

Open	Participants may be enrolled.
Draft	Proposal has not yet been submitted to the IRB.
Pending	Proposal has been submitted to the IRB, but has not yet received final approval.
Cancelled	The study received IRB approval, but the PI has chosen not to continue/complete the study.
Completed	The study received IRB approval and has been conducted as approved by the IRB. All subjects have finished treatment; there is no further participation/intervention; data collection and analyses are finished.
Declined	The IRB will not be conducting any further review of this study.
Follow-up	Enrollment is closed and <b>no subjects</b> are receiving study drugs or active intervention; research staff continue to monitor participants' condition
Closed to accrual	Enrollment is closed <b>but at least one subject</b> continues to receive study drugs or active intervention
Suspended	Study is temporarily closed by the IRB because of OHRP-reportable problems in the conduct of the research.
Terminated	Study is permanently closed by the IRB because of OHRP-reportable problems in the conduct of the research.
Administratively Closed	Study is permanently closed by the IRB—often for non-response to requests by the IRB.
Withdrawn	Proposal has been submitted to the IRB, but the investigator requests that no further review take place.
Exempt	Proposal fits into one or more categories designated by DHHS as “exempt” from ongoing IRB review. Note that the IRB (not the investigator) makes the determination of exemption.
Temporary Closure	Study is temporarily closed by the investigator or sponsor.
Not Human Research	The study does not fit the DHHS definition of human research
