Academic Year Bulletin

This bulletin is a publication of Texas Tech University Health Sciences Center School of Pharmacy containing information concerning policies, regulations, procedures, programs, courses, schedules, and fees.

The University reserves the right to change curricula, rules, fees, admission requirements, and other requirements without notice. The provisions for this Bulletin do not constitute a contract, express or implied, between any applicant, student, faculty member, or any other person and Texas Tech University Health Sciences Center (TTUHSC).

Texas Tech University Health Sciences Center is open to all persons regardless of race, religion, gender, lifestyle, sexual orientation, disability, or national origin who are otherwise eligible for admission as students.

Once admitted, students need to keep themselves apprised of rules and regulations pertaining to the School of Pharmacy found in the Bulletin and to Texas Tech University, found in the Texas Tech University Health Sciences Center Student Affairs Handbook.

This Bulletin is published by Texas Tech University Health Sciences Center School of Pharmacy, Amarillo, Texas 79106.

Steven L. Berk, M.D., Executive Vice President and Provost
Penny Harkey, Vice President and Chief Financial Officer
Quentin R. Smith, PhR, Senior Vice President for Research
Rial Rolfe, Ph.D., MBA, Executive Vice President for Academic Affairs
Vince Fell, Vice President for Information Technology and CIO
Billy U. Philips, Jr., Ph.D., Executive Vice President, F. Marie Hall Institute for Rural and Community Health

MISSION STATEMENT OF THE HEALTH SCIENCES CENTER

As a comprehensive health sciences center, our mission is to enrich the lives of others by educating students to become collaborative healthcare professionals, providing excellent patient care, and advancing knowledge through innovative research.

VISION STATEMENT OF THE HEALTH SCIENCES CENTER

Texas Tech University Health Sciences Center will strengthen its national reputation as it seeks to promote healthier communities across West Texas and beyond.

SCHOOL OF PHARMACY ADMINISTRATION

Quentin R. Smith, Ph.D., Dean

Charles F. Seifert, Pharm.D., Senior Executive Associate Dean and Regional Dean, Lubbock

Thomas J. Thekkumkara, Ph.D., Regional Dean, Amarillo

Sara Brouse, Pharm.D., FCCP, BCPS AQ Cardiology, Regional Dean, Abilene

Steven Pass, PharmD., FCCM, FCCP, FASCP, BCPS, Regional Dean, Dallas

Eric MacLaughlin, PharmD, FCCP, BCPS, Chair, Pharmacy Practice

Thomas Abbruscato, Ph.D., Chair, Pharmaceutical Sciences

Rebecca Sleeper-Irons, Pharm.D., FCCP, FASCP, BCPS, Associate Dean for Academic Affairs

Sachin Shah, PharmD, BCOP, FCCP Associate Dean for Accreditation and Outcomes Assessment

Krystal Edwards, PharmD BCPS/ Kenna Payne, BCPS Associate Deans for Professional Affairs

Sanjay Srivastava, Ph.D., Associate Dean for the Sciences

Thomas J. Thekkumkara, Ph.D., Senior Associate Dean of Student Affairs and Admissions

Summer W. Balcer, M.Ed., Senior Director of Student Affairs and Admissions

Dean's Message

The residents of the Texas Panhandle worked for many years to build a pharmacy school. It was the vision of a dedicated group of pharmacists, citizens, and legislators to provide pharmacy education in West Texas.

Today that vision has become evident on the horizon of Amarillo, in the lower plain of Lubbock, the busy streets of Dallas/Fort Worth, and in 2007, the citizens of Abilene dedicated the new campus. The Texas Tech School of Pharmacy has made a significant impact on the health and well-being of many Texas citizens.

Faculty, staff, and, yes, doctoral candidates have come together to provide for the future of pharmacy and patient care. We offer an innovative curriculum. We have progressive teaching methods and technologies that will prepare students for pharmacy practice today and for the years to come. I can assure you that you will be intellectually challenged over the next four years.

I invite you to join in the excitement of the Texas Tech School of Pharmacy. You will partner with other health care professionals to provide patient care. You will make a difference and we want to provide you with the knowledge and skills to make that difference be the very best.

SCHOOL OF PHARMACY PHILOSOPHY

Traditionally, the pharmacist's role has been that of a dispenser of medications. However, this traditional method of practice is no longer adequate to ensure safety and effectiveness in the use of medications and health devices. The focus of practice must change from one of product distribution to a more expansive duty, assuming the responsibility for our patients' outcomes from the medications we dispense.

Health care reform has put an emphasis on primary health care. This emphasis coupled with a lack of access, increasingly rising costs, and a concern for quality is placing the pharmacist in an important role as a member of the primary health care delivery team.

Pharmacists are located in most rural communities and throughout inner cities and urban sprawl across the country. This physical placement of the pharmacist, who is trained in delivering comprehensive care to the public, allows access to primary health care where it is critically lacking. The role of the pharmacist as a member of the primary health care team does not replace the physician, physician assistant, or nurse practitioner but enhances their effectiveness. The pharmaceutical services provided in this changing arena include participating in the drug therapy decision process through recommending therapeutic objectives, selecting the most appropriate drug product to achieve the desired therapeutic outcomes given the patient's unique characteristics, determining dose and dosage schedule, selecting the drug product source of supply and drug preparation, and monitoring the patient's response to the therapy so that the patient receives the optimal benefits with minimal adverse drug effects. Texas Tech University Health Sciences Center (TTUHSC) School of Pharmacy offers the degree of Doctor of Pharmacy (Pharm.D.) with this expanded role of the pharmacist in mind. The effective delivery of essential primary health care services requires a greater responsibility of the pharmacist and a greater depth and breadth of education to support it.

It is a goal of all educators to foster within students the desire to learn and the ability to discover. Our curriculum has been designed to encourage intellectual development and help the student become a competent and skilled professional pharmacist. This is accomplished through conceptual competence, technical competence, integrated competence, and career marketability.

Pharmaceutical education must provide students a fundamentally strong science base enabling them to understand the progression of diseases and how drug therapy can influence or reverse this process.

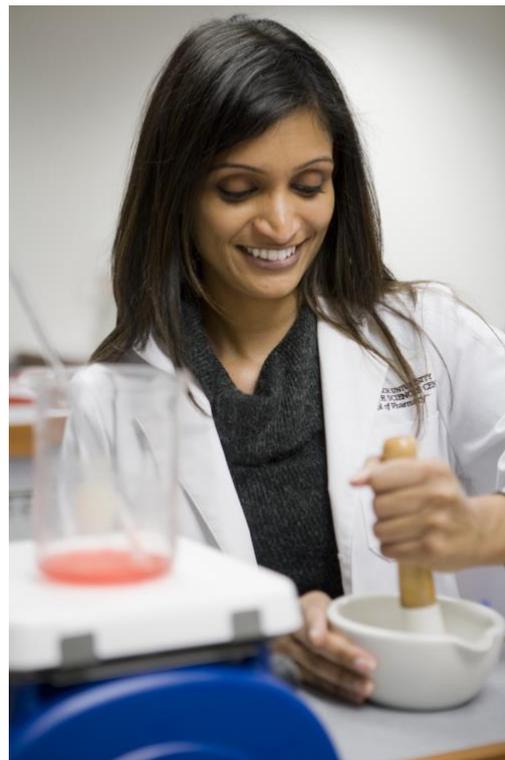

Pharmacists evaluate clinical studies and use data to reach conclusions regarding a variety of issues.

Graduates must be mathematically competent in the resolution of problems related to drug therapy.

Analytical thinking must be cultivated allowing today's pharmacy pharmacist to be effective in decision making. Communication skills are essential in preparing the student to be an effective pharmacist.

Graduates must have an understanding of the social context in which their profession is practiced. They must learn to first listen in order to effectively convey information regarding drug therapies. There must also be sensitivity to patients of all socio-economic levels and cultural backgrounds whose native language is not English.

TTUHSC School of Pharmacy's program is student centered, focusing on problem-based educational strategies. The curriculum provides an integrated course context of pathophysiology, pharmacology, medicinal chemistry, and therapeutics, built on a solid understanding of the biomedical sciences. It offers expanded practice management instruction and clinical experiences early and throughout the four-year professional program. Each of the curricular and instructional strategies has been precisely balanced to give the academic and clinical preparation to optimally succeed in any pharmaceutical profession.

MISSION STATEMENT

Our mission is to enhance the lives of the diverse people of Texas and beyond, through excellence and innovation in: educating health-care practitioners, researchers, and educators, providing pharmaceutical care and service, and advancing knowledge through scholarship.

VISION STATEMENT

Our vision is to become internationally recognized for expanding the pharmacist's role as a leader in healthcare by developing models and excellence in patient-centered care and collaborative drug therapy management through an innovative educational curriculum, while advancing healthcare and science through cutting-edge research.

CULTURE STATEMENT

Our culture - the way we live and act - is created by a strong commitment to a set of core values based on mutual respect, professionalism, and integrity. As a community of learners, we are committed to...

- A student-centered, positive learning community. We foster a personal dedication to the pharmacy profession and excellence in education, practice, and research.

- Collaborative interpersonal relationships—defined as mutual learning, open communication, and shared responsibility among faculty, administration, and students.
- Compassionate care, an unwavering dedication, to each patient’s pharmaceutical care needs.
- This care is supported by sound biological and behavioral understanding of healthcare.
- Community involvement and serving the healthcare needs of the citizens of Texas. Our outreach projects enrich our community and provide students with a sense of public responsibility. Life-long learning and a willingness to change, be progressive, make timely and vigilant decisions, and evaluate our performances against stated goals.

OUTCOMES

The results of embracing and living the TTUHSC School of Pharmacy values are excellence, innovative pharmaceutical education, preparation of professionals with an unwavering ethical foundation, a positive, rewarding and stimulating work environment, and a noticeable and positive impact on the communities in which we work, study, and live as well as academic and healthcare environments that encourage open debate and dialogue, the introduction of new ideas and practices, innovation through collaboration, and an unwavering commitment to self-improvement.

ACCREDITATION

The Doctor of Pharmacy Program of the Texas Tech University Health Sciences Center is fully accredited by the Accreditation Council for Pharmacy Education (ACPE). Questions about the accreditation status of the Texas Tech University Doctor of Pharmacy Program may be directed to the Accreditation Council for Pharmacy Education at 135 S. LaSalle Street, Suite 4100, Chicago, Illinois 60603 (telephone 312-664-3575).

The Texas Tech University Health Sciences Center is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award baccalaureate, masters, doctoral, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the Texas Tech University Health Sciences Center. The Commission should be contacted only if there is evidence that appears to support the institution’s significant non-compliance with a requirement or standard.

PURPOSES AND FUNCTIONS

The purpose of the program is to prepare entry-level pharmacy practitioners with minimum competencies in the following areas:

1. Provide patient centered care which is defined as the ability to design implement, monitor, evaluate, and adjust pharmacy care plans as well as manage a patient-centered practice to include establishing, marketing, and being compensated for medication therapy management and patient care services rendered.
2. Manage human, physical, medical, informational, and technological resources, which is defined as the ability to ensure efficient, cost-effective use of resources in the provision of patient care.

3. Manage medication-use systems, which is defined as the ability to apply patient-and population-specific data quality improvement strategies, medication safety and error reduction programs, and research processes to minimize drug misadventures and optimize patient outcomes; to participate in the development of drug use and health policy; and to help design pharmacy benefits.
4. Promote the availability of effective health and disease prevention services and health policy, which is defined as the ability to apply population-specific data, quality improvement strategies, informatics, and research processes to identify and solve public health problems and to develop health policy.
5. Provide population based care, which is defined as the ability to develop and implement population-specific, evidence based disease management programs and protocols.

GENERAL INFORMATION

History

The Texas Tech University Health Sciences Center was created with the establishment of the School of Medicine by the 61st Texas Legislature in May, 1969 as a multi-campus system, establishing Lubbock as the central administrative unit with other regional campuses. The School of Medicine formally opened in 1972. The Amarillo campus accepted medical residents as follows: 1974 - Family Medicine, 1978 - Pediatrics, 1979 - OB, 1982 - Internal Medicine and Psychology/Neurology, 1988 - Internal Medicine/ Pediatrics. The first medical students entered class in Amarillo in 1978.

The School of Nursing was initiated with the first class in 1981. Nursing education is focused in Lubbock and Odessa. West Texas A&M University and Amarillo College offer nursing programs at the associate, baccalaureate, and masters level in the Panhandle.

In 1993, the 73rd Texas Legislature approved an expansion of the School of Allied Health, which was established in 1983, and a new School of Pharmacy. Pharmacy is the first academic program of the University to be administratively based outside the main campus in Lubbock. These two schools have expanded the missions of Texas Tech University Health Sciences Center at Amarillo.

The Allied Health curriculum at Amarillo currently is divided into two programs, physical therapy and occupational therapy. Other programs offered by the school at other campuses include Medical Technology, Communications Disorders, and Emergency Medical Technology.

The School of Pharmacy

The School of Pharmacy accepted its first class of 64 full-time students into the professional program beginning Fall, 1996. Currently, 155 students are admitted once each year in the fall semester. Students may be admitted to the Amarillo, Abilene or Dallas campus as first year students. If admitted to the Amarillo campus, students spend their first two years on the Amarillo campus then complete their third and fourth years on one of the regional campuses – Amarillo, Dallas/Fort Worth, or Lubbock. If

assigned to Abilene or Dallas, most students will stay at that campus for the duration of their pharmacy education, with some possible clerkship experiences at regional campuses. The School of Pharmacy has more than 620 students enrolled in professional and postgraduate programs. The School of Pharmacy employs approximately 94 full-time equivalent faculty, 45 post-doctoral pharmacy residents, and 37 graduate teaching and research assistants; approximately 67 staff serve the students and programs of the School.

Amarillo

The School of Pharmacy's Amarillo program is based in two buildings: The Pharmacy building, a 102,000 sq. ft. building (built in 1996) on the Amarillo campus of the Texas Tech University Health Sciences Center, and the adjacent Pharmacy Academic Center, a 23,000 sq. ft. building (built in 2009). The original pharmacy building was provided through funds donated by the people of Amarillo. The Pharmacy building features a 240-seat lecture center and four classrooms offering interactive video conferencing capabilities and network capabilities. In addition, the Pharmacy Academic Center features two 120-seat classrooms. These classrooms allow students to actively participate with any campus' instruction while also having computer access to images via the Internet. Other facilities include a Simulation Center, multiple small group conference/study rooms, the Texas Pharmacy Museum, teaching laboratories (drug formulation, sterile products), and student lounges.

The School of Pharmacy is located directly across Coulter Drive from Northwest Texas Hospital. The campus is comprised of the School of Pharmacy, Medicine, Allied Health, Nursing, and the Graduate School of Biomedical Sciences. Other entities include the Texas Tech Physicians Clinic, the Amarillo Research Building, the Laura Bush Institute for Women's Health, and the TTUHSC Regional Library.

Abilene

The Abilene campus is housed in a 35,000 sq. ft. building located adjacent to the Hendrick Medical Center. It offers two video conferencing classrooms outfitted with high speed data ports for each student, two flexible seating classrooms, a drug information center, six case study rooms, a teaching laboratory for compounding and dispensing drugs, a patient counseling practice room, a physical assessment laboratory, a student lounge and study areas, and a 4,600 sq. ft. research laboratory. The Abilene campus is comprised of the School of Pharmacy, School of Nursing, and School of Public Health.

Dallas / Fort Worth

The Dallas/Fort Worth campus supports all four years of the Pharmacy program. Students may complete all four years in Dallas, or may choose to complete their last two years in Dallas after the first two years in Amarillo. The School has two buildings; one on the campus of the Dallas Veterans Affairs Medical Center and the other is within the central Dallas Medical District. The Pharmacy School building on the Dallas VA campus is approximately 10,000 sq. ft. and houses a P3 classroom linked to the other campuses, administrative and faculty offices, small group study rooms, and a student lounge. The campus located within the Dallas Medical District classrooms for the P1 through P3 years linked to other campuses, a compounding lab, virtual anatomy lab, small group study rooms, administrative and faculty offices, and student lounges. Students have rotations among numerous hospitals, clinics, and community pharmacies throughout the Metroplex, working on teams of medical students and other health professionals throughout their four years.

