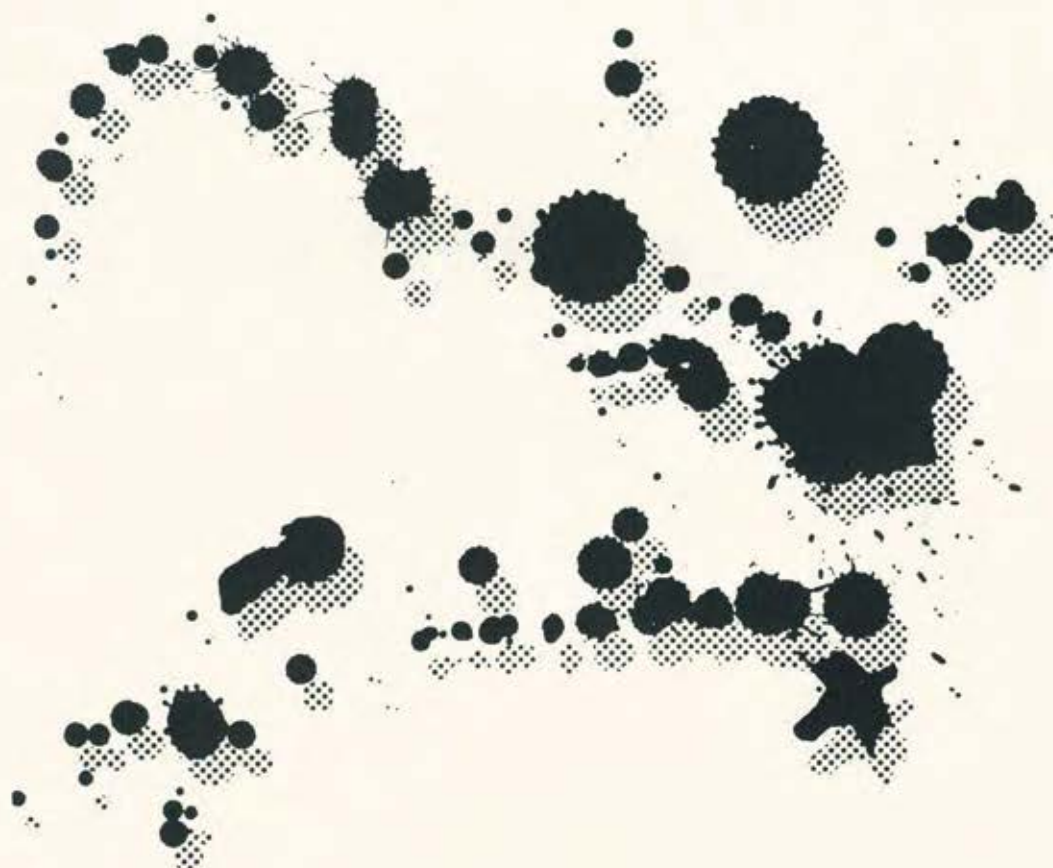

"First-year med students

are volunteering their time doing the layout for the book," Pajeau said. "Some third-year students in Amarillo and Lubbock are serving as consulting editors for the yearbook."

The TTUHSC campuses at Amarillo and El Paso will be responsible for compiling their sections of the yearbook in a way that will represent their campuses, Pajeau said.

Studying has not been sacrificed for yearbook work, she said.

"It's awfully time-consuming to start a yearbook from scratch, but there is time," she said.

Organisations

Student Senate

The 1992-1993 officers for the Student Senate are:

President Amy Walter
Vice President (fall) Kristin Healy
(spring) JoLynn Smith
Secretary (fall) Neil Rogers
(spring) Steve Clark
Treasurer Byron Conner

Cindy Cregier in line for the barbecue at the beginning the year social.

The HSC Student Senate strives to foster better relationships among the students of the three schools and provides a forum for discussion of mutual concerns. The School of Medicine selects six representatives to the Senate; the Graduate Program elects two; the School of Nursing elects six; and the School of Allied Health elects six. Senators represent the interests of their respective schools as well as the interests of the students at large. The Senate organizes the budget for students organizations, publishes a newsletter, the "HSC Synthesis", plans social functions, and acts as a students advisory body to the Executive Vice President and President of the HSC.

Kristin Healy presents Jossie Lethridge with a plaque of appreciation for all the work she has done as student organization secretary.

John Chang, MSII, plays volleyball at the beginning of the year social.

Amy Walters informs the new senators of their responsibilities.

Medical School Student Government

Front Row:

Cheryl Landry, MSIV President
Donna Duran, MSIV Secretary/Treasurer
Debbie Cherry, MSII Representative,
President of Student Government
Sharyl Brasher, MSII Secretary/Treasurer
David Starch, MSII President
Steve McNutt, MSI Secretary/Treasurer

Back Row:

Tommy Michaels, MSI Representative
Brent Paulger, MSIV Vice-President-
bbock
Max H Schubert, MSII Vice-President
Daniel Kainer, MSI Representative
Secretary/Treasurer of
Student Government
Wade McAlister, MSI Vice-President
Kyle Jones, MSI President
Not Shown:
Thuthuy Nguyen, MSII Representative

The Medical Student Government, comprised of MSI - MSIV class officers, acts as the voice of the medical students to the Dean, and is the interface between the student body, faculty, alumni and the administration. It appoints members to the standing committees of the school and serves as the Honor Council of the student body. The MSSG coordinates student organization meetings and budgets, publishes a monthly "Murmurs" as a newsletter of particular interest to medical students. The MSSG also organizes the Malpractice Bowl, a flag football game against the Law School, and Spring Training, a weekend-long promotional event for the School of Medicine.

Each class is represented by its President, Vice-President, Secretary/Treasurer and two additional elected members.

Student Physical Therapy Association

Officers:

Todd Cepica, President
Kevin Nicholson, Vice-President
Wade Shelby, Treasurer
Casey Sangalli, Secretary

Physical Therapy Class of 1994

Larry and Jim chat with Governor Ann Richards at PT Legislative Day

Everyone had to visit the Alamo at least once while the PT combined sections meetings in San Antonio.

Psychiatry Club

Dr. Manning answers questions after Psychiatry Class.

The Psychiatry Club introduces students to the specialty of Psychiatry by having discussions and bringing speakers to talk about the field. Also, the Psychiatry Club has special seminars that focus on topics of particular interest to medical students, such as handling stress in medical school using different techniques, substance abuse, and the changes and advancements in the past fifty years of psychiatry.

The Psychiatry Club meets in the Department of Psychiatry group room as a way to get away from the lecture hall. All the meetings are informal to encourage group discussion.

The officers are: Max H Schubert, President; Michele Neblock, Vice-President; and David Boney, Secretary/Treasurer. The sponsor is Dr. Stephen Manning. Much thanks goes to Donna Cude.

