

Our Pharmacy Department

In order to give our patients and providers exceptional service, our department is made up of 35 pharmacists, 23 technicians, four interns, and four residents. Outside of the central pharmacy, we have five point-of-care pharmacists as well as a team of clinical specialists covering internal medicine, infectious diseases, critical care, cardiology, and emergency medicine.

We invest in the future of the profession! Besides the residency program, we host more than 80 pharmacy students annually and are committed to providing them with exceptional experiential education. Our structured intern program allows students to gain practical skills while applying their knowledge in a real-world setting. This commitment to pharmacy learners gives residents an abundance of opportunity to grow as preceptors and continue the tradition of giving back to the profession.