Lubbock

The Lubbock campus is part of the TTUHSC complex on the Texas Tech University campus. Lubbock students have access to all facilities and programs that a comprehensive health sciences center and major academic campus of more than 30,000 students offer. Pharmacy students share classrooms, clinics, and hospitals with medical, nursing, and other allied health sciences students.

AFFILIATED TEACHING HOSPITALS

School of Pharmacy faculty and students provide patient care in the following hospitals:

Amarillo VAMC

The Amarillo Department of Veterans Affairs Medical Center is a 254 bed general medicine and surgery facility employing 850 people. It offers health services to a large geographic area encompassing the Texas Panhandle as well as parts of New Mexico, Oklahoma, Colorado, and Kansas. The medical center has a highly complex pharmacy offering a wide variety of service to include total computerization, unit dose, I.V. admixture, oncology preparation, drug information, investigational drugs, and an open front outpatient pharmacy. Special programs are pharmacist-directed lipid, ulcer, and anticoagulant clinics.

Baptist/Saint Anthony's Healthcare System

This combined healthcare facility is jointly licensed as a 746-bed acute care medical surgical facility. Current pharmacy practice includes the traditional aspect of unit dose distribution as well as clinical services such as target-drug monitoring, a decentralized pharmacy, drug information, clinical interventions, creatinine-clearance estimations, and dosage adjustment recommendations. Staff pharmacists also participate in patient teaching programs.

Northwest Texas Healthcare System

Northwest Texas Hospital is a 300 bed general acute care hospital with services in Pediatrics, Pediatric Intensive Care, Labor & Delivery, Neonatal Intensive Care, Amarillo Emergency Receiving Center, and medical and surgical services including, Medical and Surgical Intensive Care, Coronary Intensive Care, and Level II Trauma Center Services. Pharmacists are actively involved in drug information counseling, patient profile review and drug monitoring, pharmacy and therapeutics functions, medication use evaluation, adverse drug reaction reporting, improving the quality of drug therapy, cost containment, assisting in Code Blue responses, documenting their impact on drug therapy, and continuous quality improvement and total quality management team activities.

ABILENE

Hendrick Medical Center

For more than 85 years, the Hendrick name has been the first name in healthcare in Abilene, Texas, and the Texas Midwest. As the first healthcare network to establish a true system of services, the Hendrick name reigns over a 522-bed medical center, a women's center, rehabilitation hospital, cancer center, and numerous other innovative services.

Abilene Regional Medical Center

A 231-bed facility with inpatient, outpatient, medical, surgical, and emergency care as well as an Accredited Chest Pain Center with PCI and the area's only Neonatal Intensive Care Unit.

DALLAS/FORT WORTH

VA North Texas Health Care System

The VA North Texas Health Care System (VANTHCS) hospital is the primary teaching site of Texas Tech Health Sciences Center School of Pharmacy (Dallas/Ft. Worth Regional Center). The School of Pharmacy's VA building is physically located on the campus of the VANTHCS, and many clinical pharmacy faculty practice and teach at the VA facilities. The mission of the VANTHCS is to provide quality patient care to veterans, facilitate an environment for excellence in education, establish a climate which enhances research, and support the Department of Defense in a national emergency.

Baylor Health Care System

The Baylor Health Care System has facilities located in Dallas, Fort Worth, Garland, Grapevine, Irving, Waxahachie, and Plano. All of these sites are exemplary, experiential clerkship sites utilized by the School of Pharmacy. Baylor Dallas has exemplified excellence in patient care, medical education, research, and community service. *U.S. News & World Report* has ranked Baylor Dallas among the best hospitals in the United States. Baylor Dallas is ranked among the 50 top hospitals in each of the following six specialties: digestive disorders (ranked 18); gynecology (19); heart & heart surgery (26); kidney disease (39); neurology & neurosurgery (34); and orthopedics (20).

Texas Health Resources

Texas Health Resources (THR) is one of the largest faith-based, nonprofit healthcare delivery systems in the United States. The system serves more than 6.2 million people living in 29 counties in north central Texas. In 2003, more than one in five area residents receiving in-patient care sought treatment at a THR hospital. THR was formed in 1997 with the merger of Fort Worth-based Harris Methodist Health System and Dallas-based Presbyterian Healthcare Resources. Later that year, Arlington Memorial Hospital joined the THR system. THR has 13 hospitals with 2,405 licensed hospital beds,

employs more than 17,300 people, and counts more than 3,200 physicians with active staff privileges at its hospitals. Experiential clerkship sites are highly sought by Texas Tech Health Sciences Center School of Pharmacy students.

Methodist Health Systems

Methodist Health System offers health and hope to more than 300,000 people a year at its hospitals and family health centers in North Texas. From education and health screenings to multi-organ transplants and advanced cancer treatment and care, it serves the community with some of the latest in preventive, diagnostic, and treatment technology. Every program and treatment is part of their resolve to be an active and compassionate partner in the good health of the entire community. School of Pharmacy students seek unique experiential clerkship sites at Methodist Health System.

Children's Medical Center Dallas

Children's is a private, not-for-profit institution. It is the only Dallas healthcare facility that deals exclusively with a variety of diseases and disorders among children from birth to age 18. The center is licensed for 406 beds, including a 52-bed pediatric intensive care. The hospital also has more than 50 outpatient clinics and a state-of-the-art emergency center designed specifically for children. Children's is one of only 14 national pediatric research centers sanctioned by the National Institutes of Health. Faculty members of the University of Texas Southwestern Medical Center at Dallas are members of the Children's medical staff. They conduct research that is instrumental in developing treatments, therapies, and greater understanding of pediatric diseases. This research is nationally recognized for programs devoted to cancer, cardiothoracic, neonatology, kidney disease, infectious disease, pharmacology, sickle cell disease, and psychiatry. Specialized training in pediatric pharmacy is critical to School of Pharmacy students.

Cook Children's Health Care System

Cook Children's Hospital is a private, not-for-profit institution. It is the only Fort Worth healthcare facility that deals exclusively with a variety of diseases and disorders among children from birth to age 18. The medical center is licensed for 282 beds designed specifically for children. Cook's provides quality health care to children through an integrated system which oversees a continuum of services ranging from simple preventive checkups at pediatrician's offices to highly specialized hospital-based critical care. Specialized training in pediatric pharmacy is critical to School of Pharmacy students.

LUBBOCK

Covenant Health System

Covenant Health System is the largest healthcare institution in the West Texas and eastern New

Mexico region with 1338 licensed beds, 4,500 employees, and more than 600 admitting physicians at its cornerstone facilities in Lubbock including Covenant Medical Center, Covenant Medical Center-Lakeside, and Covenant Children's Hospital. Led by Covenant Hospital Levelland and Covenant Hospital Plainview, Covenant has a network of 18 leased, managed, and affiliated community hospitals and eight Covenant Family Healthcare Centers as well as physician offices offering primary medical care in the region.

Mildred and Shirley L. Garrison Geriatric Education and Care Center

Mildred and Shirley L. Garrison Geriatric Education and Care Center is a state of the art 110-bed teaching nursing home. It is the only teaching nursing home of its kind in the country located on a Health Sciences Center campus. There are 60 beds devoted to progressive Alzheimer's care with 20 beds devoted to mild, moderate, and severe dementia. The remaining beds are devoted to medical care with 39-beds licensed at the skilled nursing facility level. The Garrison Center is also equipped with a therapy gym and office and classroom to accommodate student learners.

University Medical Center

University Medical Center is a 416 bed tertiary care teaching hospital which provides 21.8 million dollars annually in charity care to Lubbock and surrounding counties. It is home to the only burn unit, Level-I trauma center, and bone marrow transplant unit in the region. It also houses a 42-bed NICU, 24-Bed PICU, 24-bed SICU, 14-bed MICU, and brand new cardiac care floor. It is also home to the Children's Miracle Network hospital for the city of Lubbock and the newly renovated Southwest Cancer and Research Center.

Veterans Affairs Outpatient Clinic

The Veterans Affairs Outpatient Clinic in Lubbock is an outreach center from the Amarillo Veterans Affairs Health Care System. The clinic is a brand new 40,000 square foot facility with over 60,000 outpatient visits per year. There are three pharmacist-run clinics including medication referral (diabetes and hypertension), lipid lowering, and anticoagulation.

THE PROGRAM

The School of Pharmacy offers the Doctor of Pharmacy (Pharm.D.) as its primary professional degree. The 4-year professional program requires at least two years of pre-professional studies that may be completed at any accredited college or university. A combined Pharm.D./MBA degree is also offered. Through the School of Pharmacy's affiliation with the TTUHSC Graduate School of Biomedical Sciences, MS and PhD degrees are also awarded.

Doctoral Candidates are admitted once each year for enrollment in the fall semester, which starts in early August. Studies must be on a full-time basis. Doctoral Candidates will spend the majority of each weekday in classes, laboratories, or clinical experiences.

TEXAS PHARMACY MUSEUM

Inside the Amarillo Pharmacy building, the 3,000 square-foot Texas Pharmacy Museum is the only site

in the state that specializes in collecting, preserving, and laying items that document the history of pharmacy. The museum's collection consists of approximately 10,000 items, including pharmacy art books, containers, laboratory glassware, and various other commercial remedies, products, and tools of the trade, dating as far back as the Civil War. Since it opened in 1998, these pieces of drugstore history have made their way to the museum from 90 different donors in Texas, California, and Pennsylvania.

OUR HISTORY – OUR IMAGE

As as chronicle our own history and experiences with life in the School of Pharmacy, personal images

may be captured during events organized and hosted by the University using film photography, digital photography, video, or other mediums and may be used on the Website, University prospectus or course brochures, other publicity material (such as internal and external newsletters), exhibition of student work, or graduation ceremony brochure and may be provided to the media for publication in local or national newspapers or educational magazines. At no time will the School or University sell a personal image.

ACADEMIC CALENDAR / EXECUTIVE SUMMARY

Please visit Academic Information web page for links for to the School of Pharmacy Academic Calendars: https://www.ttuhs.edu/pharmacy/documents/academics/2018-2019_Academic_Events_Calendar.pdf

PHARMACY LICENSURE

Graduates from the Texas Tech University Health Sciences Center School of Pharmacy will be eligible to apply for licensure in any state or territory of the United States. Licensure as a pharmacist is administered by boards of pharmacy in each state. Every state and territory requires graduates to complete the North America Pharmacy Licensure Examination (NAPLEX) as well as a state prepared examination on laws and rules for pharmacy practice within the state. The NAPLEX is administered throughout the country at testing centers using testing procedures. Scores may be reported to any state. Many states require some internship experience after completing the degree requirements. Students are advised to contact the board of pharmacy in the state they desire to apply for licensure for more detailed information on requirements. In Texas, the Board of Pharmacy may be contacted as follows:

Texas State Board of Pharmacy (512) 305-8000
333 Guadalupe
Tower 3, Suite 110
Austin, Texas 78701

TEXAS RESIDENCY

Texas Tech University Health Sciences Center School of Pharmacy gives preferential admission status to residents of the state. This means that when competing for admission, a Texas resident will be admitted before a student of equal qualifications with non-resident status. The rules and regulations for determining residence status are pursuant to the Title 3, Texas Education Code, Statute/Sections 54.052 and 54.055.

HEALTH SCIENCES CENTER STUDENT SERVICES

Contact the Office of Student Affairs in the School of Pharmacy if you have any questions.

Office of Student Services (806) 743-2300

This office handles centralized support services for the institution. Some of the services include but are not limited to: the institutional student handbook, disability services, non-academic grievances, counseling services, health insurance, student fees, student government, student organizations, and graduation.

Institutional Student Handbook

This handbook works hand in hand with your school's catalog and handbook to provide you with a full scope of your rights as a TTUHSC student.

Disability Services

TTUHSC complies with the American with Disabilities Act (ADA), Section 504 Rehabilitation Act of 1973, and state and local requirements regarding students with disabilities. A student must register with the Office of Student Services and file appropriate documentation in order to be eligible for any

disability benefits and services described in this operating policy.

Program of Assistance for Students

PAS is a program that enhances wellness by providing you and your family the opportunity to manage life's problems.

Health Insurance

You are **REQUIRED** by Texas Tech University Health Sciences Center (TTUHSC) to pay a Medical Services Fee per semester. With this fee, you can access healthcare in the clinic and see a nurse or physician for minimal or limited minor problems. Health insurance is not required to obtain services from the Family Practice Clinic which are located on or adjacent to each of our campuses with the exception of Dallas. Health plan coverage is strongly recommended for all students to cover major medical, emergency care, specialty care, and pharmacy as these services can be expensive and are not covered by the healthcare provided by TTUHSC. TTUHSC highly encourages and strongly recommends that each student possess medical insurance for emergency situations and for basic medical care needs. You may obtain suitable coverage from the following provider at a very competitive price if you do not have other insurance. Students must be enrolled in 1 or more credit hours to be eligible for Academic Health Plans, www.academichealthplans.com/ttuhsc.

Updated information on immunizations will be provided during your school's orientation. If you require an immunization administered by the Family Medicine Clinic, you will be required to pay a fee. For additional information on centralized services please visit www.ttuhsc.edu/student-services.

Services common to the students on all campuses for the Schools of Pharmacy, Medicine, Allied Health, and Nursing are under one office. The basic elements of this office are:

Office of the Registrar (806) 743-2300

As custodian of the students' permanent academic records, the Registrar's Office is also responsible for registration, grade reports, transcript requests, enrollment, and veteran certification. Questions related to Texas residency status are also resolved in this office.

Office of Financial Aid (806) 743-3025

Students desiring financial assistance or information regarding loans and scholarships find assistance within this office. Federal, state, and local programs are available to students who appropriately demonstrate financial need.

Office of Student Services in Lubbock (806) 743-2300

Student needing information about TTUHSC's health insurance, student organizations, graduation application, graduation dates, and graduation regalia.

Student Affairs in Amarillo (806) 414-9393

Students needing assistance with campus issues, application, academic issues, and personal counseling should seek help here.

Extracurricular Events

Information about tickets to cultural events in the community is available through the Office of Student Services.

Recreation Center

Each campus has information regarding the facilities at each location.

Campus Parking

Limited parking facilities are available. Any student wishing to park on any of the campuses will be required to obtain a permit and pay the parking permit fee.

Student Housing

The School of Pharmacy does not furnish living quarters for its students. Housing is individual and each student makes his/her own arrangements. Most students live in apartments or houses in the community. Apartment guides may be obtained from the School of Pharmacy, Office of Student Affairs.

Amarillo HSC Student Senate

The Office of Professional Affairs serves as sponsor and provider of staff support to School of Pharmacy Senators to the Amarillo HSC Student Senate, which was established to foster better relationships between the students in all three schools.

The following are contact numbers for additional offices with the School of Pharmacy.

- Amarillo
Dean's Office (806) 414-9300
Department of Pharmacy Practice (806) 414-9310
Department of Pharmaceutical Sciences (806) 414-9289
Office of Technology (806) 414-9232
Financial Administration (806) 414-9279
Managed Health Care (806) 414-9344
- Abilene
Regional Dean's Office (325) 696-0404
- Lubbock
Regional Dean's Office (806) 743-7639
- Dallas/Ft. Worth
Regional Dean's Office (214) 654-9404
Dallas VA (214) 358-9036

You are urged to contact the School of Pharmacy, Office of Student Affairs at (806) 414-9393 with

questions pertaining to any of these areas.

HEALTH SCIENCES CENTER STUDENT HEALTH SERVICES

General information about student health services on any School of Pharmacy (SOP) campus can be accessed through the SOP's office of Student Services on the Amarillo campus or through the TTUHSC-wide office of Student Services on the Lubbock campus. Campus specific information can also be accessed through Student Services or Regional Dean's office representatives at each of the four campus locations.

Counseling Services

Confidential mental health services are available for students. These services include help in stress management, crisis, relationships, family problems, anxiety, depression, and any other situations with potential to interfere with academic success. Psychologists provide the needed free sessions. Psychiatric referral is available when needed. They are available for consultation and counseling regarding personal, academic, and career issues. *These services are structured in such a manner as to provide and maintain strict confidentiality.*

Student health services Amarillo / Lubbock:

Immunizations

- ◆ Updated information about immunizations will be provided during your school's orientation. If you require an immunization administered by the Family Medicine clinic, you will be required to pay a fee.
- ◆ For an immunization, it is not necessary to be seen by a physician, but a nurse appointment is required. Female students must have a nurse appointment for a pregnancy test prior to an MMR immunization.
- ◆ Please bring your immunization records with you at the time of your first visit.
- ◆ Please contact the Office of Student Services for the most up-to-date information on immunizations.

