How do I get an iRIS account?

All personnel working with animals need an iRIS account.

Go to https://www.sobmrmedris.ttuhsc.edu:8867/

Click Request new account

Provide:
- *Required Information
- Job Title
- Degree (UG, BS, MS, PhD)
- eRaider User ID (R#)
- Cell Number
- [Campus] Location

In *Request Purpose, type “IACUC” and provide the following:
- PI Name
- Role (Research Assistant, Study Contact, etc.)

After the iRIS account is created, a notification email will be sent. The PI or Study Coordinator can then submit an Amendment to add personnel, or the PI can submit an Initial Review Submission Form. Next, complete your CITI animal training and OHSP Health Questionnaire and enrollment.

After the submission adding new personnel to a protocol is approved by the IACUC, in writing, personnel can login to iRIS with the eRaider User ID and Password to access the approved protocol(s). Email iacuc@ttuhsc.edu for additional assistance.
