Changes to HSC Wi-Fi Access

Network segmentation involves creating separate network spaces for TTUHSC equipment and personally owned devices. The TTUHSC Networking team has announced they will begin the network segmentation process with the TTUHSC Wi Fi network the week of June 3rd.

What will happen when a device connects to HSC-Air:

- TTUHSC owned, domain connected machines will continue to be able to connect to HSC-Air with access to TTUHSC resources
- All personally owned machines, or TTUHSC assets that are not domain connected will be automatically redirected to the new TTUHSC BYOD (Bring Your Own Device) network
- The BYOD network will provide internet access only.
 - This network will not have access to TTUHSC resources such as file shares and select TTUHSC business sites.
 - Resources with external web connections will remain available (Sakai, Webraider, Outlook Web Access etc.).

If you have any questions, please contact the IT Solutions Center at ITSolutions@ttuhsc.edu.

The purpose of this virtual IPE small group event is to discuss and reflect on the reciprocal relationship between teamwork and individual/team resiliency. UPCOMING EVENTS

Abilene Campus Active Shooter Training Session

All Texas Tech University Health Sciences Center students, faculty and staff are invited to attend an active shooter training session that will be conducted by the Texas Tech Police Department. Active shooter response is part of the annual required TTUHSC Safety Services training. Taking this class will fulfill your obligation for fiscal year 2024. All that is needed to get training credit is a TTUHSC-issued identification card. This is not a come-and-go event, the only way to get credit is to be present from the start of the session.

Shatter the Stigma

In this IPE simulation with SPs, teams of learners from diverse professional backgrounds take the first step in shattering the stigma of SUDs by learning and practicing the use of destigmatizing interviewing techniques. This is accomplished by keynote presentations and panel discussions covering team-based care in SUDs, harm reduction strategies, and interviewing strategies to destigmatize the interview. Teams of learners will then participate in 2-3 simulations with SPs, followed by a facilitated debrief. Want to volunteer to be a student peer facilitator or a facilitator? IPE Escape Room Challenge

Looking for a fun and engaging IPE experience? The IPE Escape Room is an adventurous way to meet new students across our various healthcare professions while improving teamwork and communication skills. Throughout this beginner escape room, teams will collaborate together to solve puzzles that will ultimately lead to a discharge plan in a simulated patient case. Team members are not required to have discipline-specific knowledge and teams will be provided clues as needed. The IPE Escape Room Challenge is a perfect opportunity to learn more about TTUHSC, work with an interprofessional team of students from various professions, and learn more about the importance of interprofessional education and practice in healthcare. Following the completion of the challenge or at the end of the hour, a debrief will take place allowing teams to discuss their escape room experience and evaluate their team's performance.