Pharmacy

The Student Health Fee does not include a prescription benefit; thus, students are responsible for medication costs. However, a discounted option for pharmacy services includes Wal-Mart's \$4 Generic Drug program. The Family Medicine clinic should be able to provide more information.

Confidentiality

All medical records are strictly confidential. By federal law, information cannot be released to anyone without the written consent of the patient, except as required by a court. You may have copies of your immunizations upon request. We will be happy to send copies of laboratory tests or other information to your physician of choice, upon your written release.

Health Services for TTUHSC Students

rev. 5/10

Eligibility

The Texas Tech Physicians Family & Community Medicine clinic provides health services to TTUHSC students who are currently enrolled and have paid the Student Health Fees as part of tuition and fees. To receive health services, you must present a Student I.D. card at the time of the appointment. If you also have private insurance in addition to Student Health Services, you will need to submit your receipt for the co-pay to your insurance company for reimbursement.

The Student Health Fee covers only those services provided by the Family & Community Medicine clinic and specific laboratory and radiology service performed at cooperating locations. All other charges incurred are your responsibility.

Clinic Appointments

- ◆ Please call to make an appointment. If you need to be seen for a sudden illness, please call that day as early as possible.
- ◆ If you need to be seen after clinic hours, call your campus's clinic phone number and ask to leave a message for the on-call physician.
- ◆ When you check in, please inform the receptionist that you are a TTUHSC student. If you come to the clinic without an appointment, it may be necessary for you to wait for a physician.

Immunizations, paper work, and routine procedures are not ordinarily considered urgent care, and may not be taken care of on the same day as requested.

Staff

The medical staff of the Texas Tech Physicians Family & Community Medicine clinic is composed of faculty and resident physicians and a nursing staff.

Emergenois

If you have a health emergency that requires you to be seen at a hospital emergency room, go to the hospital listed for your campus under "Clinic Locations." *Visits to an emergency room that generate a charge from either TTUHSC or the hospital are your responsibility.*

Fees

Effective 9/1/2007, TTUHSC students are required to pay the following fees:

Physician Visit.....	\$10
Physician Visit with Pap Test and/or STD* testing.....	\$25
*testing for chlamydia, gonorrhea or syphilis	
Physician Visit with Colposcopy Procedure.....	\$60

Services Covered

Medically Necessary Laboratory Services (ordered by Family Medicine Clinic)

Chemistry <ul style="list-style-type: none">• Glucose, Random/Fasting• Amylase• Lipase• Potassium• Total Protein• Total Bilirubin• Calcium	Virology <ul style="list-style-type: none">• Chlamydia testing• Hematology• CBC w/diff• CBC w/o diff• Sed Rate
Profiles <ul style="list-style-type: none">• Chemistry Profile• Lipid Profile• Liver Profile• Thyroid Function Panel	Immunology <ul style="list-style-type: none">• RPR (syphilis)• Monospot• Pregnancy Test (Qualitative Only) Blood or Urine
Microbiology <ul style="list-style-type: none">• Strep Screen• Throat Culture• Urine Culture• Urinalysis• GC Testing	

Radiology Services

- Chest
- Pelvis
- Humerus
- Wrist
- Femur
- Ankle
- Ribs
- Hips
- Elbow
- Hand
- Knee
- Foot
- Spine
- Shoulder
- Forearm
- Finger
- Tibia/Fibula
- Abdomen

All covered laboratory and radiology services must be ordered by the Family Medicine physician. Any additional lab tests or radiology services, consultations, visits to other departments at TTUHSC, or visits to an emergency room that generate a charge from either the Texas Tech Physicians Family & Community Medicine clinic or the hospital will be your responsibility.

If you receive a bill from TTUHSC for services covered by the Student Health Fee, please bring the bill to the Texas Tech Physicians Family & Community Medicine clinic as soon as possible.

Services NOT Covered

- ◆ Emergency room visits
- ◆ Hospitalizations
- ◆ Laboratory (other than listed)
- ◆ Radiology (other than listed)
- ◆ Procedures (other than colposcopy)
- ◆ Immunizations
- ◆ TB & AIDS tests
- ◆ Antibody Titers
- ◆ Durable medical equipment (DME)
- ◆ Medications administered in clinic

The Health Services provided to you as a TTUHSC student do not constitute a health insurance policy. For questions about services, please contact the Office of Student Services 806-743-2300

FINANCIAL INFORMATION

Tuition and fees are established each year by the Board of Regents. In addition to tuition and fees, students are responsible for their books, supplies, travel, and personal expenses associated with completing their clinical experiences. A laptop computer, compatible with the School's system, is also required. Contact the Office of Student Affairs to receive the specifications.

A \$100 application fee must be submitted with the application for admission. The application fee is non-refundable. Applications will not be processed without this fee. The fee is waived for TTUHSC employees on at least a 9-month appointment, their spouses, and dependent children under age 25. Upon acceptance of an offer of admission, the student pays an additional \$400 nonrefundable placement guarantee fee.

Financial Aid

Texas Tech University Health Sciences Center believes the primary responsibility for financing education lies first with the student and his/her family. When the total resources they can provide do not meet expenses, it is the objective of the financial aid program at TTUHSC to provide financial assistance to students who, without such assistance, would not be able to pursue advanced education.

Financial Aid at TTUHSC comes from many sources. Although qualifications for each funding program might differ, no student shall be excluded from participating in or be denied the benefits of

any financial aid program on the basis of age, sex, race, skin color, religion, national origin, or disability. For specific information contact the TTUHSC Financial Aid Office at (806) 743-3025. Students enrolled in the pharmacy program in Amarillo may use the phone in the Office of Student Affairs to make a toll free call to the Financial Aid Office in Lubbock. Inquire in the Student Affairs Office. Information regarding step-by-step instructions for completion of financial aid can be found on our website.

Scholarships

Awards distributed by the School of Pharmacy are based on academic achievement, leadership, extra-curricular activities, and financial need. Scholarship recipients are selected by the School of Pharmacy Faculty Scholarship Committee, a subcommittee of the Student Admissions Committee. Award decisions are made in the summer for the following academic year.

To be considered for scholarships for the upcoming school year, students must submit an online application no later than May 20th. Currently enrolled students with a minimum cumulative GPA of 80.0% and entering students with a minimum GPA of 3.0 (GPA calculated using only required prepharmacy course grades) are eligible. Entering students' transcripts must be on file with the Office of the Registrar by June 1st. To be considered for need-based scholarships, the applicant must submit a FAFSA by May 15th.

For additional information, contact the Office of Student Affairs at: 806-414-9393 or christine.andrews@ttuhsc.edu.

Scholarships awarded by TTUHSC School of Pharmacy include:

Student Services Fee (\$11.00/cr hr, max \$132)	\$264.00	\$264.00
Course Fees	\$600.00	\$600.00
Drug Information Center (fall only)	\$160.00	\$160.00
Clinical Immunization Fee (\$40.00/fall semester)	\$40.00	\$40.00
Identification Card Maintenance Fee (\$5.00/semester)	\$10.00	\$10.00
Identification Card Replacement Fee (\$10.00/occurrence)	\$10.00	\$10.00
Information Technology Fee (\$10.00/cr. hr.)	\$390.00	\$390.00
Record Processing Fee (\$10.00/semester)	\$20.00	\$20.00
Outcomes Assessment Fee (spring only)	\$175.00	\$175.00
Orientation fee fall only	\$50.00	\$50.00
Parking Fee	\$76.50	\$76.50
International Education fee 4.00 per semester	\$8.00	\$8.00
Clinical Simulation Center Fees for P1 Year	\$500.00	\$500.00
Total Fees for First Year	\$2,560.50	\$2,560.50
Total of Tuition, Fees & Expenses for First Year	\$16,717.50	\$29,002.50

Estimated Books and Supplies for First Professional Year		
Text books	\$500.00	\$500.00
Lab jacket/name badge	\$45.00	\$45.00
Laptop computer (range \$2,500 - \$4,000)	\$2,000.00	\$2,000.00
Estimated Total for Outside Expenses for First Year	\$2,545.00	\$2,545.00

ADMISSION FEES

Placement Guarantee Fee (Non-Refundable) \$200.00 tuition refund at 12th day	\$400.00
Application Fee (Non-Refundable)	\$100.00
Application Fee PharmD/MBA (Non-Refundable)	\$175.00

Tuition, fees and expenses are subject to change at any time without notice.

Tuition is set by Texas State Statute and fees are set by the Texas Tech University Health Sciences Center Board of Regents each year. Students are also responsible for their personal expenses, including travel and housing during their clinical experiences.

Other Fees

International Student Fee (\$50.00/per semester)	\$100.00	\$100.00
Graduation Fee	\$75.00	\$75.00
Clinical Simulation Center Fees for P2 year	\$300.00	\$300.00
Late Payment Fees (after the 2nd working day following the billing due date, \$50.00 per due date)	\$50.00	\$50.00
Late Registration Fee (beginning 1st class day)	\$50.00	\$50.00
Returned Check Charges (per occurrence)	\$30.00	\$30.00
Post Census Day Matriculation Fee	\$200.00	\$200.00
Installment Option Fee (\$25/per semester)	\$50.00	\$50.00

Refunds

Prior to the first day	100 percent
During the 1st five class days	80 percent
During the 2nd five class days	70 percent
During the 3rd five class days	50 percent
During the 4th five class days	25 percent
Anytime after	None

Emergency Tuition Loan Program

Resident and non-resident students as well as students that do not apply for financial aid may be eligible for an emergency loan.

This loan is used exclusively for payment of current tuition and fees. There is no minimum hour requirement. Students may apply for this loan through the Financial Aid Office. A promissory note must be signed and funds will be applied to the student’s account. The loan amount will cover the cost of tuition and fee charges for the currently enrolled classes. The loan is of 90-day duration or the close of the semester (whichever comes first) and is payable in full no later than the established due dates. The interest rate is five percent per annum and is calculated from the loan origination date. **This loan program may not be available for summer sessions.**

Tuition and fees will be established each year by the Board of Regents. In addition to tuition, students are responsible for their books, supplies, travel, and personal expenses associated with completing their clinical experiences. A laptop computer, compatible with the School’s system is required.

DOCTOR OF PHARMACY ADMISSIONS POLICY

Admission to the Texas Tech University Health Sciences Center School of Pharmacy is open to all individuals who have permanent U.S. residency status. Applicants who are residents of Texas and adjacent counties in New Mexico, Oklahoma and Arkansas are given preference over equally qualified out-of-state applicants. Applicants must have completed at least two years of pre-professional studies at any regionally accredited U.S. college or university and must present official transcripts of having completed 68 hours of designated courses with a grade of C or better. Applicants must complete the application form, request three letters of reference from individuals who can attest to the applicant's morals, ethics, academics, and life experiences. Applicants are provided the opportunity, through the consideration of personal statements, recommendations, and essays to demonstrate their potential contributions to diversity. Applicants must also complete the Pharmacy College Admissions Test (PCAT) with a preferred composite score of 50% or better.

The Admission Process

The admission process begins in early July each year and continues through the regular admission deadline. Prior to fall admissions, each applicant will have a staff review of their application reviewed upon receipt. To be eligible for review, each applicant must have a preferred minimum pre-pharmacy grade point average (GPA) of 3.0 on a 4-point scale on the list of prerequisite courses completed by the published deadline date each year. The pre-pharmacy grade point average (GPA) is calculated by considering only the last grade received for designated courses taken in the general requirements. Students making application shall have completed, or expect to complete, at least two full academic years of pre-pharmacy before entering the Pharm.D.. program in August. Completion of all prerequisite courses should be within the last seven (7) years, i.e., Fall 2018 minus 7 = Fall 2011, and will require a written request to have the Dean's approval for older course work. Courses will vary somewhat based on the curriculum offered at various schools. General requirements are as follows:

- General Chemistry (for majors), with lab 8 SCH**
- Organic Chemistry, with lab 8 SCH**
- General Physics (trig or calculus based), 4 SCH**
- General Biology (for majors), with lab 8 SCH**
- Microbiology, with lab 4 SCH**
- Calculus 3 SCH**
- Statistics 3 SCH**
- Speech (public speaking) 3 SCH**
- Economics, macro 3 SCH**
- English Comp I 3 SCH*
- English Comp II 3 SCH*
- English Literature 3 SCH*
- Humanities/Social Sciences 15 SCH * ***

Legend:

*If you have earned a bachelor's degree from an accredited college or university in the United States prior to enrolling in the School of Pharmacy, you are exempt from the English and Humanities/Social Sciences requirements.

**Used in the calculation of the pre-pharmacy GPA (grade point average).

***Humanities/Social Sciences: Courses may be selected from any mix of Anthropology, Communications (excluding Public Speaking, which is a prerequisite), Economics (excluding Economics prerequisite), Ethnic Studies, Family Living/Human Development, Geography, History, Journalism, Philosophy, Political Science (Government), Psychology, and Sociology. Performing and Fine Arts (including Music, Physical Education, and Foreign Languages), Computer Sciences, or similar courses will not meet this requirement. Prerequisite groupings for Humanities/Social Sciences, e.g., 6 hours of history and 6 hours of government, are not required by the TTUHSC School of Pharmacy. Advanced Placement (AP), CLEP, and Dual Credit are accepted if documented on your transcript from an accredited U.S. college or university.

PCAT (Pharmacy College Admission Test)

The Pharmacy College Admission Test, also known as the PCAT, is required of all applicants who apply for admission to the School of Pharmacy. It is highly recommended that you take the September test when applying to TTUHSC School of Pharmacy. All applicants who are interested in taking the PCAT should go to the link on our website for further information. The link to the website contains most of the information in their Candidate Information Booklet. This website contains the PCAT online application. <http://www.pearsonvue.com/pcat/>

Early Decision and Letter of Intent (LOI)

TTUHSC School of Pharmacy offers Early Decision Program (EDP) status through PharmCAS. The Early Decision program is a binding option for applicants who have decided that a particular pharmacy degree program is their first choice and that they will enroll if accepted. As an EDP applicant, you can apply to only one pharmacy degree program. The EDP application deadline is the Tuesday following Labor Day. In addition to completing the PharmCAS application, you must arrange for PharmCAS to receive all of your official transcripts and fee by the EDP deadline. You must also complete the Merlin supplemental application and pay the corresponding application fee by the EDP deadline.

The Letter of Intent (LOI) program allows qualified prospective students to have the PCAT requirement waived. Applicants who meet the following criteria may apply for the Letter of Intent program:

- Each candidate must meet entry criteria established by the candidate's school.
- GPAs
 - Each candidate must have and maintain a 3.5 overall GPA at an accredited college or university(s) to be eligible for Letter of Intent.
 - Each candidate must have and maintain a 3.5 GPA in the prerequisite courses defined by TTUHSC School of Pharmacy to be eligible for Letter of Intent.
- See prerequisites at <http://www.ttuhs.edu/sop/prospective/prerequisites.aspx> . Each candidate shall complete at least the minimal course prerequisites for admission to TTUHSC School of Pharmacy.
- Advanced Placement (AP), International Baccalaureate (IB), and College Level Examination Program (CLEP) credit taken prior to enrollment at the candidate's school will be accepted if on the candidate's college/university transcript.
 - Dual credit taken prior to enrollment at the candidate's school will be accepted.

- Courses may be taken at a community college or a university.
- Each candidate must remain in good academic and disciplinary standing at their school.
- The candidate who wishes to apply via a Letter of Intent must apply for and successfully complete Early Admission interview process which means:
 - The accepted candidate cannot apply to other pharmacy schools and must apply to TTUHSC School of Pharmacy through the PharmCAS Early Decision Program (EDP).
 - The candidate who wishes to qualify for this guarantee must submit both the primary and secondary applications to TTUHSC School of Pharmacy by early decision deadline at the beginning of the fall semester of the year prior to matriculation into TTUHSC School of Pharmacy. Check the TTUHSC School of Pharmacy website for specific dates.
- **The accepted candidate under this Letter of Intent shall have the PCAT requirement waived.** A student enrolling in the Pharm.D./MBA Program will be required to take the PCAT or GMAT.

