During this time, PGY2 residents will work on a review of their Teaching and Learning Curriculum Programs.

During this time, we would like for you to reflect on the activities (assignments, formal presentations, and teaching) completed during the program, and develop a plan to help guide future program offerings.

Specifically:

- Were the activities useful?

- Should anything be removed?
 - Modified?
 - Added?

Time will also be allotted for PGY2 residents to have an opportunity to update their CVs with all pertinent PGY1 activities, and begin formatting for known PGY2 activities. This is also a good time to start planning for removal of student rotations (IPPE and APPE), as these will not be pertinent for a job search.