Iota Mu Chapter of Sigma Theta Tau International

Honor Society of Nursing

Sigma Theta Tau International is the second largest nursing organization in the United States and among the five largest and most prestigious in the world. The Society exists to:

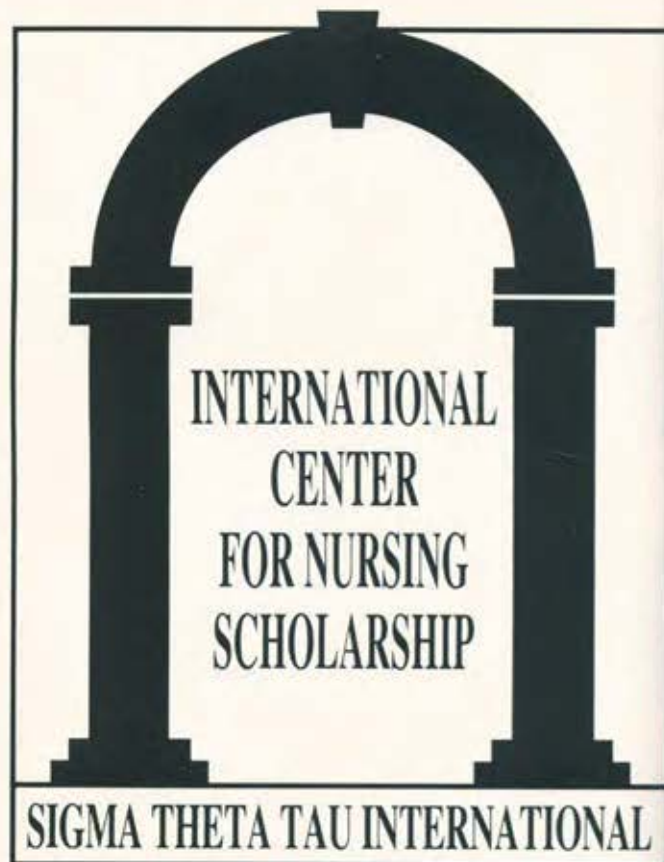

- Recognize superior achievements in nursing
- Encourage leadership development
- Foster high nursing standards
- Strengthen the commitment to the ideals of the profession

On a local level, interaction with an active membership of professional and committed nurses is one of the many benefits. The chapter is growing and some 297 members have been inducted since its inception, in 1988. Regular meetings and conferences offer numerous opportunities for leadership and participation.

On an international level, Sigma Theta Tau has affiliation with 350 colleges and universities in the United States, Canada, Puerto Rico, Korea, and Taiwan. The international membership numbers 150,000 and grew by 2500 members during the past year.

In the area of research, scholarship, and leadership Iota Mu sponsors yearly scholarship and research grant awards, and it sponsors a research conference. Iota Mu has sponsored a leadership conference for community nurses. The chapter also has an active Mentoring Committee. Chapter officers are cosponsors to the 1992 Region 3 Assembly, in Houston.

The founders chose the name from the initials of the Greek words *Storga*, *Tharos*, and *Tima*, to mean love, courage and honor.

More than ever, nurses are required to demonstrate a highly sophisticated level of excellence. This necessitates:

- Continuing commitment to knowledge
- Strengthening of the scientific base of knowledge
- Sharing knowledge worldwide

Sigma Theta Tau International

The International Center for Nursing Scholarship is designed to be a "nerve center" for nursing. In addition to serving as the headquarters, the Center:

- Incorporates the Virginia Henderson International Nursing Library, a "state-of-the-art" computerized facility that provides resources to nurse researcher, clinical nurses and the public for the development, dissemination and utilization of knowledge

- Develops publication and educational resources to communicate effectively on "cutting edge" issues, opportunities, and research

- Offers the "Friends of the Virginia Henderson International Nursing Library" program to allow the national and international community to join in promoting the goals and efforts of the Center and much more.

PHI BETA PI

Phi Beta Pi Medical Fraternity was founded March 10, 1891, at Western Pennsylvania Medical College(now the University of Pittsburg School of Medicine). Fraternity goals were to advance sound medical principles and to serve as a forum for medical students, instructors, and practitioners to consider problems of medicine and their relationship to the general welfare. The Beta Rho chapter of Phi Beta Pi was chartered on the Tech campus in the spring of 1990. The Betas have prided themselves on their fraternal growth through service and social activities.

During the school year, officers Wade Dickinson (Pres.), David Blann (V.P.), Sharyl Brasher (Sec.), and Rob Smyer (Tres.), led the Betas at TTUHSC. Their biggest event, the Annual Mud Football Classic, collected donations for the South Plains Food Bank. Teams from the Medical School, Nursing School, School of Allied Health, and UMC got down and Dirty as they battled it out.

The social calendar was filled with a Bar-B-Que, a super bowl bash, and various happy hours.

Phi Beta Pi would like to extend a special thanks to their faculty sponsor, Dr. Peter Doris, Department of Anatomy.

Another successful Mud Football Classic.

AMBASSADORS

(L) Officers. Kelly Scoggins, Krystal Scoggins, Mendy Weave, Angie Lehr, and Isabel Rodriquez. (R) Ambassadors at work.

Ambassadors is an organization of nursing students whose goal is the recruitment of students along with promotion of the philosophy of Texas Tech Health Science Center School of Nursing. In addition the group encourages community involvement and recognition of student leadership.

(L and R) Ambassadors celebrating new members.

CMDS

The Christian Medical and Dental Society is a fellowship and service organization made up of students, physicians, and dentists who are committed to service and the ideals of Christianity. Throughout the year CMDS service projects included: a screening clinic for residents of the Pioneer Hotel (an assisted living center in Lubbock), a weekly dermatology clinic at the Presbyterian Center led by Dr. Radentz, and two trips to Eagle Pass, Tx (Piedros Niegros, Mex). Fellowship activities included several famous "pot-lucks", where physicians and students have the chance to visit and relax away from school. This year CMDS was pleased to provide several "loaves and fishes" lunches where everyone ate free.

CMDS in Mexico after "one busy day".

PEDIATRICS CLUB

The Pediatric Club introduces students to the field of pediatrics both in the lecture hall and in clinical settings and deals with all subspecialties of Pediatrics. They have monthly speakers including pediatricians from private practice as well as specialists from the Health Sciences Center and outside Lubbock. Topics include everything from adolescence to zoster. The Pediatric Club sends representatives from the local club to meetings of the Texas Pediatric Society and American Medical Association to help keep up with current issues. Club members have the opportunity to spend time with pediatricians in the different subspecialties of their choice to experience what constitutes these fields. During the summer, the Department of Pediatrics hosts a camp for children with diabetes, and encourages club members as well as non-members to participate as camp counselors.

Officers (L to R): Stephen Abernathy (Treasurer), Sheryl McMahan (former V.P.), Alicia Kowalski (former Pres.), Cary Anderson (Pres.), Eddie Ochoa (V.P.)

SOFAAR

SOFAAR is an acronym for Student Organization for Animals and Animal Research. Its goal is to inform the public that biomedical research involving animals has been responsible for major advances in medicine, will be required for further advances, is highly regulated and adheres to the principles of humane treatment of animals. Members of SOFAAR are concerned about animals, as well as human well-being, and strongly advocate the humane treatment of animals. The break-in by members of the Animal Liberation Front at the Texas Tech HSC in 1989 and ensuing propaganda campaign against TTUHSC provided a strong impetus for the founding of the Texas Tech SOFAAR chapter. In addition to conducting a strong program within the community, it has been active at the level of the Texas Medical Association (TMA), the Texas Society for Biomedical Research (TSBR) and the American Medical Association (AMA).