Review of Application and Admissions Criteria

All of your application materials are important and will be reviewed by the Admissions Committee as part of the overall process. Once you have completed the PharmCAS application online, completed the supplemental application, paid your application fee, submitted your transcripts, given your references their forms to complete, and taken the PCAT with your grades having been received by the Pharmacy College Application Service (PharmCAS), your application will go through a 6-step review process.

Step 1 – Staff Review

The admissions staff will review your completed application to determine whether all documents are complete and whether you meet the minimum admissions requirements. We will compute your adjusted pre-pharmacy GPA, using the last grade you received in your courses, and we will also determine that none of the pre-pharmacy courses were more than 7 years prior to the date you would start classes. If all these checks are cleared, the status of your application will be posted online and verify that your application is complete. We recommend you first review your PharmCAS status since your records will be updated there.

Step 2 – Admissions Committee Review

The Admissions Committee is composed of a cross section of faculty members and advanced students who review each application to determine which applicants will be invited to one of the SOP campus locations for an interview. To select those to interview, we compute each applicant's probability of successfully completing the curriculum (4 years of pharmacy studies with a composite GPA above 75% and no course failures) by a regression formula that includes your pre-pharmacy GPA (as computed on your application) and the Composite, Biology, Chemistry, and Reading scores on your PCAT. Through statistical analysis of our previous students' success in the curriculum, we have found that these elements are highly predictive of an applicant's success or failure in the program. Once the probabilities are computed, we then invite for an interview those with the highest probability of being academically successful.

The academic rigor of the program is significant, and every student must be able to handle the

demands of the courses, but we know that academic abilities alone are not the only factors that determine overall success as a pharmacist. Therefore, we typically extend interview offers to about 2.5 times as many applicants as we have slots in the class to allow you to demonstrate your personal strengths beyond your academic abilities. Those abilities, like communication skills, critical thinking skills, ability to work in teams, etc., typically cannot be measured accurately by GPA and PCAT scores alone. Thus, we want to be sure to admit applicants who we know can be both academically successful and also have the basic abilities that will make them leaders in pharmacy and caring practitioners for their patients.

If you are not offered an opportunity for an interview, it does not mean that we believe you would not be a good student; we simply have so many applications that it is impossible to spend a day with every person who meets the minimum requirements. We must focus on those applicants who we determine have the best chance to be successful in a very difficult academic program. If you are not extended an interview invitation, please call to make an appointment with one of our counselors, after May 1, to meet in person and review your application. We can explain why you fell short and make suggestions on how you could enhance your application for the next year if you wish to re-apply.

Step 3– Adjustments to Your Interview Invitation

Your Interview Invitation Score will be adjusted by reviewing your transcripts for each “F” and “D” previously made in the prepharmacy course requirements.

Step 4 – On Campus Interview

If you receive a letter extending you an interview opportunity, the letter will give more directions on how to set up the interview and possible dates. You will be invited to one of our campus locations designated in those instructions for your interview, which may be in Amarillo, Abilene or Dallas.

Preparing for the Interview... is the hardest part of the process. This is a challenging day, but we try to help you through it. Some suggestions:

1. Dress professionally. When you look professional, you act it....but be sure your clothes are comfortable and you feel good about the way you look.
2. Be on time. If you feel rushed or start late, it sets you up to feel frazzled. Get a good night's sleep the night before.
3. Be honest. If you do not know an answer, say "I don't know." Faculty interviewing you will know the difference. If it is a question about you or your wanting to be a pharmacist, have something to say. Smile. Be cheerful and positive.
4. Look people in the eye.
5. Relax. This day will be very hectic and, by the end, you will feel drained. You will participate in group problem solving, be interviewed by faculty and students, and have an information session on the financial aid, technology and our history.
6. Ask questions. This day will also include a tour of our facilities and an opportunity for you to ask questions of students, faculty, and our staff. Good luck!

You will participate in several different assessments of your abilities. You cannot really prepare anything, so just be relaxed and do your best on everything you are asked to do.

The interview will start with a welcome and general directions for the day. It is not an assessment, simply a time to get to know you and for you to get to know the other applicants who will be with you for the day. Your performance in other activities during the day will be assessed to determine an overall Interview Score.

- As a pharmacist, you will be required to work effectively with a team of physicians, nurses, and other pharmacists to solve patient and operational problems. To allow us to determine your basic teaming skills, you will be in a group of 5-6 other interviewees and asked to group problem solve a potential pharmacy problem. You do not need to know anything about pharmacy beyond what you have learned in your pre-pharmacy courses; we are most interested in your abilities to work within a group in reaching a solution.

The final assessments come from one-on-one interviews with faculty members or pharmacists who assist in evaluating students, and one of our existing students. They will be interested in why you want to be a pharmacist, any experiences you have had with pharmacy, your extracurricular activities while in college, your interpersonal abilities, your strengths, and weaknesses. You will be able to “tell your story” in this session, so think about your life experience and why you are interested in a career in pharmacy.

- Additionally, we will give you a tour of the school, allow you to spend some Q&A time with our current students, and highlight some of the core competencies in our Student Showcase. These experiences will help give you a general feel about whether TTUHSC SOP is the right place for you. You will also be given information on how to determine your overall status in the admissions process and how to get any further information you may desire.

Yes, the day is full and you will be anxious over the outcome, but the interview is the best way for you to understand what the SOP is about and to give you the opportunity to demonstrate that you would be successful in the program and as a pharmacist.

Step 5 – Ranking of Applicants

Once all the data are compiled, the Admissions Committee rank-orders the students based on the Interview Scores.

Step 6 – Diversity Factors

The Texas Tech Board of Regents have instructed all programs to identify and use diversity factors to ensure that our classes reflect the cross-section of factors that are reflective of the population of Texas. The U.S. Supreme Court has given guidelines for professional programs to use diversity factors in their admissions process and TTUHSC SOP fully complies with these guidelines. For example, there are no quotas or target percentages of the class that must meet any or all of these diversity factors, factors are not weighted in the admissions formula, and diversity factors will not move an applicant into the class as admitted without fully meeting the requirements for admissions. We are required to give a full review of each application and only apply diversity factors when individuals with these factors enrich the qualities of the class.

The diversity factors (in no priority order) considered by the Admissions Committee are as follows:

- Is the applicant's official residency in an area classified by Texas as underserved with health professionals? These are typically a socio-economically depressed area or from a rural county (population less than 50,000).
- Is the applicant fluent in Spanish and English language skills?
- Has the applicant distinguished themselves in extracurricular activities directed to health care or community service?
- Other special considerations as presented by the applicant.

This step gives the Admissions Committee the opportunity to ensure appropriate diversity in the class beyond a priority rating as determined in Step 5.

Establishing the Class and Alternate List

When we have finished steps 1-6, the Admissions Committee will identify those applicants who are extended offers and those who will be retained on an alternate list. We complete what is termed "rolling admissions" meaning that we admit some students throughout the admissions and interview process but hold a number of positions until the final interviews are completed and the Committee can consider the full applicant pool. Within 48 hours of the time we have completed all reviews, typically in early May, we will post your status on PharmCAS, and within 7-10 working days, we will send you a letter notifying you that you have either been admitted or have been placed on the alternate list. A nonrefundable placement guarantee fee of \$400.00 is required with your acceptance.

If you do not make the first admissions list, please do not give up on being admitted to the SOP. As we learn that an applicant has accepted a position in another school, we will select from the alternate list and offer them admissions. If you are in this situation, we will change your status on PharmCAS and send you a letter notifying you of your admissions. If you are an alternate, keep monitoring PharmCAS for updates to your status. You may also contact the Office of Student Affairs and Admissions if you have any questions about how your application was reviewed.

Felony Conviction

One additional criterion for admission to the SOP is not having any felony convictions. Most hospitals, clinics, and many community pharmacies will not accept students for professional practice experiences if s/he has been convicted of a felony. Therefore, we are not able to place a convicted felon in the required professional practice experiences, thus s/he cannot meet the requirements for graduation. Students with felony convictions will not be admitted. If you have any questions, please do not hesitate to contact Student Affairs. If a matriculated student has a felony conviction during their studies, s/he will be disenrolled from the School and TTUHSC. A Criminal Background Check is required prior to matriculation into our program.

Required Application Documents

All prerequisite courses must be completed with a grade of "C" or better. Note: Prerequisites and the

completion of the PCAT do not have to be completed prior to submitting and finalizing an application. However, these must be completed prior to matriculation. A bachelor's degree is not required. Refer to "Important Dates and Deadlines" on the web for specific deadlines for the completion of prerequisites and applications. The following admission documents must be submitted to the School of Pharmacy by the required deadline for students to be eligible for fall admissions:

1. Completed Online PharmCAS Application and online Supplemental Application
2. Pharmacy Experience Essay
3. Official Transcript(s) documenting the completed pre-pharmacy and general education requirements with a grade of "C" or better sent directly to PharmCAS. Transcripts are required for all college courses taken, regardless of grade or part of the pre-pharmacy requirement. Official transcript(s) documenting prerequisites that are completed after the deadline date should be submitted immediately upon completion of the course and received within two weeks after the end of the semester but no later than July 31. Students who do not submit transcripts of all college courses taken are subject to disenrollment when discovered at a later date.
4. A Supplemental Application Fee of \$100, nonrefundable. Applications will not be processed without this fee. The fee is waived for employees of TTUHSC on at least a 9-month appointment, their spouses, and dependent children under age 25.
5. Three Letters of Recommendation electronically submitted to PharmCAS
6. Pharmacy College Admissions Test (PCAT) scores or proof that the test will be taken prior to enrollment in the school and preferably by the September test date
7. Completed and clear Criminal Background Screen
8. Immunizations and CPR Certification

The pharmacy experience essay and the reference letters are used to evaluate the overall qualifications of the candidate. The School of Pharmacy application is an online document that can be found on our web site at <http://www.ttuhschool.edu/sop/>. Please go to our website for the online application, PCAT information, course matrix information, and information about important dates. Information about the Early Decision deadline can be found in "Important Dates." Early Decision instructions are available in the PharmCAS application instructions.

Technical Standards Required for All TTUHSC Pharmacy Students

To complete the required School of Pharmacy curriculum, students must be able to perform the following minimum technical functions:

Visual Acuity – Required to Dispense Medications

- Accurately read 6-point type with the assistance of a magnifying glass or lenses
- Distinguish the markings on typical commercially prepared tablets and capsules

Hand, Finger, Eye Manipulations – Required to Compound Medications

- Accurately measure liquids with a syringe
 - Accurately measure liquids and powders with typical measuring devices required by Texas State Board of Pharmacy regulations to be standard compounding equipment in a pharmacy
- Mix liquids and powders in a mortar and pestle

Ambulate – Required to Monitor Patients

- Move within and among patient care areas minimally with the assistance of a wheel chair and/or personal assistant

Foreign Student Information

As an international applicant, you are also required to complete an International Student Application. This document is available on our website. Download the word document for Admission to the Texas Tech University Health Sciences Center School of Pharmacy in addition to completing the online application for the School of Pharmacy. You will find a Checklist of Documents Required that you can print to help guide you through the process. Please send all application materials and fees to the address listed on the applications. The deadline for the International Student Application and the online application for foreign students is November 1. A foreign transcript course by course evaluation is required for any course being considered as a prerequisite.

The School of Pharmacy accepts applications only for the fall semester. Before an application can be considered, you must have the Pharmacy College Admission Test (PCAT) results and TOEFL scores reported to us. The PCAT booklet explains procedures that must be followed by foreign students to obtain testing. Applicants who have demonstrated significant achievement through PCAT scores and grade point average and who will complete both the pre-pharmacy and general education requirements may receive an admission interview. The purpose of the interview is to give you an opportunity to personally present your unique qualifications and see if our program will meet your needs.

You are responsible for your own transportation, accommodations, and meals if invited for an interview. An interview does not guarantee admission, but you cannot be admitted without an interview.

Transfer Credits and Pre-Pharmacy Equivalencies

Admission of transfer students is based on receipt of required documentation of credits earned and selective admission factors. Students are required to submit official transcripts from all colleges or universities attended. Evaluation of transfer credit for each student is completed upon receipt of all documents required for admission. The SOP maintains a separate matrix of accepted prerequisite courses and corresponding course numbers for most colleges and universities in Texas. Courses on the matrixes are equivalent to the pre-pharmacy courses required by Texas Tech School of Pharmacy. The matrixes may be accessed from a page on our website linking each school to its specific information.

Advanced Placement

Students who have been granted credit through successful completion of the subject examination in the College Level Examination Program (CLEP), the International Baccalaureate Program, or the

Advanced Placement Examination Program, and who have evidence of these credits on their college or university transcripts, may meet prerequisite requirements.

Experiential Learning

Credit for Life Experiences gained through employment and other activities may be granted by the Dean. A portfolio documenting learning and life experiences as they relate to specific courses is required. The learning experiences must be equivalent to what would otherwise be achieved at the college or university level.

Foreign or International Institution Evaluation

Official records are original, signed documents issued by the institution or duplicate copies of the original which bear an original seal of the issuing institution and registrar's signature or some person who is an official of the issuing school. Conferral of degrees, diplomas, certificates, or professional titles must be verified by official copies of same, dated entries of the academic record or official statements from the institution or governmental agency granting the degree, certificate, or title. Date of formal conferral must be shown. The certificate of conferral must refer to the degree, diploma, certificate, or title in its exact original designation. Unless academic records and diplomas, degrees, or certificates are issued in English by the institute itself, authorized **English translations must accompany the official documents in their original language**. All translations must be literal and complete renditions of the original documents.

Regular Admission Review

The deadline for regular admission review is a published date each year (see SOP web page). Applications will not be considered unless all documents have been received in the School of Pharmacy, Office of Student Services by the required deadline. All prerequisite course work must be completed by May 31.

PHARM .D / MBA PROGRAM

The idea of a Pharm.D.-MBA program was born in early 2006 in discussions between several faculty at the Texas Tech University Rawls College of Business and the Texas Tech University Health Science Center School of Pharmacy. The central theme to the discussions was the need to develop and train the future leaders of the profession. The Health Organization Management concentration within the MBA program matched what the pharmacy faculty believed were the necessary areas of focus to develop strong leaders in health care organizations.

The curriculum emerged after several rounds of negotiation between the programs keeping in mind the accreditation requirements of business and pharmacy. The curricular design model was determined after reviewing other Pharm.D.-MBA programs matched with the teaching schedules and course prerequisites. Rather than adopting the various models currently in use throughout the U.S., the faculty chose to use a dual-degree approach and integrate both programs into a typical 4-year course of study. Since the program was structured to be a dual-degree, it was essential that all of the approved content for both degree plans be met.

The Pharm.D.-MBA program at Texas Tech is the 31st program in the country and one of the only programs to award the MBA by the time of completion of the Pharm.D. degree. The HOM program at the College of Business is one of the few accredited programs for health organization management in the country.

The TTUHSC School of Pharmacy will require completion of a Pharm.D.-MBA Application form by December 1 of each year. A Pharm.D./MBA selection committee will review the academic achievement of each candidate and forward a recommendation to the Rawls College of Business and HOM program. Students should delay completing the Rawls College of Business applications until a determination of an SOP recommendation has been made. If the Committee does not recommend a student apply to the Pharm.D.-MBA program, the SOP program coordinator will counsel the student. The Rawls College of Business and the School of Pharmacy may limit the number of pharmacy students that are allowed to enroll in the Pharm.D.-MBA program. Applicants for the Pharm.D.-MBA Dual Degree program MUST have a prior baccalaureate or higher degree to be admitted into the program. Additional information regarding requirements for enrollment, applications, fees, and program information can be found in the TTUHSC School of Pharmacy Pharm.D./MBA catalogue.

**TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER
SCHOOL OF PHARMACY
STUDENT HEALTH RECORD POLICY**

BACKGROUND

Students involved in patient-care activities are at higher risk than the general population for acquiring communicable diseases such as measles, mumps, rubella, chicken pox, and tuberculosis. A pharmacy student who has one of these diseases may, in turn, infect other personnel and patients. Such infections established in any health care facility are serious in their potential for medical and possible legal complications. Therefore, Texas Tech University Health Sciences Center has a policy of immunization that all pharmacy students must follow. This policy conforms with the Texas Statute Title 25 Health Services, SS97.61-97.77 of the Texas Administrative Code that requires all students to be fully immunized during their patient care experiences.

