Texas Tech University Health Sciences Center School of Pharmacy Residency Program

The Graduate Pharmacy Education (Residency) Program at TTUHSC – School of Pharmacy was established in 1997 and promotes excellence in patient care by providing education, development, and advanced training to practitioners, educators, and scholars. Residents support the School of Pharmacy mission by expanding faculty practice and scholarship activities; as Assistant Instructors, residents are also actively integrated into the education of Pharm.D. students, serving as clerkship preceptors and small-group facilitators. The Residency Program, under the direction of Dr. Steve Pass, offers diverse training opportunities through 15 unique Pharmacy Practice and Specialty Resident programs located in Abilene, Amarillo, Dallas-Fort Worth and Lubbock. Presently, 35 residents are enrolled in this program. Since its formation, more than 290 residents have successfully completed residency training. Residents participate in a variety of learning opportunities as part of their program such as a longitudinal Clinician-Educator Teaching Certificate Program. Faculty members present monthly topics to residents related to teaching. This year the Teaching Certificate Program has been revised to provide more hands-on lecturing to the residents. Every resident interested in a teaching certificate will present an optional lecture to an audience of residents and pharmacists, who will then evaluate the residents' performance during the lecture and give constructive feedback on improvement areas. The program has been evolving each year to enhance learning opportunities and encourage residents to pursue academic positions upon completion of the program.