AIDS Education Club

*Co-Presidents: Betty-Ann Svendsen, Molly Hammond
Secretary/Treasurer: Susan Kutz
Course Director: Roger Axtell*

The AIDS Education Club was formed out of a need to educate people about HIV and AIDS, to help stop the spread of HIV, to dispel the myths about the disease, and to increase public awareness. Members organize and go to area schools and organizations to teach and discuss the disease.

OB/Gyn Club

*President: Kelly Offutt
Vice-President: Kathy McManus
Secretary: Kim Schroeder*

The OB/Gyn Club introduces students to the field by inviting speakers to talk about what they do and presents cases of interest.

Texas Nursing Student Association

*President: Isabel Rodriguez
Vice-President/Sec: Kim McReynolds
Editor: Bonnie Britt
Treasurer: Todd Nash
Program/Projects: Miss Nash
Class Rep - Jr: Tawnya May
Class Rep - Sr: Cliff Dodson*

TNSA is a state organization for nursing students throughout Texas. TNSA was started in 1963 to help the unity between nurses and our government. TNSA helps promote safety and awareness to the government and public.

TNSA is very active in the community. They help with CPR, education training over various topics, and work within the school system to educate children about safety and emergencies. They hold a Senior Citizens Day Fair to promote health care for the elderly.

Texas Medical Association

Medical Student Section

*Governor Ann Richards with the
TTUHSC TMA/AMA delgation
at state convention.*

*Senator Phil Gramm and Mehrdad Sharif, MSII at AMA/TMA
student meeting in Austin.*

The TTUHSC Chapter of TMAMSS is dedicated to promoting knowledge and effective use of organized medicine, integrating medical students into local, state, and national organization, educating medical students on current issues in medicine and providing a forum for concerns of medical students and the community.

TMAMSS representatives attend conferences in Austin in full force. Because TTUHSC has four campuses, Tech has a significant number of votes at the TMA Medical Student Section state conferences, and therefore makes an impact on state issues.

Surgery Club

President: Andy Enriquez
Vice-President: Jeff Hischke
Advisor: Dr. Tom Shires

The goal of the Surgery Club is to expose students to the field of surgery. A scrub clinic is provided to give members the opportunity to learn how to scrub and gown.

The Surgery Club co-sponsors the Peter C. Canizaro, M.D. Lecture Series. This year's speaker is C. James Carrico, M.D., Professor and Chairman of the Dept. of Surgery at the University of Texas at Southwestern Medical School.

Dr. Tom Shires introduces the Peter C. Canizaro M.D. Lecture Series speaker, Dr. James Carrico.

Family Practice Student Association

Advisor: Dr. Homan
Officers: Karen Farst, Kelly Klein, and Renee Meadows

The purpose of FPSA is to promote the specialty of Family Practice. Toward this purpose, the FPSA sponsors a mentoring program. At a BBQ, at the Ranching and Heritage Center, students meet with their prospective mentor.

Academics

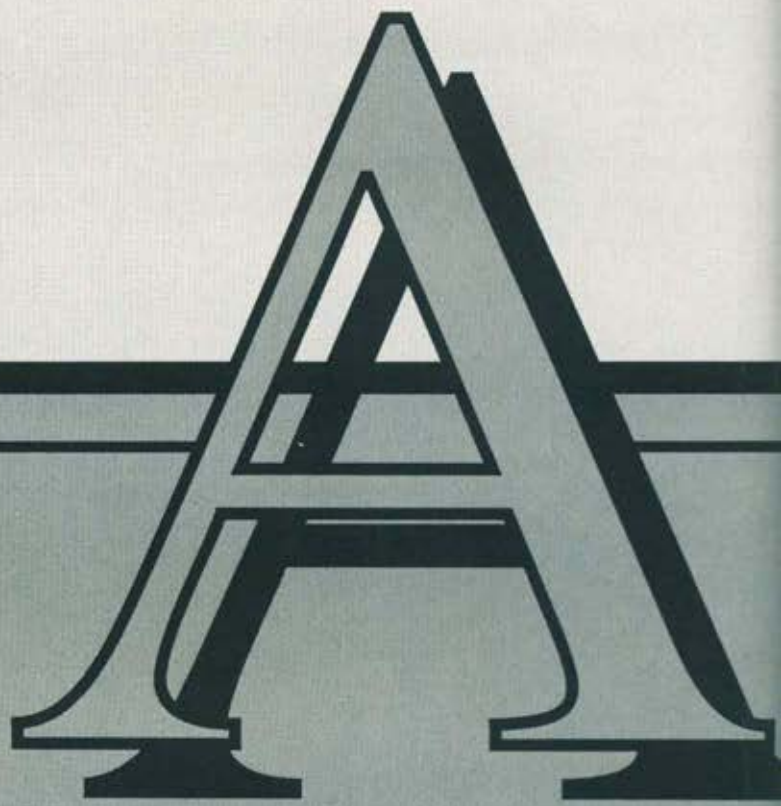

Many have dreamt about
since they were children
when they saw someone
they respected doing it.

Lisa Hawkins and Kim Gordon train for avalanche survival for use in Amarillo.

Clean-up Day for Summer Gross Anatomy.

Could Peggy Coffey (left) ever have been this young and so serious?

What ever you do, don't fall asleep!

When Nirmal fell asleep, his caring classmates decided to tape him to his seat. However, all that tape could not hold him down. He was able to escape before the camera could arrive.

Rick Hall, MSII, on one his better nights.

Smile for the camera. Aren't they sweet?

Dr. Jeckle revisited!

Showing just what kind of surgeon she would make, Peggy Coffey played a joke on her mom. She turn the kitchen into an noisy OR on Thanksgiving day.

