

About Our Facility

Texas Health Presbyterian Hospital Dallas is one of the two flagship hospitals within Texas Health Resources (THR), the largest fully integrated, not-for-profit health care system in Texas.

Since its opening in 1966, Texas Health Presbyterian Hospital Dallas (THD) has become a respected center of quality health care. The campus includes a 900-bed community/teaching tertiary care hospital with a pharmacist managed anticoagulation clinic. THD is recognized for excellence in cardiology, oncology, neurology, orthopedics, and critical care, among many other specialty areas. It is a certified comprehensive stroke center and a Level II Trauma center.

Pharmacy services at THD are progressive and continuously evolving. Clinical pharmacists are an integral part of the health care team at THD. Pharmacists, pharmacy residents, and pharmacy students take part in patient care rounds with medical residents, medical staff, and medical students. Our decentralized pharmacy model provides inpatient pharmacy services, such as pharmacokinetic dosing and antimicrobial stewardship. Ample opportunity exists for the development of innovative and advanced patient care practices in the collaborative environment found at THD.

About Our Program

The Pharmacy Practice Residency is a 12-month program designed to develop general skills in inpatient and ambulatory patient care, and pharmacy practice management. Pharmacy residents are based at Presbyterian Hospital in Dallas and are affiliated with the Texas Tech School of Pharmacy.

Pharmacists completing this residency program will become competent practitioners of pharmaceutical care as practiced in an integrated clinical environment. This program offers a positive atmosphere for residents to learn and grow professionally by providing opportunities to teach, collaborate with other healthcare professionals, and provide direct patient care.

Residents are required to complete 10 rotations and one major research project. Flexibility exists for the resident to individualize training to gain advanced skills in his or her area of interest. An optional teaching certificate is available to residents who would like to pursue academia or improve their teaching skills.

TTUHSC School of Pharmacy

The Texas Tech University Health Sciences Center School of Pharmacy (TTUHSC-SOP) was established in 1993. It is part of the Texas Tech University Health Sciences Center which also includes a Graduate School of Biomedical Sciences, School of Health Professions, School of Medicine, and School of Nursing. The TTUHSC-SOP education and training curriculum utilizes problem-based learning techniques. The main campus for the SOP is located in Amarillo. Regional campuses located in Dallas/Fort Worth, Lubbock, and Abilene are fashioned with multimedia classrooms and video conferencing capabilities. The Dallas/Fort Worth Regional campus was established in 1999, and has now expanded to 2 locations. Classrooms and offices are located at both the North Texas Veterans Affairs Hospital campus and at the Southwest Professional Building which is adjacent to UT Southwestern Medical Center.

The TTUHSC-SOP Residency Program was established in 1997 and promotes excellence in patient care by providing education, development, and advanced training to new practitioners. Currently, 35 residents are enrolled in this program across 18 unique pharmacy practice and specialty resident programs located in Abilene, Amarillo, Dallas-Fort Worth, and Lubbock.