PROCEDURE

Prior to enrollment in the School of Pharmacy, candidates are required to obtain a history of their

immunizations and vaccinations. Documentation of immunizations and vaccinations must be provided by written documentation of a health care provider (physician, nurse, or pharmacist), and must include the type of immunization/vaccination received, the date, and the signature of the health care provider who administered the immunization/vaccination. High school transcripts with medical record, baby records from parents, Visa documents, and similar documents are acceptable for documentation.

In order to protect the health of our students and the health of the patients with whom they come in contact, TTUHSC requires all entering students to provide documentation of several immunizations as well as the results of serological titers to determine whether or not they are actually immune to certain diseases. Immunization requirements are based on regulations, guidelines and recommendations available as of October, 2009 from the Texas Administrative Code (TAC), Texas department of State Health Services (DSHS), the U. S. Centers for Disease and Control and Prevention (CDC), and the U. S. Advisory Committee for Immunization Practices (ACIP).

Copies of lab reports, immunization, and/or health records must be provided to the School of Pharmacy. This link will provides a list of vaccinations required for all students enrolled in healthcare fields: <http://www.ttuhschool.edu/studentHealth/immunizations.aspx>

NEW STUDENTS

All new students accepted to the program are required to be current on the following immunizations before you will be allowed to begin your first year of pharmacy school. A form is provided at this link that the student may use to list the dates of the various shots they have had:

http://www.ttuhschool.edu/studenthealth/documents/Official_Immunization_2009.pdf. It is required that supporting documentation must be attached to the form upon submission to the Office of Student Affairs.

- **Hepatitis B**--3 doses, generally 1st and 2nd doses one month apart, the 3rd dose four to six months after the first dose, **or quantitative** titer demonstrating immunity. The hepatitis B third dose may be received during the first semester of pharmacy school due to the length of time required to obtain the full 3-doses.
- **MMR-- (Measles, 2 doses one month apart, or serological titer demonstrating immunity to Mumps and Rubella).** Measles, Mumps, and Rubella – *the titer must demonstrate immunity to all three diseases.*
- **Varicella**--2 doses one month apart, **or** serological titer demonstrating immunity
- **Tdap (Tetanus, 1 adult dose is required with Diphtheria and acellular Pertussis). Must have been received within the last five years.**
- **Tb Skin Testing**--Testing within the past twelve months. The CDC **DOES NOT** recognize a previous history of **BCG** as reason to not take a yearly Tb skin test. Therefore, unless you have had a **POSITIVE** Tb skin test, a Tb skin test within the past 12 months is required. If you had a **POSITIVE** Tb skin test in the past, a report indicating a negative chest x-ray taken within the previous twelve months is **required**. If you have previously had a positive Tb skin test or if you were exposed to a suspected or confirmed +Tb patient, you are requested to view and

answer the questions on the TB Questionnaire, which can be found at this link under Resources and Links: <http://www.ttuhschool.edu/sop/academicinfo/>.

- **Meningococcal**--One booster dose of Meningococcal vaccine (MCV) – Adult.
- **CPR**--All new students must obtain an American Heart Association Basic Life Support for Healthcare Providers Certification. Only the American Heart Association CPR is accepted.

CONTINUING STUDENTS

All continuing students must remain current on their vaccinations throughout their pharmacy career. This link provides a list of vaccinations required for all students enrolled in healthcare fields: <http://www.ttuhschool.edu/studentHealth/immunizations.aspx>.

ENROLLMENT REQUIREMENTS

Students involved in patient-care related activities are required to maintain current student health records and CPR certification. Prior to each enrollment period, a review will be made of the student's health records by the TTUHSC School of Pharmacy, Office of Student Affairs and the student will be notified of impending requirements. If a student has any immunizations, screenings, shots, or CPR certification that may fall due (with the exception of the flu vaccine) during the next enrollment period, the student will be required to update their health record **at least one week prior to the start of the semester**. Any student who is not current with immunizations on the first day of the semester shall not be permitted to participate in any patient-related activities. The student will be automatically dropped on the first day of the semester from any patient-related courses, rotations, and/or activities and will not be allowed to complete any patient-care related courses during the entire semester. Students may enroll in patient-care courses for the following semester if all immunizations, CPR, flu vaccine (if applicable) and TB screening are completed by the first day of the following semester. Patient-related activities are provided throughout all four-years of pharmacy school.

Immunization records are maintained for each student on the School of Pharmacy website. To view their personal records, students must have an eraider account.

Flu Vaccine

At the current time, the flu vaccine is provided by the Institutional Office of Student Services. This vaccine is provided in October each year at no cost to the student. The students will be notified when the vaccine is available and they must obtain the vaccine and provide a copy of the documentation to the Office of Student Affairs in Amarillo or Abilene. Any student who is allergic or has some other medical condition which prevents them from having this vaccine must provide a doctor's statement declaring the medical condition which prevents the injection. If at any time a student enters a clerkship rotation and the rotation site requires the flu vaccine before the vaccine is available through the Institutional Office of Student Services, the student is required to obtain any and all required shots before the rotation begins and the cost of the vaccine is born by the student.

CPR

It is the responsibility of the student to maintain CPR certification. The CPR certification is a

requirement for all students in patient-care related activities. Your CPR certification must remain current at all times.

Tuberculosis Screening

All students shall participate in annual TB screenings.

All new students shall have an initial TB screening pre-matriculation (prior to enrollment in the School of Pharmacy).

Continuing Students without a previous positive reaction previously to a PPD skin test must have a follow-up PPD skin test each year. Those who have had a positive reaction must complete a TB Questionnaire annually and chest films will be ordered as needed, based on TB Questionnaire results.

Student Health Insurance

Students are not required to have health insurance coverage, but it is highly recommended. Health care services are provided by the Center for Family Medicine. All questions concerning coverage can best be answered by calling the Center for Family Medicine directly at 806-212-3500 or via contact info as provided by the Student services office.

Criminal Background Checks

Once a student has been offered admissions, the University will conduct a criminal background check on the applicant before finalizing admission. The background check is only conducted on an applicant who signs a consent form, but those applicants who are fully admitted must have documented records of no felony convictions or a deferred adjudication for a felony before admission is final. You will be provided a printed copy of the University policy detailing your rights and responsibilities during the on-campus interview. Please contact the office of student services if you have any questions.

Drug Screen

Many of the facilities that accept students for professional practice experiences require a clean drug screen prior to the first day on service. Students will be informed if a drug screen is required and given a list of certified laboratories in each community where the screen may be performed. If you are required to have a clean drug screen, you will be given further directions, including a description of your rights and responsibilities. The cost of a drug screen is paid by the student, who must submit the report to the Clerkship Office prior to the first scheduled day, as described in the clerkship manual.

THE PROFESSIONAL PROGRAM

Grading

Courses are graded on a numerical scale with a grade of 75% considered as a satisfactory score and 70% as minimal acceptable score for a single course. Students must maintain a cumulative average grade of 75% to progress. No letter grades will be recorded on official transcripts. The Dean's List will be calculated on an overall GPA of 95% or above each semester. It is the policy of Texas Tech University Health Sciences Center School of Pharmacy to issue grades of "I" (Incomplete) when a

course requirement, such as an exam or a report, has not been completed. The student has the responsibility of contacting the faculty member about an exam or a report that has not been completed to determine the validity of grade of incomplete. The faculty member may allow up to a maximum of one year for a student to complete the course. If it is not completed within this time, the “I” will be changed to a “0%.” The student is responsible for completing the work that will remove the “I.” The following grading symbols are used in common by all TTU Health Sciences Center Schools:

Grade	Description	Grade Points Per Semester Hour
“I”	Incomplete	N/A*
“W”	Withdrawal	N/A*
“WF”	Withdraw Failing	0.00
“DW”	Dropped	N/A*
“PR”	In Progress	N/A*

*Not included in the calculation of grade point average.

Student Success Initiative

The Student Success Initiative (SSI) is a program that identifies students who are at academic risk based on previous academic performance. The criteria used to select students for this program are

- Cumulative GPA less than 80%
- Overall course grade less than 70% during the previous semester
- Overall course grade less than 75% in 2 or more courses during the previous semester
- Second chance exam during the previous semester
- Annual Outcomes Assessment grade less than 70%
- Referred to program by a team leader for a course currently enrolled in due to poor performance on assessment(s)/assignments(s)

Each student in the SSI program is required to meet with a Student Success Initiative member. The student receives a Student Success Action Plan Form. They are asked to reflect on their previous academic performance, and they are given guidelines to develop an action plan for improvement. The Student Success Initiative member offers guidance, suggestions, and support to the student as they review the SSI Action Plan together.

Progression

Students who satisfy the stated requirements of each professional year will remain in good academic standing and will advance to the next professional year. The Student Progressions Committee will review every student’s academic performance as measured by grades in courses attempted and in mastering defined curricular outcome expectations. These performance measures will serve as the basis for annual progression recommendations. The Student Progressions Committee may recommend to the Dean full progression, a reduced load curriculum, remediation activities in areas where the student has documented deficiencies, academic probation, or dismissal. This progression will serve as the determination of a student’s class standing for purposes of course pre-requisites.

Academic Probation:

Students may be placed on academic probation for one of the following reasons:

- Course failure
 - Each instance in which a student completes a course with a grade less than 70%, regardless of semester in which the failure occurred. Based on the number of course failures or in combination with one of the reasons below, a student may advance more than one level of probation even in a single semester.
- Academic or professional misconduct
- Failure to achieve the minimum standard on the PCOA examination
 - The PCOA minimum requirement applies only to the most recent administration of the exam. In some specific circumstances improved PCOA performance in a subsequent year can ameliorate academic probation level associated with previous poor PCOA performance. See SOP OP: 77.P.26 for specific circumstances.

Each single strike or combination of strikes determines the student's academic probation level as described below.

Academic Probation, Level 1:

- Defined as the first instance in which one of the above progression requirements are not met.
 - Students on Academic Probation, Level 1 may continue enrolling only in courses for which the student has successfully completed course prerequisites. Students must enroll in any course or courses failed at the next time of offering.

Academic Probation, Level 2:

- Defined as the second instance in which any of the above progression requirements are not met.
 - Students on Academic Probation, Level 2 may continue enrolling only in courses for which the student has successfully completed course prerequisites unless the Level 2 probation is invoked due to two instances of semesters with course failure(s). In this case, the student will be prohibited from enrolling in any new required SOP classes until all failures are corrected. The student may petition for additional classes to be taken, and these petitions will be reviewed by the Student Progressions Committee with a recommendation made to the Dean.

Academic Probation, Level 3:

- Defined as the third instance in which any of the above progression requirements are not met.
 - Academic Probation, Level 3 will result in dismissal from the School of Pharmacy.

Additionally, any student who does not successfully complete each course each semester may be required by the Progressions Committee to remediate any deficiencies identified.

Course Failures Resulting From Sanctions Secondary to Academic or Professional Misconduct

A first course failure resulting from sanctions enforced due to academic misconduct will result in the student being placed on academic probation. If the student is in good standing at the time, the student will be placed on first probation. If the student is already on academic probation, then the failure will raise the student's probation by 1 level (i.e., 1st to 2nd or 2nd to Dismissal). A second course failure resulting from sanctions due to academic misconduct, regardless of semester, will result in student dismissal from the school.

A first course failure resulting from sanctions enforced due to professional misconduct may result in the student being placed on academic probation. If the student is in good standing at the time, the

student will be placed on first probation. If the student is already on probation, then the failure will raise the student's probation by 1 level (i.e., 1st to 2nd or 2nd to Dismissal). A second course failure resulting from sanctions due to academic or professional misconduct, regardless of semester, may result in student dismissal from the school.

Honor Council

The purpose of the Texas Tech Health Sciences Center School of Pharmacy Honor Council is to serve as student and faculty representatives who foster and uphold the School of Pharmacy Code of Professional and Academic Conduct. The Honor Council also serves to promote integrity as well as develop a culture of honesty and student accountability within the school and their respective classes. The Honor Council will convene and provide rulings over student violations of the Code of Professional and Academic Conduct and to promote integrity and accountability. The Honor Council will provide recommended sanctions when a rules violation has been committed and submit summary reports directly to the Dean of the School of Pharmacy as well as report back to their classes.

http://www.ttuhschool.edu/sop/administration/policies/documents/SOP_OP_77.P.27_School_of_Pharmacy_Honor_Council.pdf

Campus Assignment Policy

To access the SOP's policy on campus reassignment, please link to the School's website:

<http://www.ttuhschool.edu/sop/current/students/PolicyonCampusAssignment.pdf>

Withdrawal Policy (from courses)

Semester-long Courses: In order to be assured of an official withdrawal from a professional school course, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the beginning of the 12th day of the term.

8-week Courses: In order to be assured of an official withdrawal from a professional school 8-week course, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the beginning of the 6th weekday following the first day of class.

Rotations: In order to be assured of an official withdrawal from a professional school rotation, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the end of the 4th weekday following the first day of the rotation.

6-week Courses: In order to be assured of an official withdrawal from a professional school 6-week course, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the end of the 4th weekday following the first day of class.

4-week Courses: In order to be assured of an official withdrawal from a professional school 4-week course, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the end of the 3rd weekday following the first day of class.

2-week Courses: In order to be assured of an official withdrawal from a professional school 2-week course, the student must have completed and submitted a course withdrawal request to the Office of Student Services before the end of the 2nd weekday following the first day of class.

Students who do not complete a course and who do not officially withdraw from that course will receive the grade calculated for their performance had they remained in the course.

Second Chance Policy

The Second Chance Policy applies to all courses except case studies and clerkships. A Doctor of Pharmacy student, if eligible, may take a single comprehensive examination to demonstrate competency in that course providing

- the student has passed 50% or more of the major assessments in that course,
- the student has earned a final grade of 66-69% in the course, and
- the student has not exceeded the number of second chance attempts as outlined below.

A student may invoke the Second Chance Policy in a maximum of two courses per semester and no more than four times total in his/her career at the School. No student may invoke the second chance exam for the same course twice. The second chance assessment shall occur in a timely fashion, the timing at the discretion of the course team.

Prerequisites

The curriculum is designed to follow a logical and academically sound sequence of courses. P-2 courses may not be taken without the permission of the Subcommittee on Credentialing or until the student is formally advanced to P-2 standing. P-3 courses may not be taken without the permission of the Subcommittee on Credentialing or until the student is formally advanced to P-3 standing. P-4 rotations may not be taken until all previous P-1 through P-3 course work is satisfactorily completed.

Enrollment Without Credit - Course Audit

Persons who wish to audit a course for no grade must obtain written permission from the dean of the pharmacy school. Those who audit a course do so for the purpose of hearing or seeing only; they do not have the privilege of participating in class discussions or laboratory or field work, of turning in papers, or of receiving a grade or credit in the course. Students who audit a course will not be listed on the class roll, and no notation of the audit will be made on the student's transcript.

Students who are enrolled for 12 semester hours or more may audit a course without paying an additional fee. Students who are enrolled for fewer than 12 hours must pay a \$10 fee for auditing a course.

Code of Professional Conduct

You are expected to subscribe to the Code of Ethics of the American Pharmaceutical Association and the School of Pharmacy Code of Student Conduct. Students who have been found to be in violation of this code of ethics will be disciplined. The Code of Ethics and Code of Student Conduct is printed in the *Texas Tech University Health Sciences Center Student Affairs Handbook*, which can be found at the Texas Tech University Health Sciences Center web site.

Attendance

Regular attendance is necessary for satisfactory achievement. Therefore, it is the responsibility of the student to attend class in accordance with the requirements of the course as established by the faculty of Texas Tech University Health Sciences Center School of Pharmacy.