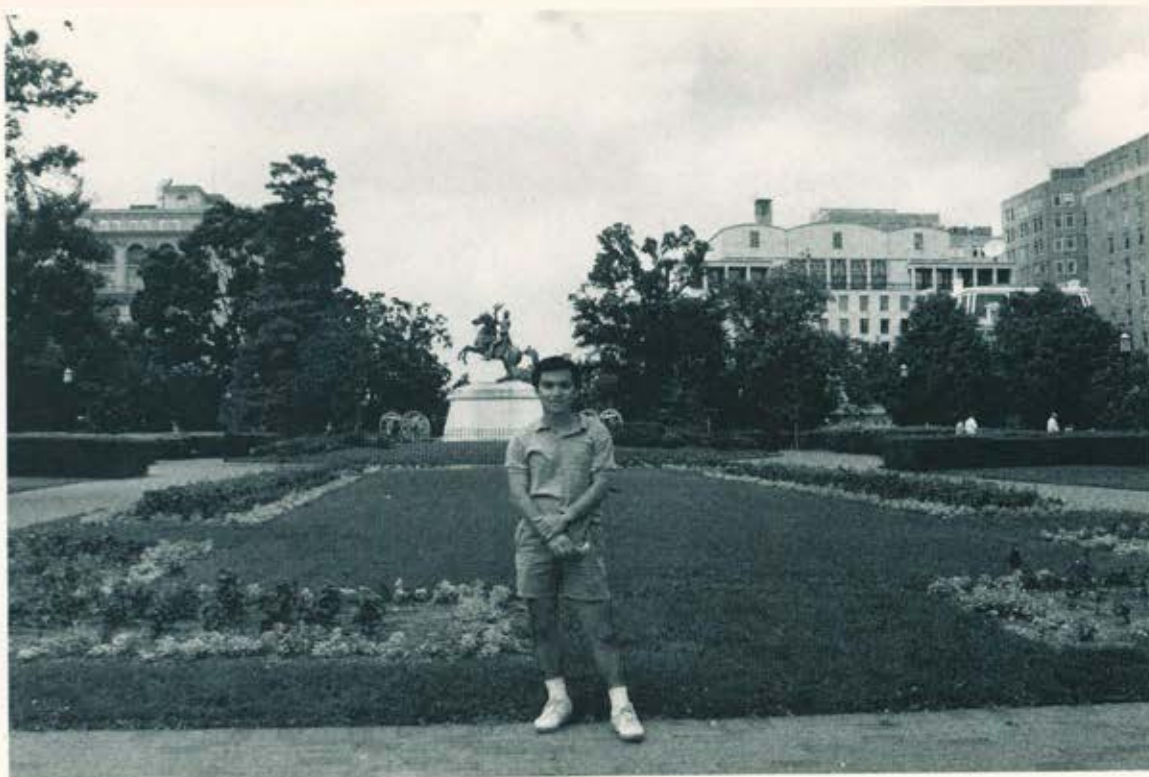

Patient and specimen proudly displayed. How about Viaryl 3-0?

Byron Conner, MSIII, uses his charm on an unsuspecting first year.

Mike Rice, MSIII, as seen just before the men with the little white coat came and took him away! He-He!

Thanh Nguyen, MSIV, enjoys the ambiance of Washington, D.C.

Helpth! Helpth! My thung is
thuck tho my thin.

Ow! I feel good!

*Just give me one more minute
and I'll get it. Well . . . could
you at least give me some old
tests to memorize quickly?*

*A familiar position for medi-
cal students. Hey, what else
is a library for?*

*We give "hitting the slopes" a whole
new meaning.*

See Spot run. Run, Spot, run!

*I'll show you mine if you
show me yours.*

Double your pleasure.

*Future Psychiatrists.
(or is that future
psychotics?)*

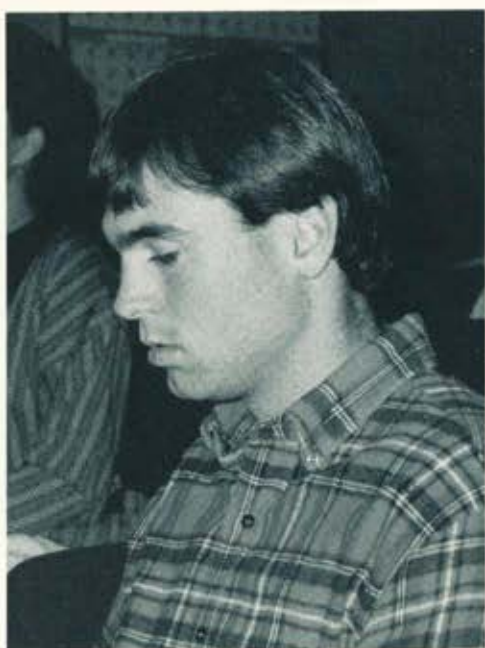

Do You Remember The Time?

Can You . . .

. . . Believe They Are
Doctors Now?

Scary Thought . . .

. . . Isn't It?

Mommy Choices ...

Motherhood or a career, or both? As a young woman working toward a B.S. in chemistry, I expected to take the career track. Then I fell in love, was married right after graduation and decided that the mommy track might not be so bad after all. My husband and I had two sons, and I stayed at home as a full-time mother. Once our children became independent, it was time for me to look at careers once again. In the intervening seventeen years, biochemistry had made tremendous strides in understanding human life at the molecular level. Although I'd never had a biochemistry course, I took a chance and applied to the graduate program in the Biochemistry Department at the Health Sciences Center. They took a chance and accepted a middle-aged woman whose most recent contact with academia had been as a room mother.

My first course, the medical biochemistry class with the first year medical students, was a baptism of fire. Except for the calculation of pH, all the information was new to me. But old study techniques came back, and I found that maturity had brought with it an ability to focus which had somehow eluded me in college. When I was academically behind the younger students, I was able to make up the gap by asking questions after class and by studying supplementary material. In the subsequent five years I've made a good start at learning how to do a scientific investigation and have been able to build up a fair amount of objective information as well.

I'm looking forward to continuing a career in basic research. Graduate school is full of challenges, but my advice to anyone who wants to try graduate work as an older student is — go for it! You can do it.

—Marilyn A. Turnbow

Gregg Richards, a first year medical student, made a deal with himself. If he passed all his subjects during the first semester in medical school, he would shave his head. Many may give claims such as he, but he actually followed through with it. What are his plans for when he graduates?!

The Class of 1996 prepares itself for the FIRST EXAM. What surprise might the second year class have prepared for them.

Death by Exam

While the first year class starts to go numb from anxiety, waiting for their first exam, the second year class prepares their own anatomy lesson.

With Death leading the way, the mindless dromes follow beating their heads with text books. What is the fate of the first years?

Once again, history repeats itself with the parading "Stressbusters" trying to calm the first years.

Does that say beer-fat on Mo's abdomen?

Texas Tech School of Medicine moves toward the twenty-first century as the Pathology department purchased Macintosh computers and laser disc players for use in pathology lab. Students no longer have to use microscopes and atlases to examine specimens, just wave the wand over the bar code or click the mouse.

However, there was some problems. At first, the units were placed in the libraries because there was no way to protect the equipment in the multi-use lab. Many students were frustrated since many studied after library hours and therefore they did not have access to the laboratory materials. Cabinets were installed to house the equipment in the lab, but students still had to check out the laser disc and bar code reader from the library. The problem was solved as badge readers were placed on the lab door; unfortunately, school was over.

Class of 1994 — MSIII

Third year brought many new experiences and excitements. For many it was the first time to see what "doctoring" was all about. *James Brown experiences one of the most dramatic times for a medical student, the operating room. Going on rounds with Mike Rice and Nirmal Jayaseelan always provide excitement for the "real" doctors.*

Match Day!

The Class of 1993 has 42 of its 86 members (49%) choosing primary care specialties in categorical programs in Family Medicine, Internal Medicine, Obstetrics-Gynecology, and Pediatrics.

The Class of 1993 has 86 graduates. Of these, 77 participated in the National Residency Matching Program. From that roster, 73 (95%) were matched with their initial career fields and five additional students needed to find one-year positions prior to entry into their PGY II career choices. One student was matched earlier in the National Urology match, and eight students matched earlier in Military residencies. Of the students participating in the NRMP match, 75% were matched with their first or second choice of residencies.

distinguished group of the "Rich and famous" or could it be: Mike, Doug, Kelly, and Steve!!

If medicine doesn't work out for David Gore, he could take up bartending.

Look out world, here we come!

Robert Smith doesn't share his wife's enthusiasm of finding out where they will be moving.

James Reid shares a toast with his mother.

Match Day . . .

The Party!

