How do I get an iRIS account?

All personnel working with animals need an iRIS account.

Go to https://ttuhsc.imedris.net

Sign in with your eraider credentials.

If you do not have an eraider, send an email to iacuc@ttuhsc.edu with the following information:

- First, Middle, Last Name
- Job Title (Prof, Post-Doc, Student)
- Degree (UG, BS, MS, PhD)
- eRaider User ID (R#)
- Cell Number
- [Campus] Location
- Department
- PI’s Name
- Reason for Request is “IACUC”

After the iRIS account is created, a notification email will be sent. The PI or Study Coordinator can then submit an Amendment to add personnel, or the PI can submit an Initial Review Submission Form. Next, complete your CITI animal training and OHSP Health Questionnaire and enrollment.

After the submission adding new personnel to a protocol is approved by the IACUC in writing, personnel can login to iRIS with eRaider credentials to access the approved protocol(s).
