Libraries

FACTS AT A GLANCE

The Harrington Library of the Health Sciences Center serves the TTUHSC Schools of Medicine, Pharmacy and Allied Health on the Amarillo campus.

As the northern anchor to the TTUHSC five-library array, and the major resource of biomedical information in Northwest Texas, we also offer support to the health professionals, hospitals, clinics and the general public throughout the Panhandle.

Three professional librarians, three classified staff and a group of student workers staff the Harrington Library.

RefWorks Information

What is RefWorks?

“RefWorks \(\rightarrow\) allows users to create personal databases and use them for a variety of research activities. References are quickly and easily imported from text files or online databases. The databases can then be used to manage, store, and share the information. Users can automatically insert references from their database into their papers and generate formatted bibliographies and manuscripts in seconds.”

Why use a Web-based research management system like RefWorks?

RefWorks \(\rightarrow\) is accessible at any time from any computer with an Internet connection. It can be used with any major Web browser on multiple platforms, including Windows, Mac, and Unix. References can be imported quickly and easily from many online database systems or created manually, then easily shared online with colleagues. And RefWorks is updated automatically at no extra charge.
Get started now with four easy steps:

1. Enter your subscriber information.
   - Your Name:
   - Email Address:
   - Login Name:
   - Area of Focus: Select your focus area
   - Type of User: Select your user type
   - Password:
   - Re-enter Password:

2. Create a database by automatically importing data from online services or by typing references in manually.

3. Create a paper in your word processor inserting reference ID numbers in the locations you want to cite references. Save and close the file.

4. From RefWorks select Bibliography. Create and browse and locate the paper to format. Select the output style you want to use. Click Create Bibliography and save your formatted paper to your computer.

That's it... your paper is formatted correctly and the bibliography automatically created.