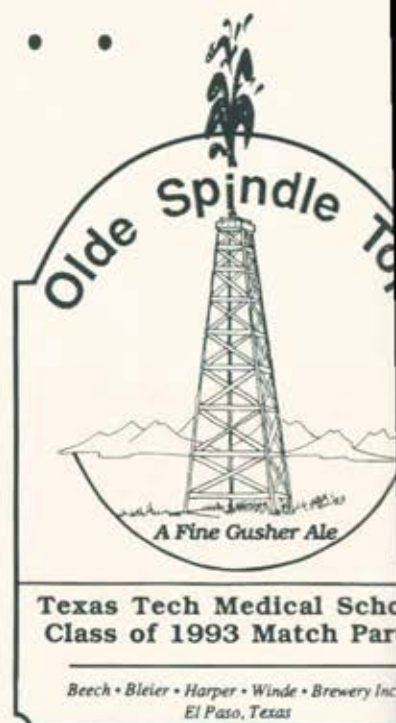

March was not an ordinary day for graduating medical students all over the country. Set aside as "Match Day", that time when MSIVs find out if they matched and with what program, the air on all three campuses was charged with excitement and perhaps a twinge of anxiety.

To work off some of the anxiety, each campus has a post-Match party.

Cheryl Landry, Donna Duran, Christi Caldwell, and Justin Gayle enjoy the evening at "The Spoon".

The Match Day Party in El Paso was held at the Ob-ermiller's home with volleyball and cooking out.

*"Sneakers" was the place to part after the match in Amarillo.
Look who's on stage . . . again!*

Texas Tech School of Medicine-El Paso Class of 1993

Kim Gordon, MSIII, attempts to absorb, via osmosis, some of the wealth of information contained in the gray matter of MSIVs, Jeffrey Grice and Stan Young.

Commencement

Texas Tech University Health Sciences Center held their Graduation Convocation for all three schools Saturday, June 5, 1993 at the Lubbock Memorial Civic Center, bringing to close years of dedicated effort.

Frank H. T. Rhodes, Ph.D., D.S. President of Cornell University, was the featured commencement speaker.

Degrees in Bachelor of Science, Clinical Laboratory Science, Occupational Therapy, Physical Therapy, Nursing, Master of Sciences, Doctor of Philosophy, and Doctor of Medicine were given to 239 graduates.

René Franklin, David Gore, and Jeffrey Grice show their excitement before the big event.

For weeks, as you walked into the TTUHSC library, you would see a sign that would inform you of how many days until graduation.

In 1826 William Macmichael wrote a book entitled *The Gold-Headed Cane*, relating the stories of six physicians who had owned this cane beginning with John Radcliffe, in 1689, and ending with Matthew Baille, whose widow donated it to the Royal College of Physicians in 1825.

As a symbol of excellence and eminence in the medical profession, the cane became the traditional sign that the carrier was a physician, and some in those early days supposed that it contained some magic as symbolic of the staff that was carried by Aesculapius. In a hollowed section of the cane, vinagrette or some other potion was placed. In time of plague, the physician would sniff this as he visited the sick room to ward off the disease as well as the sick room smell.

Dr. Orene Peddicord and Dr. John McKenna suggested that the Texas Tech University School of Medicine establish the award to be given to that member of the graduating class voted by the faculty as most likely to become a good physician. A cane as close in appearance to the one at the Royal College as possible was purchased from a firm in Boston. The cane was to be the only award given at commencement, and was to be carried in procession by the Dean of the School of Medicine. In recent years, the honor of carrying the cane goes to the recipient of the award. A gold band, inscribed with the recipient's name and date, is attached to the shaft of the cane.

The cane is kept in a case in the Library of the Health Sciences with a plaque listing the names of the awardees.

The 1993 Recipient of the Gold-Headed Cane Award is Patrick William Shovlin III, M.D.

Commencement Speaker Frank H. T. Rhodes, Ph.D., D.Sc., addresses the HSC graduates.

Tech loses both sets of twins this year. Seen left to right are Kelly and Krystal Scoggins, Brad and Britt Allen (I think?).

Dr. Peggy Coffey and Dr. Kim Schup at the reception following commencement.

Patrick Shovlin III, M.D., the recipient of the Gold-Headed Cane Award, leads the Declaration of Geneva, the pledge of the Medical profession

Saima Lodhi adjusts her cap moments before the processional.

The wearing of academic dress at commencement dates from the early history of the oldest universities somewhere in the twelfth or thirteenth century. Since educated people were almost always of the clergy, the black gown is somewhat of an adaptation of the *cope*, a mantle of *silk* or other cloth worn by church dignitaries in processions and on other occasions. The long gown and *cowl* (similar to the academic hood of today) were worn by priests and monks for warmth in the cold medieval buildings.

TTUHSC Medical School Class of 1993 at the Dean's Convocation, June 4, 1993.

Cheryl Landry, the Banner Bearer for the School of Medicine, is followed by Patrick Shovlin III, the Student Marshal.

Both Jackie Wright and C. David Morgan receive their Ph.D. degrees. While Jackie got hers from the Department of Physiology, David got his from across the hall in the Department of Microbiology and Immunology.

Gina James, M.S. is still a little in shock during the Recessional.

Krystal Scoggins receives her diploma from Dean Pat Yoder-Wise

Declaration of Geneva

At the time of being admitted as a member of the Medical profession, I solemnly pledge myself to consecrate my life to the service of humanity.

I will give to my teachers the respect and gratitude which is their due;

I will practice my profession with conscience and dignity;

The health of my patient will be my first consideration;

I will respect the secrets which are confided in me;

I will maintain by all the means in my power, the honor and noble traditions of the medical profession;

My colleagues will be my brothers;

I will not permit consideration of religion, nationality, race, party politics or social standing to intervene between my duty and my patient;

I will maintain the utmost respect for human life; even under threat,

I will not use my medical knowledge contrary to the laws of humanity.

I make these promises solemnly, freely and upon my honor.

Vanessa Castleberry, Photographer

Thanks!

Dear Reader,

To put together a book such as this, it takes a commitment of time and money. I would like to thank the Student Senate for funding this and the alumni for the extra financial support.