Computer Literacy

Pharmacy is an information intensive profession and its practice relies heavily on tools such as the computer. Listed below are the minimal computing skills required while in the School of Pharmacy:

- loading and running an application software package such as word processing;
- typing a document into a word processing program;
- saving and printing a document;
- navigating the internet (e.g., email, accessing web pages)

Academic Support Services

You are encouraged to seek assistance from the faculty. This assistance is free and faculty are a valuable resource. In addition, the Office of Student Services can be contacted by students demonstrating any indication of academic difficulty to explore possible areas of appropriate counseling or referral for resolution. Academic difficulty resulting from personal problems may be resolved through a variety of available resources, including professional counseling services provided as part of student health services.

Curricular Competencies and Assessment

The faculty has identified the set of competencies that you must possess to graduate with the Doctor of Pharmacy degree. Overall curricular competencies are further defined as to level of mastery expected upon the completion of each course within the curriculum.

Your progress in developing mastery will be assessed annually in a school-wide assessment program. The purposes of the program are to help you evaluate your personal and professional development, help you identify areas of needed remediation, and help the faculty monitor the overall performance of the curriculum in achieving the expected outcomes. The School of Pharmacy uses the Pharmacy Curriculum Outcomes Assessment (PCOA), developed and delivered by the National Association of Boards of Pharmacy, as their primary assessment tool. The PCOA assesses an individual student's overall performance in several key curricular areas based on how far along they are in our curriculum. It also provides the School of Pharmacy with data on how our students are performing compared to other schools in the nation. In cases where individual students have not successfully remediated their deficiencies after repeated attempts, the results of the annual assessment may serve as documentation in support of academic probation.

The academic program is designed to provide Pharm.D. candidates with opportunities to develop the knowledge, skills, and behaviors required of a competent and ethical practicing pharmacist. The program's fourth academic year is designed to provide candidates with opportunities to 1) practice acquired skills, 2) use learned pharmacy knowledge, and 3) exhibit professional behaviors. Basic drug knowledge is considered essential to candidate success during these experiences and opportunities. To

ensure that each candidate is equipped with the basic drug knowledge to succeed in the fourth year of the program, all candidates enrolled within the third year of the academic program (P3 candidate) will be assessed for basic drug knowledge. This High Risk Drug Knowledge Assessment (HRDKA) will be administered each year, typically early in the Spring semester. Each P3 candidate must provide proof of drug knowledge competency through achievement of 75% or greater score upon the HRDKA. P3 candidates failing to meet or exceed the HRDKA's criterion will be required to successfully complete remediation exercises and to pass the HRDKA prior to enrollment within the program's Advanced Pharmacy Practice Experiences (P4 clerkships). The cost of the remediation may be borne by the student.

The HRDKA will cover the following domains:

- Drug name identification (brand and generic)
- Normal dosing
- Indication
- Contraindications
- Mechanism of action
- Drug interactions
- Side effects
- Lab assessment
- Pharmacokinetics/Pharmacodynamics

Medications included in the HRDKA are derived from the top 200 prescribed out-patient medications and those commonly used in Health Systems. A list of those medications being evaluated will be made available to the candidates each year prior to the HRDKA date.

TTUHSC "Tech's Top 10" Terminal Objectives

- TO1** Design, implement, evaluate, monitor, adjust, and document pharmacotherapeutic plans
- TO2** Prospectively review orders and records to evaluate a drug regimen
- TO3** Prepare, dispense, and administer safe and rational medication regimens
- TO4** Evaluate pharmacy business models and pharmacy services
- TO5** Evaluate population based data
- TO6** Devise and implement strategies to improve population based outcomes
- TO7** Retrieve, analyze, and interpret lay and scientific literature
- TO8** Communicate and collaborate with patients, caregivers, and other stakeholders
- TO9** Demonstrate professional, legal, and ethical attitudes and behaviors
- TO10** Demonstrate the skills needed for continuous professional development

These 10 Program outcomes are linked to 57 Ability Statements that are cross linked to the 2014 Center for the Advancement of Pharmacy Education (CAPE) Outcomes. The following link provides access to the Terminal Outcomes and their associated Ability Statements:

https://www.ttuhschool.edu/pharmacy/documents/academics/Terminal_Outcomes_and_Ability_Statements.pdf

Graduation

Students are eligible for graduation upon successful completion of all academic and clinical

(Professional Practice Experiences) requirements and documented competency in the P4 annual assessment. The student will earn a minimum of 169 credit hours, a minimum grade point average of 75, and is responsible for knowing and satisfying degree and graduation requirements. Students must be enrolled in the term in which they plan to graduate.

Program of Study

Year 1

Students will be taught basic biomedical and pharmaceutical sciences. Pharmaceutical sciences include the study of physical, chemical, and biological aspects of drug dosage forms; drug action; and pharmacotherapy. Students also begin developing their pharmacy practice and patient care knowledge and skills through several courses and the first of a longitudinal Professional Practice Experience clerkship that will continue through the second year.

Year 2

The focus is on studies of disease states and pharmacotherapy. Students learn special skills in therapeutically dosing and monitoring patients with potentially toxic therapeutic agents. Clinical practice knowledge and skills are developed through studying the use, and potential problems with, commonly prescribed medications. Basic physical assessment skills for therapeutic drug monitoring are introduced. Students continue the development of their practice knowledge and skills through the longitudinal Introductory Professional Practice Experience clerkship in community pharmacy practice.

Year 3

This year continues studies of disease states and pharmacotherapy. Drug distribution and control skills within community and institutional practices are a major focus in Professional Practice clerkships. Skills for managing drug therapy and providing case management are provided through clerkships in patient care facilities. Students are required to complete (4) six-week rotations (1/2 day for four days a week). These rotations include inpatient clinical skills, ambulatory clinical skills, basic hospital, and basic community and may be based at any of the Texas Tech University Health Sciences Center campuses at Amarillo, Abilene, Dallas, and Lubbock. Relocation travel and living expenses are the student's responsibility.

Year 4

Devotes 48 weeks to full-time clinical pharmacy experiences in various patient care sites. These rotations are as follows: six weeks adult medicine, six weeks pediatrics, six weeks geriatrics, six weeks general primary care, six weeks rural community practice, six weeks hospital / health system practice, and two electives of six weeks duration each, depending on the student's practice interests. The fourth year may be based at any of the Texas Tech University Health Sciences Center campuses at Amarillo, Dallas, Abilene, and Lubbock. Relocation travel and living expenses are the student's responsibility.

2018-2019 CURRICULUM PLANNER*

P0 Preparation for Fall Semester

Orientation "Boot Camp"

P1 Fall Semester

Credit Hours	Course Name and Number
0	PHAR 1101 Introduction to Pharmacy Practice I (Longitudinal Course – Enrollment in Spring only)
2	PHAR 1220 Foundations in Pharmacy Practice
4	PHAR 1430 Biological Foundations in Pharmacy and Patient Assessment with lab
4	PHAR 1432 Pharmacy Immunology and Microbiology with Clinical Immunizations lab
4	PHAR 1440 Molecular Foundations of Therapeutics
4	PHAR 1460 Pharmacy Science and Calculations
2	PHAR 1250 Clinical Correlations 1
0	Co-curricular / Inter-professional (IPE) activity requirement**

20

P1 Spring Semester

Credit Hours	Course Name and Number
1	PHAR 1101 Introductory Professional Practical Experiences
2	PHAR 1233 Principles of Disease
2	PHAR 1240 Applied Medicinal Chemistry
4	PHAR 1431 Biological Foundations in Pharmacy and Patient assessment II with lab
4	PHAR 1441 Principles of Drug Structure and Action
4	PHAR 1461 Pharmacy Formulations and Compounding with Lab
2	PHAR 1251 Clinical Correlations 2
0	Co-curricular / IPE activity requirement**

19

P2 Fall Semester

Credit Hours	Course Name and Number
3	PHAR 2341 Basic Pharmacokinetics
4	PHAR 2451 Pharmacotherapy: Infectious Disorders
2	PHAR 2204 Pharmaceutical Care Laboratory
0	PHAR 2101 Introductory Professional Practical Experiences (Longitudinal Course – Enrollment in Spring only)
2	PHAR 2205 Pharmaceutical Care
2	PHAR 1231 Pharmaceutical Care Systems
1	PHAR 2153 Pharmacotherapy: Blood & Reticuloendothelial
1	PHAR 4161 Pharmacotherapy: Bone & Joint
2	PHAR 3257 Pharmacotherapy: Endocrine
2	PHAR 3256 Pharmacotherapy: Respiratory
2	PHAR 1241 Clinical Research & Drug Literature Evaluation
0	Co-curricular / IPE activity requirement**

21

P2 Spring Semester

Credit Hours	Course Name and Number
1	PHAR 2104 Parenterals (with lab)

3	PHAR 2352 Pharmacotherapy: Cardiovascular
3	PHAR 3361 Case Studies I
2	PHAR 3240 Patient Assessment (with lab)
1	PHAR 2101 Introduction to Pharmacy Practice II (Longitudinal Course – Enrollment in Spring only)
2	PHAR 3233 Practice Management: Leadership & Ethics in Management
1	PHAR 3158 Pharmacotherapy: Reproductive
1	PHAR 3101 Pharmacotherapy: Therapeutic Dosing
1	PHAR 4166 Pharmacotherapy: Pharmacogenetics
2	PHAR 4233 Practice Management: Financial Management
2	PHAR 2231 Practice Management: Law
2	PHAR 3254 Pharmacotherapy: Renal
0	Co-curricular / IPE activity requirement**
<hr/>	
21	

P3 Fall Semester

Credit Hours	Course Name and Number
2	PHAR 3219 Institutional and Community Pharmacy Operations
2	PHAR 3250 Clinical Correlations 5
4	PHAR 3405 Integrated Therapeutics and Practice V
4	PHAR 3465 Integrated Therapeutics and Practice VI
0	Co-curricular / IPE activity requirement**

11 + _ Varies based on number of elective hours and rotation hours taken. See below:

6 Six hours of electives required. These are primarily offered during the fall and spring semesters and most are designated as requiring P3 standing. Options for satisfying elective credits outside the traditional schedule or outside the 3rd professional year are available and are designated as off-schedule electives. Elective offerings will vary based on faculty availability. Each elective course contains two credit hours. See list of course descriptions for elective courses available in this academic cycle.

A total of 4 rotations are required, but rotations may be taken in the fall or spring semester and there is the option to take a rotation during the Summer term by request; electives running during the morning sessions in the fall and spring semesters are taken when not enrolled in a clerkship rotation.

2	PHAR 4270 Community Pharmacy Practice Rotation
2	PHAR 4274 Institutional Pharmacy Practice Rotation
2	PHAR 4275 Ambulatory Clinical Skills Rotation
2	PHAR 4276 Inpatient Clinical Skills Rotation

P3 Spring Semester

Credit Hours	Course Name and Number
1	PHAR 4165 Pharmacotherapy: Special Populations
2	PHAR 3215 Clinical Correlations 6
4	PHAR 3407 Integrated Therapeutics and Practice VII
4	PHAR 3420 Clinical Toxicology and Drug Safety and Abuse
0	Co-curricular / IPE activity requirement**

11 + _ Varies based on number of elective hours and rotation hours taken. See below:

6 Six hours of electives required. These are primarily offered during the fall and spring semesters and most are designated as requiring P3 standing. Elective offerings will vary based on faculty availability. Each elective course contains two credit hours. See list of course descriptions for elective courses available in this academic cycle.

A total of 4 rotations are required, but rotations may be taken in the fall or spring semester and there is the option to take a rotation during the Summer term by request; electives running during the morning sessions in the fall and spring semesters are taken when not enrolled in a clerkship rotation.

- 2 PHAR 4270 Community Pharmacy Practice Rotation
- 2 PHAR 4274 Institutional Pharmacy Practice Rotation
- 2 PHAR 4275 Ambulatory Clinical Skills Rotation
- 2 PHAR 4276 Inpatient Clinical Skills Rotation

Elective offerings for the 2018-2019 academic year:

- PHAR 4206 Veterinary Pharmacy
- PHAR 4213 Advanced Cardiology
- PHAR 4214 Advanced Ambulatory Care
- PHAR 4219 Advanced Healthcare Communications
- PHAR 4220 Critical Care Therapeutics
- PHAR 4211 Advanced Infectious Disease
- PHAR 4216 Cultural Competency in Healthcare
- PHAR 4202 Advanced Pediatrics
- PHAR 4215 Advanced Geriatrics
- PHAR 4218 Advanced Oncology

36 SCH for entire P3 year

P4 Fall Semester

<u>Credit Hours</u>	<u>Course Name and Number</u>
2	PHAR 4241 Grand Rounds (Fall)
0	Co-curricular / IPE activity requirement**

P4 Spring Semester

<u>Credit Hours</u>	<u>Course Name and Number</u>
2	PHAR 4242 Grand Rounds (Spring)
0	Co-curricular / IPE activity requirement**

P4 Summer, Fall or Spring Semesters

Required rotations that can be taken in any of the semesters as assigned by the Experiential Office based on availability.

<u>Credit Hours</u>	<u>Course Name and Number</u>
6	PHAR 4675 Adult Medicine Rotation
6	PHAR 4656 Adult Primary Care Rotation
6	PHAR 4657 Pediatric Pharmacotherapy Rotation
6	PHAR 4658 Geriatric Pharmacotherapy Rotation
6	PHAR 4653 Advanced Rural Community Pharmacy Practice Rotation

6	PHAR 4654 Advanced Hospital / Health System Practice Pharmacy Rotation
12	All students are required to do two elective rotations (Six credit hours each). Electives are selected based upon availability and assigned by the Experiential Office.

52 semester hours for entire P4 year

Total hours required for graduation = 169 credit hours.*

*This curricular plan and associated SCH are for the Pharm.D. degree program. Additional courses/SCH required for the combined Pharm.D./MBA program are maintained in a separate catalogue listing.

The **Inter-professional activity and other **co-curricular activities** are required pursuant to accreditation standards from the American Council of Pharmacy Education (ACPE) and the Southern Association of Colleges and Schools (SACS). Activities satisfying the IPE requirement are peer-reviewed and approved by the TTUHSC IPE Steering Committee and completion of the IPE requirement is reflected on the transcript and required for awarding of the diploma.

COURSE DESCRIPTIONS FOR THE DOCTOR OF PHARMACY PROGRAM

PHAR 1001 - ANNUAL ASSESSMENT (0:0:0)

The School continually assesses student progression toward degree attainment and provides evaluation of quality of our curriculum. This 4-year, longitudinal process is designed to assess student knowledge, skills, and behaviors necessary for successful performance of the School's 10 terminal outcomes. The process consists of course-embedded assessments and other standardized testing. The School uses the Pharmacy Curriculum Outcomes Assessment (PCOA), developed by the National Association of Boards of Pharmacy, as its primary standardized assessment tool. The PCOA assesses an individual student's knowledge in four primary areas: 1) basic biomedical sciences, 2) pharmaceutical sciences, 3) Social, behavioral, and administrative pharmacy sciences, and 4) clinical sciences.

Levels: Pharmacy-Doctoral

FIRST YEAR COURSES

PHAR 1101 - INTRODUCTION TO PHARMACY PRACTICE I (1:0:1.25, F)

This introductory clerkship involves basic concepts and development of patient care skills for pharmacy practice, exposure to the role of the pharmacist in patient care settings, development of leadership skills for pharmacy practice, effective patient education and presentation skills, care of patients in pharmacy drug distribution and control systems, and ethical practices of pharmacists. Discussions, observation, and patient care experiences longitudinally throughout both Fall and Spring

semesters in the first professional year. Credit will be awarded in the SPRING semester. Requirements: Texas State Board of Pharmacy Intern-Trainee Licensure. Syllabus available.

Levels: Pharmacy-Doctoral, First year

PHAR 1220 – FOUNDATIONS IN PRACTICE OF PHARMACY (2:0:1 F, IVC)

Develop foundational skills and behaviors essential for success in the curriculum and the profession of pharmacy. Introduces the topics of the history of pharmacy, pharmacy law, professional responsibility, leadership, teamwork, communication, and the patient care process. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisite: PHAR 1250

PHAR 1250 – CLINICAL CORRELATIONS 1 (2:0:2 F)

Practical application of foundational concepts in science and the practice of pharmacy within an integrated, applied, small-group learning environment. Emphasizes the relationships between human biological and biochemical foundations, pharmacy science, professional leadership, and the practice of pharmacy. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisite: PHAR 1220, 1430, 1432, 1440, 1460

PHAR 1430 – BIOLOGICAL FOUNDATIONS IN PHARMACY AND PATIENT ASSESSMENT WITH LAB (4:4:1 F)

Students will learn how structure (anatomy) and function (physiology) are integrated in the major organ systems. That knowledge will be applied to the assessment of normal and abnormal physical function through patient simulation exercises. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisites: Phar 1440 and PHAR 1250

PHAR 1432 - PHARMACY IMMUNOLOGY AND MICROBIOLOGY WITH CLINICAL IMMUNIZATIONS LAB (4:4:1, F)

This course will focus on the immune system, enabling students to understand both the immune response to infectious agents and the nature of autoimmune diseases. The skills component will focus on the knowledge and skills necessary to qualify students as pharmacist immunizers upon graduation.

