Find Your Zone - 3rd Event

Students within health profession programs experience high physical, cognitive, and psychological demands, leading to occupational imbalance, which impacts their overall emotional health and well-being. Occupational imbalance occurs when there is insufficient time for one's own occupational interests and growth amongst the areas of activities of daily living, work/productive activity, leisure, rest, and social participation.

This series of Fall events provides students with specifically designed creative and leisure activities that facilitate a health-enhancing flow experiences and ultimately restore occupational balance once routinized over time. The third event on November 17th will focus on Resilience and Paper Quilling. Paper quilling is an ancient art form that involves manipulating and arranging small strips of paper into detailed designs. RSVP by emailing Laurie.Stetler@ttuhsc.edu (limited to 20 students).