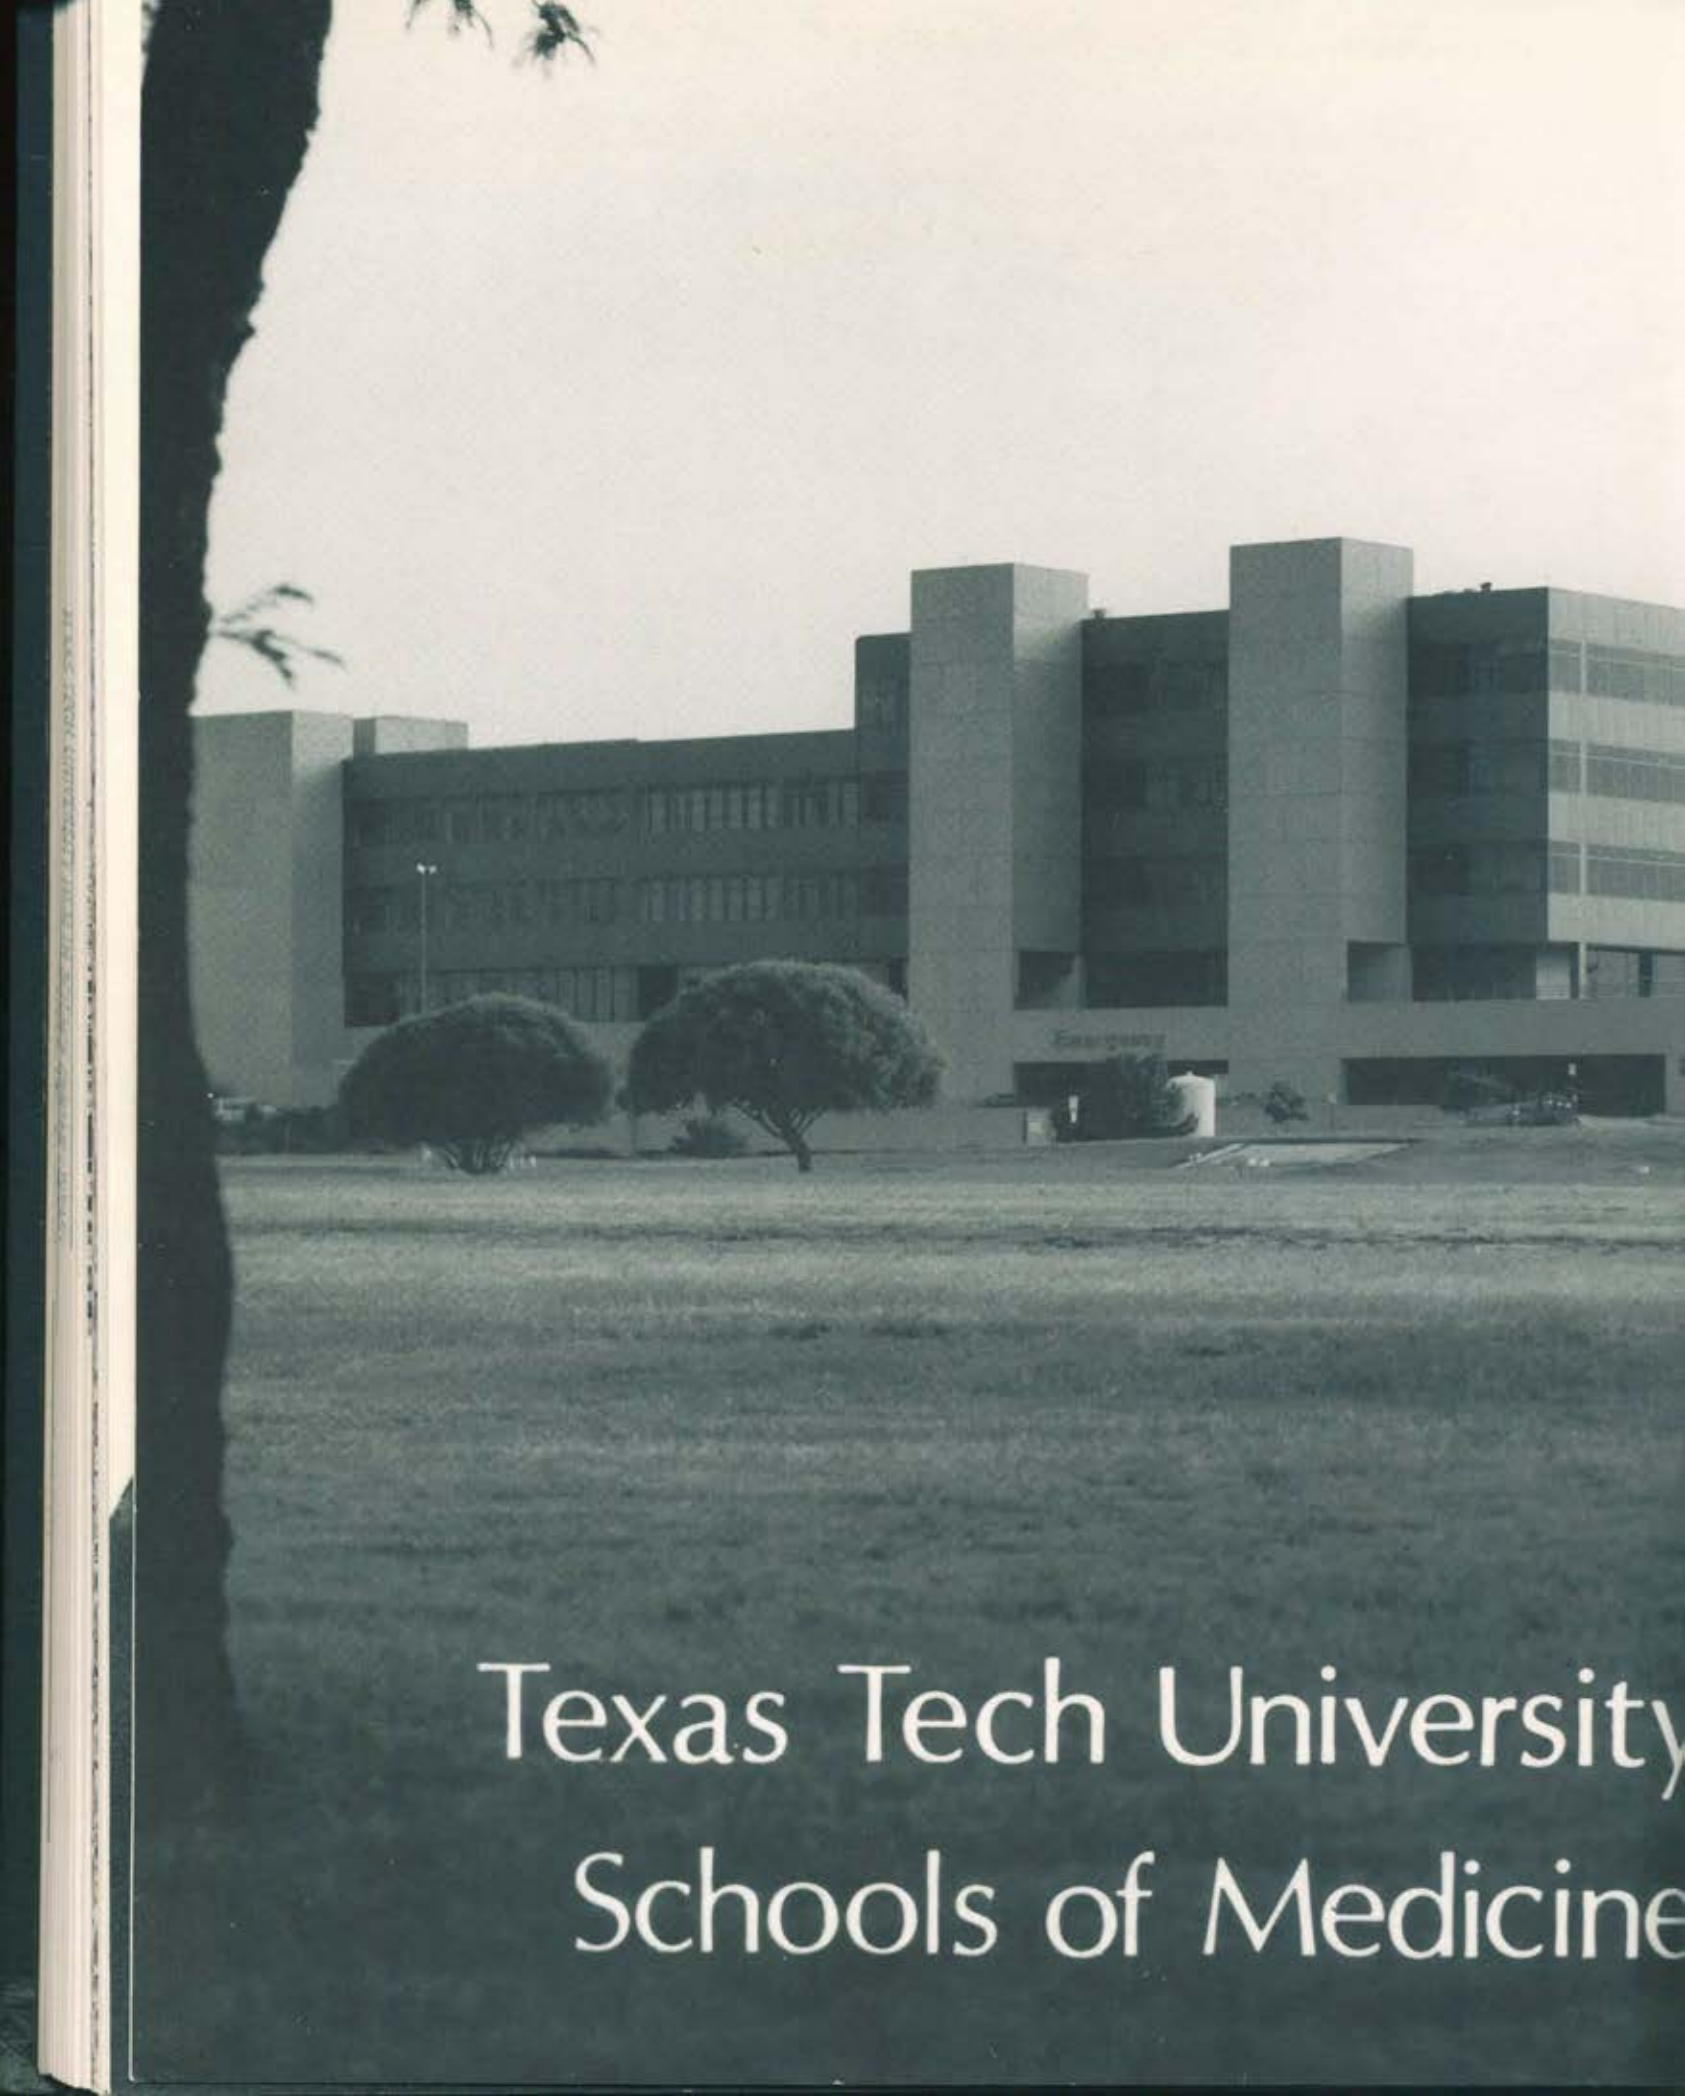

Much appreciation goes to the Office of Student Services for all the help they gave my staff and I. I would especially like to thank Jossie Lethridge, Marilyn Buchanan, Mia Myers, Vonnie Somerville, Donna Davis, and Jane Carter. I don't think I could have done this without their help. They are marvelous.

Even though there was a small staff this year, it was a dedicated staff. Mark Chaney was a terrific associate editor. He provided the beautiful color pictures in the front. He is such a great photographer. In fact, I had many wonderful photographers including Kenny Brantley, Vanessa Castleberry, and Hai-Linh Bui. I hope I didn't leave anyone out!