Requires CPR certification. Students must qualify for intern licensure at end of first year to begin performing/documenting supervised vaccinations toward State Board CE requirements. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisite: PHAR 1250

PHAR 1440 – MOLECULAR FOUNDATIONS OF THERAPEUTICS (4:4:0 F, IVC)

Molecular aspects of biological processes, including the chemistry of biomolecules, enzymology, metabolic pathways, bioenergetics, biochemical control mechanisms, molecular biology and genetics. Discussion of metabolic diseases, fundamentals of nutrition and molecular diagnostics. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisite: PHAR 1250

PHAR 1460 - PHARMACY SCIENCE AND CALCULATIONS (4:4:0, F, IVC)

This course introduces physicochemical principles of pharmaceutical dosage formulations, properties of drug substances and drug products, routes of administration, process of drug development, and all aspects of pharmaceutical calculations. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Fall

Co-requisite: PHAR 1250

PHAR 1233 – PRINCIPLES OF DISEASE (2:4:0 F, IVC)

This course provides core concepts and mechanisms of the basic processes underlying diseases. Lectures will cover definitions of terminology, cells and tissues involved, morphological alterations, explanation of relevant biochemical pathways and disease pathogenesis and clinical presentation. Emphasis will be given on lifespan, sex and gender and culture differences, where applicable. 8-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring, 1st eight weeks

Co-requisite: PHAR 1251

Pre-Requisites: PHAR 1432, PHAR1440

PHAR 1240 APPLIED MEDICINAL CHEMISTRY (2:4:0 F, IVC)

This introductory course is designed to facilitate understanding of fundamental concepts relating the application of medicinal chemistry to the practice of pharmacy. Basic principles of medicinal chemistry applied to the drug design and discovery process and introduction to the medicinal chemistry of drugs approved to treat major diseases. 8-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring, 2nd 8 weeks

Co-requisite: PHAR 1251, PHAR 1441

Pre-requisite: PHAR1440

PHAR 1251 – CLINICAL CORRELATIONS 2 (2:0:2 F)

Practical application of foundational concepts in science and the practice of pharmacy within an integrated, applied, small-group learning environment. Emphasizes the relationships between human biological foundations, human disease, principles of drug structure, action, and formulation, and the practice of pharmacy. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring

Co-requisite: PHAR 1233, 1240, 1431, 1441, 1460

PHAR 1431 – BIOLOGICAL FOUNDATIONS IN PHARMACY AND PATIENT ASSESSMENT WITH LAB (4:4:1 F)

Students will learn how structure (anatomy) and function (physiology) are integrated in the major organ systems. That knowledge will be applied to the assessment of normal and abnormal physical function through patient simulation exercises. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring

Pre-requisites: PHAR 1430 and PHAR 1440. Co-requisite: PHAR 1251

PHAR 1441 - PRINCIPLES OF DRUG STRUCTURE AND ACTION (4:4:0 F, IVC)

Basic principles of pharmacology, toxicology, pharmacokinetics and physicochemical properties of drug molecules. This introductory course is designed to facilitate understanding of the fundamental concepts of pharmacology and medicinal chemistry relating to drug action. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring

Co-requisite: PHAR 1251

Pre-requisite: PHAR 1432, PHAR 1440

PHAR 1461 – PHARMACY FORMULATIONS AND COMPOUNDING WITH LAB (4:4:1, F)

This course discusses compounding, dispensing, and patient counseling for various pharmaceutical dosage formulations (liquid, semisolid, solid, modified/controlled release, inhaled, and parenteral). The course allows students to practice pharmaceutical calculations and utilize compounding concepts and techniques. Topics include advanced drug delivery systems, biopharmaceuticals, drug properties influencing drug absorption and distribution, as well as drug-drug and drug-excipient interactions. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, First year Spring

Co-requisite: PHAR 1251

Pre-requisite: PHAR1460

SECOND YEAR COURSES

Enrollment in second year courses requires completion of first year curriculum. P-2 courses may not be taken without the permission of the Subcommittee on Credentialing or until the student is formally advanced to P-2 standing.

PHAR 2101 - INTRODUCTION TO PHARMACY PRACTICE II (1:0:1.25 F)

Continuation of PHAR 1101. This introductory clerkship involves basic practice concepts and skills for all areas of pharmacy practice, professional service learning and effective patient education and presentation skills, care of patients in drug distribution and control, and ethical practices of pharmacists. Discussion, observation, service learning, group presentations, and patient care experiences longitudinally throughout both Fall and Spring semesters in the second professional year. Credit will be awarded in the SPRING semester. Syllabus available

Levels: Pharmacy-Doctoral, Second year

PHAR 2341 - BASIC PHARMACOKINETICS (3:3:0 F, IVC)

Introduces the basic principles of pharmacokinetics, including compartmental and physiological analysis of the time courses of drug absorption, distribution, and elimination, with emphasis on the pharmacokinetic-based design of dosage regimen principles. 16 week course. Syllabus available.

PREREQ: PHAR 2515

Levels: Pharmacy-Doctoral, Second year

PHAR 1241 - CLINICAL RESEARCH AND DRUG LITERATURE EVALUATION (2:4:0 F, IVC)

The fundamentals of experimental design, implementation, and data analysis pertinent to pharmaceutical clinical investigations. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 2205 - PHARMACEUTICAL CARE (2:4:0 F, IVC)

Emphasis on interpretation and application of clinical laboratory medicine and clinical diagnostic medicine, introduction to medical documentation, integration of skills and knowledge for obtaining patient specific information, identifying and assessing medication-related problems, and developing pharmaceutical care plans. 8 week course. Syllabus available.

PREREQ: PHAR 1401 COREQ: Must be taken with PHAR 2204

Levels: Pharmacy-Doctoral, Second year

PHAR 2204 - PHARMACEUTICAL CARE LABORATORY (2:1:3 F)

Laboratory exercises in interviewing and counseling, prospective drug reviews, prescription dispensing, and physical assessment. 16 week course. Syllabus available.

COREQ: Must be taken with PHAR 2205

Levels: Pharmacy-Doctoral, Second year

PHAR 1231 - PHARMACEUTICAL CARE SYSTEMS (2:4:0 F, IVC)

Introduction to health and pharmaceutical care delivery within a framework of the medication-use system, social and behavioral aspects of health care, health informatics, public health and health promotion, pharmacy ethics, and organization and economics of health care. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 2451 - INFECTIOUS DISEASES – PHARMACOTHERAPY (4:4:0 F, IVC)

Pathophysiology, microbiology, and clinical presentation of infectious diseases; medicinal chemistry, pharmacology, and toxicology of anti-infective agents; prevention and therapeutic management of patients with common infections. 16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 2153 - PHARMACOTHERAPY III - BLOOD AND RETICULOENDOTHELIAL (1:2:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the blood and reticuloendothelial systems; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat blood and reticuloendothelial diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3256 - PHARMACOTHERAPY VI – RESPIRATORY (2:4:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the respiratory system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat respiratory diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3257 - PHARMACOTHERAPY VII – ENDOCRINE (2:4:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the endocrine system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat endocrine diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 4161 - PHARMACOTHERAPY X - BONE AND JOINT (1:2:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the musculoskeletal system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat musculoskeletal diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 2104 – PARENTERALS (1:1:2 F)

Using a weekly lecture/laboratory format, this course will focus on the performance of aseptic technique, preparation of small and large volume parenterals, safe handling of chemotherapy agents,

regulatory issues (USP 797 & NIOSH), parental calculations and quality assurance and documentation. This course is designed to culminate in the student being proficient in compounding of sterile products. 16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3240 - PATIENT ASSESSMENT (2:1:3 F)

Basic physical assessment is designed to provide the student essential foundation of knowledge about assessing the patient at any given period of time along the health care continuum. This course includes exercises in physical assessment skills using a body system approach, patient interviewing, pharmaceutical care planning and documentation, and setting therapeutic and monitoring goals in order to provide the student with a template on how to practice pharmacy with a patient-centered approach.

16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3361 - CASE STUDIES I (3:3:0 F)

Emphasizes the scientific foundation of pharmacy practice. Application of principles of pathophysiology and therapeutics to drug therapy issues through student-centered, problem-based instructional processes. 16 week course. Syllabus available.

PREREQ: PHAR 2341 and PHAR 2205

Levels: Pharmacy-Doctoral, Second year

PHAR 2352 - PHARMACOTHERAPY II – CARDIOVASCULAR (2:3:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the cardiovascular system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat cardiovascular diseases; and therapeutic management of patients. 16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3254 - PHARMACOTHERAPY IV – RENAL (2:4:0 F, IVC)

Pathophysiology and clinical presentation of common diseases of the renal system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat renal diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral

PHAR 3158 - PHARMACOTHERAPY VIII – REPRODUCTIVE (1:2:0 F, IVC)

Concepts of preventing conception; pathophysiology and clinical presentation of common diseases of the reproductive system; chemistry, pharmacology, and toxicology of common therapeutic agents used to treat reproductive system diseases; and therapeutic management of patients. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3101 - THERAPEUTIC DOSING – PHARMACOTHERAPY (1:2:0 F, IVC)

The application of pharmacokinetic and pharmacodynamic principles to the rational design of individualized drug dosing regimens incorporating patient-specific, disease-specific, and drug-specific factors. 8 week course. Syllabus available.

PREREQ: PHAR 2341

Levels: Pharmacy-Doctoral, Second year

PHAR 4166 - PHARMACOTHERAPY XVI – PHARMACOGENETICS (1:2:0 F, IVC)

Identifying the role of genetics in patient response to therapeutic agents, and possible means to improve the efficacy and safety of pharmacotherapy. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 2231 - PRACTICE MANAGEMENT – LAW (2:4:0 F, IVC)

The study of federal and Texas statutes and rules, which regulate the practice of pharmacy and drug distribution. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 4233 - PRACTICE MANAGEMENT - FINANCIAL MANAGEMENT (2:4:0 F, IVC)

Financial management concepts for pharmacy practice in all environments. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

PHAR 3233 - LEADERSHIP AND ETHICS IN MANAGEMENT (2:4:0 F, IVC)

Leadership and ethical principles as applied to management in all pharmacy environments. 8 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Second year

THIRD YEAR COURSES

Enrollment in third year courses requires completion of second year curriculum. P-3 courses may not be taken without the permission of the Subcommittee on Credentialing or until the student is formally advanced to P-3 standing.

PHAR 4165 – PHARMACOTHERAPY: SPECIAL POPULATIONS (1:1:0 F, IVC)

Unique therapeutic problems and clinical management of pregnant, nursing, pediatric and geriatric patients. 8 week course. Syllabus available.

Levels: Pharmacy- Doctoral

PHAR 3250 – CLINICAL CORRELATIONS 5 (2:0:1 F)

Practical application of concepts in science and the practice of pharmacy within an integrated, applied, small-group learning environment. Emphasizes the relationships between therapeutics and pharmacy operations. Key foundational concepts in science and the practice of pharmacy are also reinforced in the context of advanced scenarios.

Levels: Pharmacy-Doctoral, Third year Fall

Co-requisites: PHAR 3405, PHAR 3406, PHAR 3218a

PHAR 3405 – INTEGRATED THERAPEUTICS AND PRACTICE V (4:4:0 F, IVC)

This series highlights the therapeutic management of common disease states and clinical problems. Organized by organ system and integrating foundational sciences with clinical care, topic coverage spans pathophysiology, epidemiology, and clinical presentation in men and women across the lifespan and demonstrates how the chemistry and pharmacology of common therapeutic agents are applied to

the management of patients in both acute and chronic care in a variety of health-system contexts. As the fifth course in this series, the therapeutic areas of focus are Neurosensory and Psychiatry. 16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, Third year Fall

Co-requisite: PHAR 3250

Pre-requisites: PHAR 1220, PHAR 1233, PHAR 1240, PHAR 1431, PHAR 1441, PHAR 1460

PHAR 3406 – INTEGRATED THERAPEUTICS AND PRACTICE VI (4:4:0 F, IVC)

This series highlights the therapeutic management of common disease states and clinical problems. Organized by organ system and integrating foundational sciences with clinical care, topic coverage spans pathophysiology, epidemiology, and clinical presentation in men and women across the lifespan and demonstrates how the chemistry and pharmacology of common therapeutic agents are applied to the management of patients in both acute and chronic care in a variety of health-system contexts. As the sixth course in this series, the organ systems and therapeutic areas of focus are the Gastrointestinal and Hepatic systems, as well as obesity, nutrition, and wellness.

16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, Third year Fall

Co-requisite: PHAR 3250

Pre-Requisite – PHAR 1220, PHAR 1233, PHAR 1240, PHAR 1431, PHAR 1441

PHAR 3219 – INSTITUTIONAL/COMMUNITY PHARMACY OPERATIONS (3:0:1 F, IVC)

This course focuses upon the skills required to manage the operational aspects of community and institutional pharmacies. Students will learn skills associated with the expanded focus on drug therapies, quality control, cost containment, procurement of equipment and design to facilitate the workflow of the pharmacy, and other skills necessary to guarantee the efficient and effective operation of the institutional and community pharmacies. Additional topics such as continuity of care will be discussed.

16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, Third year Spring

Co-requisite: PHAR 3251

PHAR 3251 – CLINICAL CORRELATIONS 6 (2:0:1 F)

Practical application of concepts in science and the practice of pharmacy within an integrated, applied, small-group learning environment. Emphasizes the relationships between therapeutics, medication safety, pharmacy operations. Key foundational concepts in science and the practice of pharmacy are also reinforced in the context of advanced scenarios.

Co-requisites: PHAR 3407, 3420, 3219

PHAR 3407 – INTEGRATED THERAPEUTICS AND PRACTICE VII (4:4:0 F, IVC)

This series highlights the therapeutic management of common disease states and clinical problems. Organized by organ system and integrating foundational sciences with clinical care, topic coverage spans pathophysiology, epidemiology, and clinical presentation in men and women across the lifespan and demonstrates how the chemistry and pharmacology of common therapeutic agents are applied to the management of patients in both acute and chronic care in a variety of health-system contexts. As the seventh course in this series, the organ systems and therapeutic areas of focus are Oncology and Hematology, as well as pharmacogenomics, pain, palliative and end of life care.

16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, Third year Spring

Co-requisite: PHAR 3251

Pre-requisites: PHAR 1220, PHAR 1233, PHAR 1240, PHAR 1431, PHAR 1432, PHAR 1441, PHAR 1460

PHAR 3420 – CLINICAL TOXICOLOGY AND DRUG SAFETY AND ABUSE (4:4:0 F, IVC)

This course focuses on the toxicology and clinical treatment of overdoses of common therapeutic agents and poisons. Integrating both foundational sciences and clinical care, topic coverage includes common drugs of abuse as well as concepts of patient safety.

16-week course. Syllabus available.

Levels: Pharmacy-Doctoral, Third year Spring

Co-requisite: PHAR 3251

Pre-requisites: PHAR 1220, PHAR 1233, PHAR 1240, PHAR 1431, HAR 1441, PHAR 3405 & PHAR 2401

PHAR 4270 - COMMUNITY PHARMACY PRACTICE ROTATION (2:0:16 F)

As a P3 IPPE clerkship, this course exposes the learner to pharmaceutical care in various community pharmacies. Four hours, four mornings each week for 6 weeks. Syllabus available.

Levels: Pharmacy-Doctoral. Third year. rotation block assigned by Experiential office.

