

Blanton Drug List:

General Anesthetics

Inhalational agents

Desflurane, Isoflurane, Sevoflurane, Nitrous Oxide

Intravenous agents

Propofol/Fospropofol, Ketamine, Etomidate, Methohexital, Thiopental

Intravenous Adjuncts

Fentanyl, Alfentanil, Remifentanyl, Sufentanyl, Midazolam

Local Anesthetics

Ester local anesthetics

Procaine; Chloroprocaine; Tetracaine; Cocaine; Benzocaine

Amide local anesthetics

Lidocaine; Bupivacaine

Vasoconstrictors

Epinephrine; Norepinephrine; Phenylephrine; Vasopressin

Narcotic Analgesics

Narcotic analgesics

Morphine; (Heroin); (Oxycodone); Methadone; Meperidine; Fentanyl; Sufentanyl; Codeine; Propoxyphene; Diphenoxylate; Loperamide; Pentazocine; Butorphanol; Buprenorphine

Antitussive

Dextromorphan

Opioid Antagonists

Naloxone; Naltrexone; Naloxegol

Antidepressants

MAO Inhibitors

Tranylcypromine; Selegiline

TCA

Imipramine; desipramine; amitriptyline; nortriptyline

Heterocyclics and other antidepressants

Amoxipine; maprotiline; trazadone; bupropion

SSRI

Fluoxetine; sertraline; paroxetine; citalopram; escitalopram; vilazodone

SNRI

Venlafaxine; duloxetine

[**For bipolar disorder**- lithium; (valproic acid; carbamazepine; lamotrigine- see anticonvulsants; (aripiprazole; see antipsychotics)]

Hypnotics/Antianxiety Drugs

Note: for anxiety SSRI's (e.g. fluoxetine; paroxetine) and SNRI's (e.g. venlafaxine) are first line treatment. These have been covered and are not used as hypnotics.

(Barbiturates) Phenobarbital; (benzodiazepines) Diazepam, Alprazolam; Triazolam; (benzodiazepine antagonist) Flumazenil

Hypnotics/anxiolytics that are not benzodiazepines, but bind to same site on GABA_AR (Zolpidem; Zalepon; Eszopicline)

Other hypnotics Choral hydrate; Ramelteon; Suvorexant

Other anxiolytics Buspirone; Meprobamate

Antipsychotic Drugs

Typical Antipsychotics :

- First generation Antipsychotic Agents (Low Potency):
 - Chlorpromazine – Prototype
 - Prochlorperazine (Compazine)
 - Thioridazine (Mellaril)
- First generation Antipsychotic Agents (High Potency):
 - Fluphenazine (Prolixin)
 - Haloperidol (Haldol)
 - Thiothixene (Navane)
- Miscellaneous
 - Pimozide (Orap)

Atypical Antipsychotics:

- **Second Generation Antipsychotic Agents :**
 - Clozapine (Clozaril)
 - Risperidone (Resperdal)
 - Olanzapine (Zyprexa)
 - Quetiapine (Seroquel)
 - Ziprasidone (Geodone)
 - Aripiprazole (Abilify)

Mood Stabilizers:

Lithium

valproic acid; carbamazepine; lamotrigine (see anticonvulsants)

Anticonvulsants

Phenytoin; carbamazepine; phenobarbital; ethosuximide; valproic acid; diazepam; lorazepam; pentobarbital; vigabatrin; felbamate; gabapentin; lamotrigine
