

CANCER PREVENTION & RESEARCH INSTITUTE OF TEXAS

Join CPRIT for a redesigned and interactive webinar that will help current grantees successfully navigate compliance and reporting requirements. The training will include an overview of required reporting, recent administrative rule changes, common reporting errors, and a Q&A with staff.

CPRIT's administrative rule ([§ 703.22](#)) requires all CPRIT grantees to complete an **annual** compliance training by December 31st of each year. The Authorized Signing Official (ASO) and at least one other individual from each organization **must** attend the annual compliance training; however, we encourage all staff who use CPRIT's grants management system to participate in this training. Attendance at this webinar will satisfy the training requirement for **2019**.

PLEASE NOTE: Beginning this calendar year, required grantee compliance trainings will be program specific. Organizations with grants across multiple programs should attend the training that pertains to the majority of their awards.