PHAR 4274 - INSTITUTIONAL PHARMACY PRACTICE ROTATION (2:0:16 F)

As a P3 IPPE clerkship, this course exposes the learner to practical experiences in unit dose drug distribution systems and preparation of sterile products. Four hours, four mornings each week for 6 weeks. Syllabus available.

Levels: Pharmacy-Doctoral. Third year. rotation block assigned by Experiential office.

PHAR 4275 - AMBULATORY CLINICAL SKILLS ROTATION (2:0:16 F)

On this P3 IPPE clerkship, students will use their content knowledge and communication abilities obtained in the classroom and laboratory to learn and or improve their basic clinical skills provided in the outpatient health care setting. This clerkship is designed to enhance the student's understanding of the unique characteristics of patients, communication skills, physical assessment skills, and pharmacotherapy management of chronic or acute disease states in the ambulatory care setting to improve the student's necessary abilities to provide direct patient pharmaceutical care and disease management. Four hours, four mornings each week for 6 weeks. Syllabus available.

Levels: Pharmacy-Doctoral. Third year. rotation block assigned by Experiential office.

PHAR 4276 - INPATIENT CLINICAL SKILLS ROTATION (2:0:16 F)

As a P3 IPPE clerkship, this course exposes the learner to pharmaceutical care in the inpatient setting, including development of basic clinical skills in the care of inpatients. Rotations may be completed in any inpatient care environment. Four hours, four mornings each week for 6 weeks. Syllabus available.

Levels: Pharmacy-Doctoral. Third year. rotation block assigned by Experiential office.

PHAR 4202 - ADVANCED PEDIATRICS (2:5.3:0 F, IVC)

ELECTIVE COURSE. Through a series of lectures, discussions, and a project, students become familiar with the pathophysiology, clinical presentation, epidemiology, and therapeutic management of common and select pediatric disease states. The student will also develop and improve upon skills such as self-directed learning, clinical and interpersonal skills, and professional values and behaviors.

6 week course. Syllabus available.

PREREQ: PHAR 4165

Levels: Pharmacy-Doctoral. Third year

PHAR 4206 - VETERINARIAN PHARMACY (2:5.3:0 F, IVC)

ELECTIVE COURSE. Study of the pharmacist's professional role regarding veterinarian products and medical devices common to veterinarian pharmacy practice, emphasis on diseases of animals and the effectiveness, safety, limitations and composition of therapeutic entities used in the treatment of animal diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral. Third year

PHAR 4211 - ADVANCED INFECTIOUS DISEASES (2:5.3:0 F, IVC)

ELECTIVE COURSE. In-depth, primary literature-based perspective of infectious diseases including a focus on resistant pathogens and the importance of appropriate pharmacodynamics in the treatment of infections. This course will also provide information on novel and innovative topics such as the pharmacist's role in emergency preparedness, antimicrobial management techniques, and home IV antibiotic therapy to provide students with a broader knowledge of infectious diseases in pharmacotherapy. 6 week course. Syllabus available.

PREREQ: PHAR 2451

Levels: Pharmacy-Doctoral. Third year

PHAR 4213 - CURRENT TOPICS IN PHARMACY PRACTICE: ADVANCED CARDIOLOGY (2:5.3:0 F, IVC)

ELECTIVE COURSE. The Advanced Cardiology Elective is designed to expose students to advanced therapeutic topics within cardiovascular pharmacotherapy. A contemporary focus on late-breaking cardiovascular topics, important for pharmacists, along with the chemistry, pharmacology, and toxicology of novel therapeutic agents used to treat cardiovascular diseases is provided. 6 week course. Syllabus available.

PREREQ: PHAR 2352

Levels: Pharmacy-Doctoral. Third year

PHAR 4214 - SPECIAL TOPICS IN ADVANCED PATIENT MANAGEMENT IN AMBULATORY CARE (2:5.3:0 F, IVC)

ELECTIVE COURSE. The Advanced Ambulatory Care Elective is designed to expose students to advanced topics within the ambulatory care practice setting. The elective is intended to build upon the core disease state knowledge learned in the pharmacotherapy sequence and introduce or expand upon topics either not covered or only briefly discussed by the respective pharmacotherapy course. This elective will focus on the assessment and outpatient management of core ambulatory care topics, including (but not necessarily limited to) diabetes, hypertension, hyperlipidemia, anticoagulation, and heart failure. Students will review therapeutic management strategies, national clinical guidelines, and clinical trial data to make clinical decisions in both simple and complex patients. 6 week course. Syllabus available.

PREREQS: PHAR 2352 and PHAR 3257

Levels: Pharmacy-Doctoral. Third year

PHAR 4215 - ADVANCED GERIATRICS ELECTIVE (2:5.3:0 F, IVC)

ELECTIVE COURSE. This course will involve advanced discussion of the pathophysiology/ pharmacotherapy for commonly seen geriatric disease states. The course will also provide the opportunity to explore issues related to drug therapy in the elderly population across various practice settings. 6 week course. Syllabus available.

PREREQ: PHAR 4165

Levels: Pharmacy-Doctoral. Third year

PHAR 4216 - CULTURAL COMPETENCY IN HEALTHCARE (2:5.3:0 F, IVC)

ELECTIVE COURSE. Many states are mandating that health care providers be trained in, and implement, “cultural/diversity” awareness into their practices. This elective will be a journey for those enrolled to increase awareness and understanding of the unique cultural needs to enable them to provide optimal care for their patients. The course will not have traditional examination assessments, rather assessments will focus on cultural experience activities, which will increase the students’ awareness of the flaws in many of our traditional communications and assumptions when caring for patients. The goal of this course is to enhance student awareness of differing beliefs and practices which influence everything from patient assessment to patient acceptance of, and adherence to, their medical care plan. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral. Third year

PHAR 4218 – ADVANCED ONCOLOGY (2:5.3:0 F, IVC)

ELECTIVE COURSE. This course will build on the foundations of knowledge in cancer physiology and pharmacotherapy to support the in-class discussions and understanding of cutting-edge and literature-based perspectives in medical oncology. This course will focus on major challenges in cancer therapy (drug resistance, host toxicity, cancer metastasis) and new anti-cancer drug discovery and development. 6 week course. Syllabus available.

PREREQ: PHAR 4264

Levels: Pharmacy-Doctoral. Third year

PHAR 4219 - ADVANCED PATIENT COMMUNICATIONS (2:5.3:0 F, IVC)

ELECTIVE COURSE. Advanced Patient Communications is a non-traditional, skills-based course with an emphasis on developing excellence in communication skills through the processes of “see one-do one” in the areas of patient counseling, patient interviewing, and patient education. The course will provide an additional focus on communication during challenging patient encounters and environments. The course is limited to 30 participants. A brief outline of key topics includes: patient counseling/patient interviewing, patient education, reflective responses, improving listening skills under ideal and less than ideal patient care environments, recognizing barriers to effective patient communication, establishing the pharmacist and patient relationship, and non-prescription medication consults. The instructional methods and assessments include classes that will begin with a short lecture and a faculty demonstration of the lecture topic. Student graded activities include a journal article presentation, evaluation of the student’s CV, and a simulated residency interview. No other traditional pen and paper assessments. Students who elect this course will develop communication skills needed to build an effective relationship with the patient insuring appropriate medication use and improved patient outcomes. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral. Third year

PHAR 4220 – CRITICAL CARE THERAPEUTICS (2:5.3:0 F, IVC)

ELECTIVE COURSE. The Critical Care Therapeutics elective course is designed to expose students to the pathophysiology and clinical presentation of common diseases, pharmacotherapy, and decision making process for the treatment of patients who are critically ill. This elective is intended to build upon the core disease state knowledge learned in the pharmacotherapy sequence and introduce, or expand upon, topics either not covered or only briefly discussed in the the respective P2 and P3 pharmacotherapy course. A focus of the content will pertain to the acute care assessment and management of core critical care related topics allowing the students to apply knowledge in therapeutic management strategies, national clinical guidelines, and clinical trial data to make clinical decisions in both simple and complex patients. 6 week course. Syllabus available.

PREREQ: PHAR 3355 and PHAR 3461

Levels: Pharmacy-Doctoral. Third year

PHAR 4226 - SPECIAL TOPICS (2:0:16 F)

ELECTIVE COURSE. Advanced studies in administrative, behavioral, clinical, or pharmaceutical sciences. May be taken for a total of 4 credit hours. Must take two courses. 6 week course.

Levels: Pharmacy-Doctoral. Schedule determined with faculty mentor.

PHAR 4227 - SPECIAL PROJECTS (2:0:16 F)

ELECTIVE COURSE. Independent research for advanced students in administrative, behavioral, clinical, or pharmaceutical sciences. 6 week course.

Levels: Pharmacy-Doctoral. Schedule determined with faculty mentor.

PHAR 4201 - SPECIAL PROJECTS II (2:0:16 F)

ELECTIVE COURSE. Second semester of independent research for advanced students in administrative, behavioral, clinical, or pharmaceutical sciences. 6 week course.

Levels: Pharmacy-Doctoral. Schedule determined with faculty mentor.

FOURTH YEAR COURSES

Enrollment in fourth year courses requires completion of third year curriculum. P-4 rotations may not be taken until all previous P-1 through P-3 course work is satisfactorily completed and the student has successfully passed the High Risk Drug Knowledge Assessment (HRDKA) exam.

PHAR 4241 - GRAND ROUNDS (FALL) (2:2:0 F)

Grand Rounds is a Capstone course that is designed to be a culminating experience which synthesizes knowledge and communication skills developed through the curriculum, fosters lifelong learning, and prepares students for licensure examination and pharmacy practice. As pharmacists, TTUHSC SOP graduates will be called upon to present to health care professionals. The student will develop an ACPE-quality continuing education program which fulfills all of the requirements of an ACPE provider. 16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4242 - GRAND ROUNDS (SPRING) (2:2:0 F)

Grand Rounds is a Capstone course that is designed to be a culminating experience which synthesizes knowledge and communication skills developed through the curriculum, fosters lifelong learning, and prepares students for licensure examination and pharmacy practice. As pharmacists, TTUHSC SOP graduates will be called upon to present to health care professionals. The student will develop an ACPE-quality continuing education program which fulfills all of the requirements of an ACPE provider. 16 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4675 - ADULT MEDICINE ROTATION (6:0:40 F)

REQUIRED P4 APPE. The Adult Medicine Clerkship is an advanced pharmacy practice experience that is required of all P4 students. This clerkship is an extension of the P3 inpatient clinical skills clerkship (PHAR 4276), allowing for more intense and advanced experience. Students will be exposed to adult inpatients with a variety of disease states during the rotation. Students will continue to refine their critical thinking skills, that they have developed during their prior rotations and coursework, and will begin to apply all of the knowledge they have gained up to this point. Students will be asked to be

actively involved with following the patients, interacting with health care professionals, and in presenting/researching various disease states/drug therapy that is specific to their given rotation (see core disease states). 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4656 - AMBULATORY CARE ROTATION (6:0:40 F)

REQUIRED P4 APPE. The Advanced Ambulatory Care Clerkship is designed to expose students to advanced topics within the ambulatory care practice setting. This clerkship is intended to build upon the core disease state knowledge learned in the pharmacotherapy sequence and introduce or expand upon topics either not covered or only briefly discussed by the respective pharmacotherapy course. This clerkship will focus on the assessment and outpatient management of core ambulatory care topics including (but not necessarily limited to) diabetes, hypertension, hyperlipidemia, anticoagulation, heart failure, and asthma/COPD. Students will review therapeutic management strategies, national clinical guidelines, and clinical trial data to make clinical decisions in both simple and complex patients. Members of the teaching team are experienced clinicians actively practicing in the area of ambulatory care with personal experience running outpatient clinical pharmacist services including medication therapy management. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4657 - PEDIATRIC PHARMACOTHERAPY ROTATION (6:0:40 F)

REQUIRED P4 APPE. Pharmaceutical care experiences with ambulatory and inpatient pediatric patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4658 - GERIATRIC PHARMACOTHERAPY ROTATION (6:0:40 F)

REQUIRED P4 APPE. Pharmaceutical care experiences with ambulatory and inpatient geriatric patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4653 - RURAL COMMUNITY ROTATION (6:0:40 F)

REQUIRED P4 APPE. An advanced Rural Community Pharmacy Practice Clerkship providing pharmaceutical care experiences with ambulatory and/or institutionalized patients in a rural community. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4654 - ADVANCED HOSPITAL/HEALTH SYSTEM ROTATION (6:0:40 F)

REQUIRED P4 APPE. Pharmaceutical care experiences with institutionalized patients. 6 week course. Syllabus available

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4665 - CONSULTING PHARMACY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Student directed activities with special patient populations. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4666 - PEDIATRIC INTENSIVE CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. An advanced clerkship with a focus in pediatric critical care for the student with a special interest in pediatric pharmacotherapy. Each student will be responsible for the drug and non-drug therapy of critically ill children (under

supervision of preceptor). 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4668 - PEDIATRIC CAMP AND AMBULATORY CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability Pharmaceutical care opportunities in a pediatric summer camp environment. Each student will be responsible for the care of 6-8 children under the supervision of a licensed health-care professional. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4667 - DISEASE STATE/FORMULARY MANAGEMENT ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability Course will incorporate policy development, formulary management, and disease state management utilizing TDCJ healthcare facilities. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4692 - PSYCHIATRY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients having psychiatric diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4669 - GEROPSYCHIATRY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability A formative clerkship to develop the clinical skills related to geriatric patients with psychiatric disorders. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4699 - SPECIAL TOPICS ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Student directed activities with special patient populations. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4670 - SPECIAL TOPICS ROTATION II (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability Advanced pharmaceutical care experiences with pediatric patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4671 - RESEARCH ROTATION I (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability Research experience in pharmaceutical sciences, social and administrative sciences, or pharmacy practice. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4672 - RESEARCH ROTATION II (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Research experience in pharmaceutical sciences, social and administrative sciences, or pharmacy practice. 6 week course. Syllabus available.

PREREQ: PHAR 4671

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4271 - INTERMEDIATE COMMUNITY PHARMACY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Reinforce and build upon the basic knowledge and experience gained in rotations. The focus will be on integrating patient care activities with pharmacy operations, conducted in a chain or independent community pharmacy. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4673 - ADVANCED COMMUNITY PHARMACY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Advanced pharmaceutical care experiences with community pharmacy patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4674 - ADVANCED HOSPITAL PHARMACY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with institutionalized patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4679 - PAIN MANAGEMENT ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with an ambulatory patient population in need of chronic pain management. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4680 - PALLIATIVE CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with palliative patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4681 - RURAL PHARMACY PRACTICE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with ambulatory and/or institutionalized patients in a rural community. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4682 - AMBULATORY CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with ambulatory patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4683 - CARDIOLOGY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients with cardiovascular diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4684 - ADVANCED DRUG INFORMATION ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences in a drug information service. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4685 - PULMONARY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients having respiratory diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4686 - HOME CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with home care patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4688 - INFECTIOUS DISEASES ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients having infectious diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4689 - NUTRITIONAL CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with nutritional care patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4690 - ONCOLOGY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients having oncological diseases. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4691 - PHARMACOKINETICS ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences in pharmacokinetic dosing program. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4693 - SURGERY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with surgical patients. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4694 - NEONATOLOGY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with neonates. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4695 - CRITICAL CARE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with critically ill adult patients in the intensive care unit. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4696 - NUCLEAR PHARMACY ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Practical experiences in the preparation of radiopharmaceutical products and their use in medical practice. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4697 - POISON CENTER ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Pharmaceutical care experiences with patients or caregivers in the poison control center. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

PHAR 4698 - ADMINISTRATIVE PHARMACY PRACTICE ROTATION (6:0:40 F)

ELECTIVE P4 APPE - offered based upon preceptor availability. Practical experiences in financial, operations, personnel, and marketing management of a pharmacy practice environment. 6 week course. Syllabus available.

Levels: Pharmacy-Doctoral, Fourth year

FACULTY

Biomedical Sciences

Das, Hiranmoy, Professor, Amarillo.

Mikelis, Constantinos, PhD, Assistant Professor, Amarillo; B.S. Biology (2002), University of Patras, Greece; M.S. Molecular Pharmacology (2004), University of Patras, Greece; Ph.D. Molecular Pharmacology (2009), University of Patras, Greece.