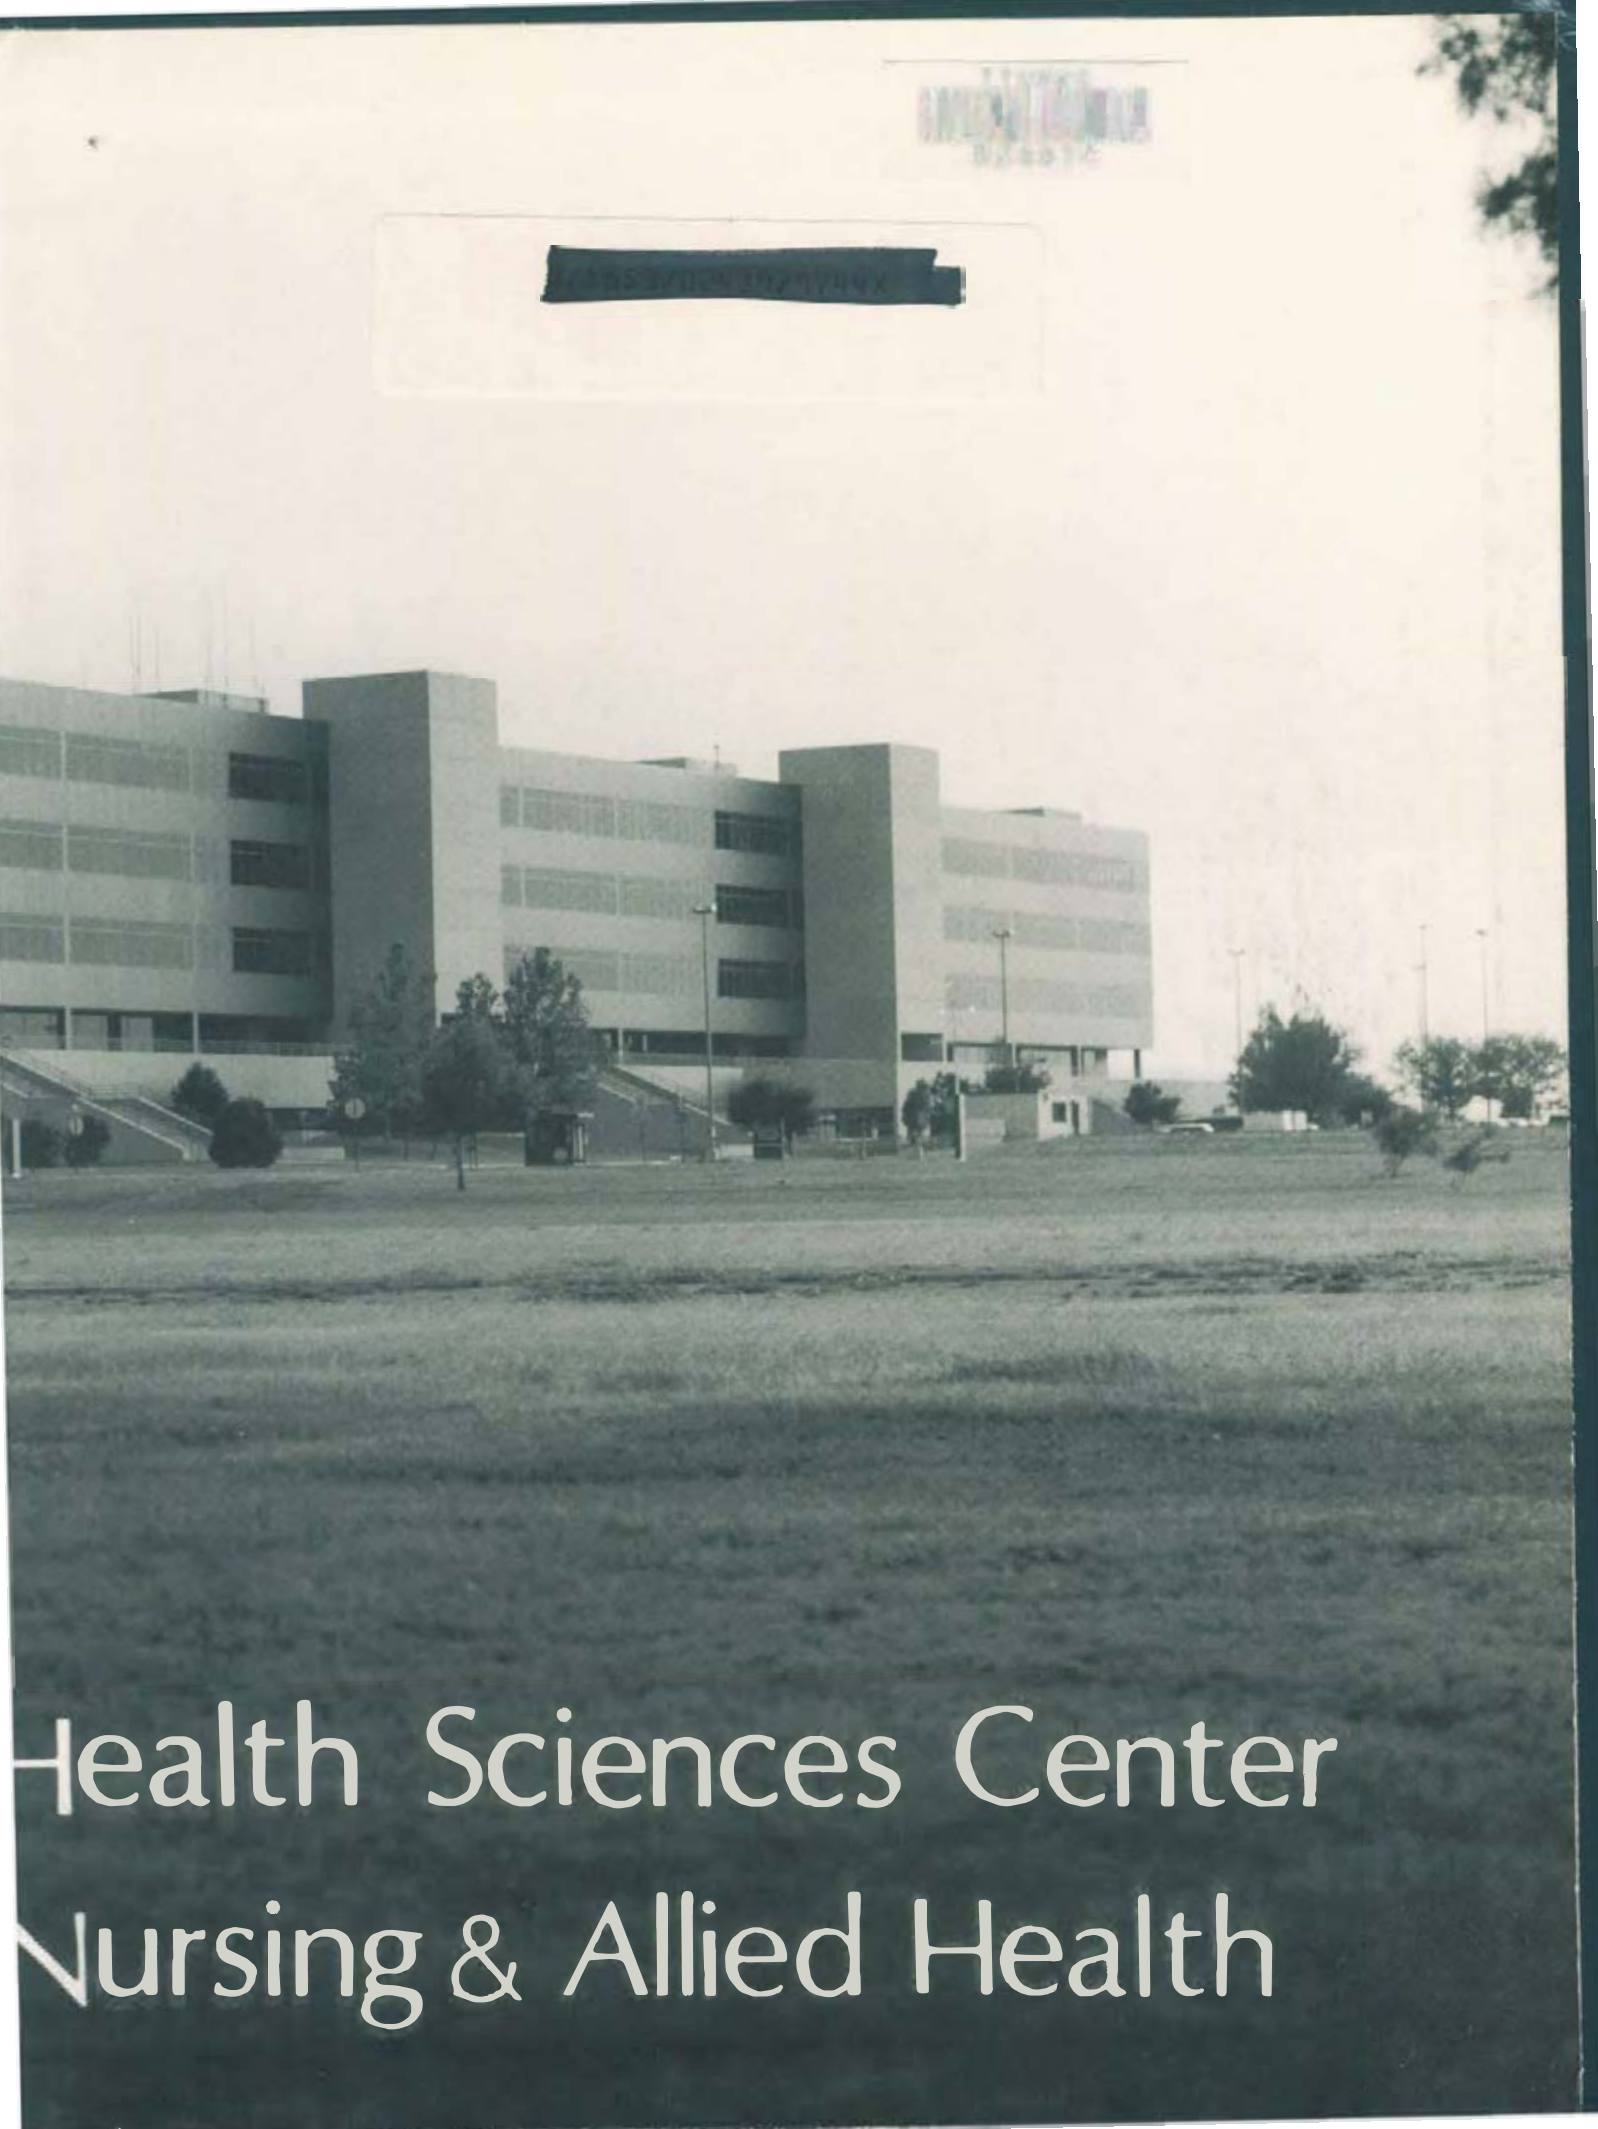

Good luck to everyone, and have a wonder life.
