

RADIOLOGY

ELECTIVE rotation

This is a onetime rotation and is not planned by PGY level.

Goals:

1. Achieve knowledge in the usefulness of radiologic procedures in clinical oncology.
2. Learn diagnostic and therapeutic indications for CT and CT-PET in oncology.

Objectives:

1. Fellows will spend 2 weeks rotation in radiology.
2. Fellows will spend 2 of those days on CT-PET and 3 days on CT.

Evaluation:

Attendance and participation, as evaluated in post-rotation follow-up call.
